Chapter 1: Introducing WordPress

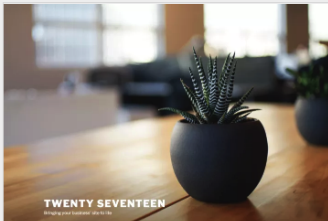

A screenshot of the WordPress Codex homepage. The page has a dark header with the WordPress logo and 'WORDPRESS.ORG' on the left, a search bar on the right, and a navigation menu in the center. Below the header, the word 'Codex' is displayed on the left, and 'Codex tools: Log in' is on the right. A light blue notification bar contains an information icon and the text 'Interested in functions, hooks, classes, or methods? Check out the new WordPress Code Reference!'. Below this is the 'Main Page' section, which includes a welcome message: 'Welcome to the WordPress Codex, the online manual for WordPress and a living repository for WordPress information and documentation.' A large box titled 'What You Most Need to Know About WordPress' contains two columns of links: 'WordPress Features', 'Download WordPress', 'Installing WordPress', 'Current WordPress Version', 'WordPress News', 'WordPress Support Forums', 'Troubleshooting', 'About WordPress', and 'Glossary'. On the right side, there is a vertical list of links under the heading 'Codex Resources', including 'Home Page', 'WordPress Lessons', 'Getting Started', 'Working with WordPress', 'Design and Layout', 'Advanced Topics', 'Troubleshooting', 'Developer Docs', 'About WordPress', 'Community portal', 'Current events', 'Recent changes', 'Random page', and 'Help'.

Chapter 2: Getting Started with WordPress

The image displays three WordPress hosting plans side-by-side. Each plan has a distinct icon: a house for StartUp, a star for GrowBig, and a crown for GoGeek. All plans feature a 'SPECIAL PRICE' in green, a 'Regular' price in grey, and a list of features with checkmarks. Each plan includes a red 'GET STARTED' button and a 'See Plan Details' link with a right-pointing arrow.

Plan Name	Special Price	Regular Price	Key Features
StartUp	\$3.95/mo.	\$11.95/mo.	One Website, 10GB Web Space, Suitable for ~10,000 Visits Monthly, Essential WordPress Features
GrowBig	\$5.95/mo.	\$19.95/mo.	Multiple Websites, 20GB Web Space, Suitable for ~25,000 Visits Monthly, Essential WordPress Features, Premium WordPress Features
GoGeek	\$11.95/mo.	\$34.95/mo.	Multiple Websites, 30GB Web Space, Suitable for ~100,000 Visits Monthly, Essential WordPress Features, Premium WordPress Features, Geeky WordPress Features

The image shows a domain selection interface with three steps: 'Step 1. Choose Plan', 'Step 2. Choose Domain', and 'Step 3. Review & Complete'. The 'Step 2. Choose Domain' section is active and titled 'Please Enter Your Domain'. It offers two radio button options: 'Register a New Domain' (selected) and 'I already have a Domain'. Below these is a text input field containing 'www.' and a dropdown menu showing '.com'. At the bottom, a green checkmark indicates 'Domain Registration: \$15.95/year'. A blue 'PROCEED' button is located at the bottom center.

Purchase Information

Hosting Services

Plan:	StartUp 
Data Center:	Chicago (USA) 
Period:	12 months 
Hosting Price	\$3.95/mo (Regular: \$11.95/mo) (Now bill \$47.40)

* The special initial price applies for the first invoice only. Once your initial term is over regular renewal prices apply.

Extra Services

- Domain Registration** **\$17.95**
 The domain name you've chosen becomes your property once registered. We will directly point it to your new hosting account as soon as it gets activated.
- Domain Privacy** **\$12.00/year** (Regular: \$24.00/year)
 By registering a domain name, your personal information becomes publicly available through the whois services. To protect it, use Domain Privacy.
- SG Site Scanner** **\$19.80/year**
 SG Site Scanner is a monitoring service that checks your website daily and immediately notifies you if your website has been hacked or injected with malicious code.

Welcome to the wonderful world of blocks! Click the "+" ("Add block") button to add a new block. There are blocks available for all kinds of content: you can insert text, headings, images, lists, and lots more!

[See next tip](#)

The screenshot shows a content editor interface. At the top left, there is a toolbar with icons for adding, undo, redo, help, and a menu, with a red **(3)** next to the menu icon. The main content area has a large heading "Add title" and a subtext "Start writing or type / to choose a block", with a red **(1)** next to the subtext. On the right side, there is a settings sidebar with a red **(2)** next to it. The sidebar includes sections for "Status & Visibility" (with options for Public and Immediately), "Categories" (with options for Food Talk, Recipes, and Uncategorized), and "Featured Image" (with a "Set featured image" button). At the top right of the editor, there are "Preview" and "Publish..." buttons, and a settings gear icon.

The screenshot shows a content editor interface. At the top left, there is a toolbar with icons for adding, undo, redo, help, a menu, and a "Saved" status indicator. The main content area is empty. At the top right, there are "Preview" and "Publish..." buttons, and a settings gear icon.

This is my first blog post. Not particularly exciting, just a simple paragraph, but I will be expanding it soon.

That was a nice image, wasn't it?

- it's big
- it's colorful
- it's tasty!

*In the middle of difficulty lies
opportunity.*

Description

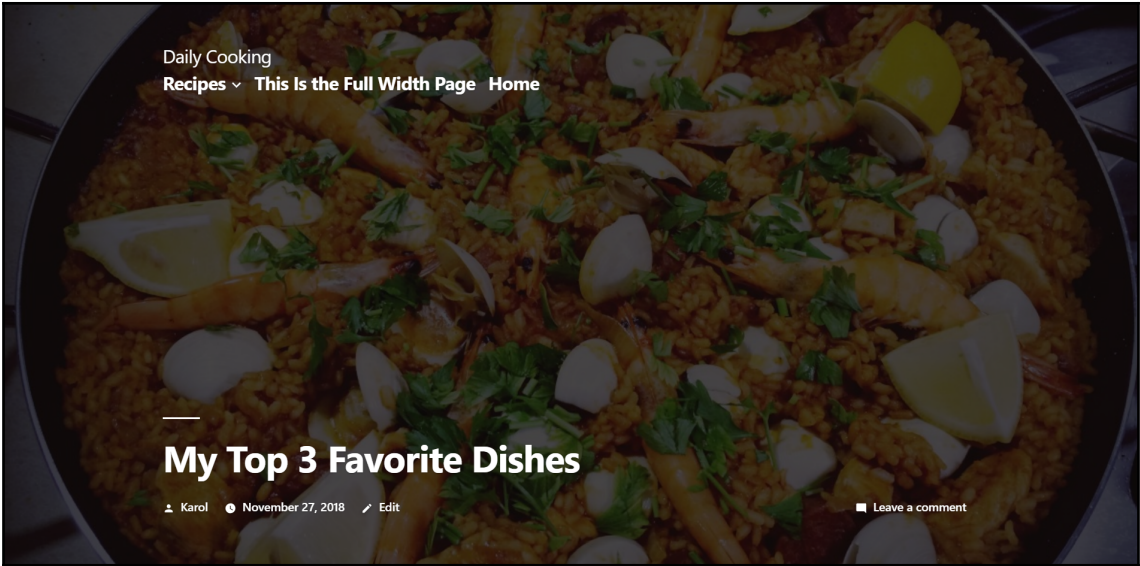

The screenshot shows a WordPress editor interface. At the top, there is a toolbar with icons for image, list, table, code, and other elements. Below the toolbar, a large image of paella is displayed. A context menu is open over the image, listing several actions with their respective keyboard shortcuts:

- Hide Block Settings (Ctrl+Shift+,)
- Duplicate (Ctrl+Shift+D)
- Insert Before (Ctrl+Alt+T)
- Insert After (Ctrl+Alt+Y)
- Edit as HTML
- Add to Reusable Blocks
- Remove Block (Shift+Alt+Z)

A close-up view of the paella image from the previous screenshot. Below the image, there is a white rectangular area with the text "Write caption..." centered within it.

Email me whenever

Anyone posts a comment

A comment is held for moderation

Comment Moderation

Hold a comment in the queue if it contains or more links. (A common characteristic of comment spam is a large number of hyperlinks.)

When a comment contains any of these words in its content, name, URL, email, or IP address, it will be held in the [moderation queue](#). One word or IP address per line. It will match inside words, so "press" will match "WordPress".

Comment Blacklist

When a comment contains any of these words in its content, name, URL, email, or IP address, it will be put in the trash. One word or IP address per line. It will match inside words, so "press" will match "WordPress".

Add New Category

Name

The name is how it appears on your site.

Slug

The "slug" is the URL-friendly version of the name. It is usually all lowercase and contains only letters, numbers, and hyphens.

Parent

Categories, unlike tags, can have a hierarchy. You might have a Jazz category, and under that have children categories for Bebop and Big Band. Totally optional.

Description

The description is not prominent by default; however, some themes may show it.

Here you can see them all.

Import

If you have posts or comments in another system, WordPress can import those into this site. To get started, choose a system to import from below:

Blogger Install Now Details	Import posts, comments, and users from a Blogger blog.
Blogroll Install Now Details	Import links in OPML format.
Categories and Tags Converter Install Now Details	Convert existing categories to tags or tags to categories, selectively.
LiveJournal Install Now Details	Import posts from LiveJournal using their API.
Movable Type and TypePad Install Now Details	Import posts and comments from a Movable Type or TypePad blog.
RSS Install Now Details	Import posts from an RSS feed.
Tumblr Install Now Details	Import posts & media from Tumblr using their API.
WordPress Install Now Details	Import posts, pages, comments, custom fields, categories, and tags from a WordPress export file.

If the importer you need is not listed, [search the plugin directory](#) to see if an importer is available.

WordPress Run Importer Details	Import posts, pages, comments, custom fields, categories, and tags from a WordPress export file.
--	--

Import WordPress

Howdy! Upload your WordPress eXtended RSS (WXR) file and we'll import the posts, pages, comments, custom fields, categories, and tags into this site.

Choose a WXR (.xml) file to upload, then click Upload file and import.

Choose a file from your computer: (Maximum size: 8 MB)

No file chosen

Export

When you click the button below WordPress will create an XML file for you to save to your computer.

This format, which we call WordPress eXtended RSS or WXR, will contain your posts, pages, comments, custom fields, categories, and tags.

Once you've saved the download file, you can use the Import function in another WordPress installation to import the content from this site.

Choose what to export

All content

 **Really Simple SSL**
By Rogier Lankhorst, Mark Wolters

[Download](#)

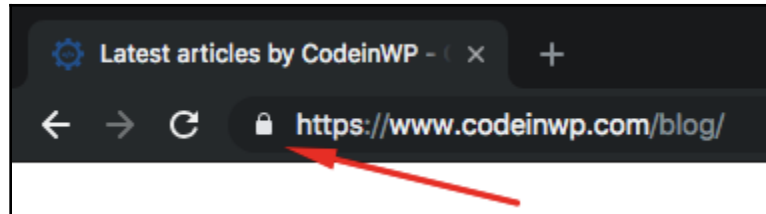

Almost ready to migrate to SSL!

Some things can't be done automatically. Before you migrate, please check for:

- Http references in your .css and .js files: change any http:// into //
- Images, stylesheets or scripts from a domain without an ssl certificate: remove them or move to your own server.

You can also let the automatic scan of the pro version handle this for you, and get premium support and increased security with HSTS included.

[Go ahead, activate SSL!](#)

Chapter 7: Choosing and Installing Themes

Hestia By Themeisle

Hestia is a modern WordPress theme for professionals. It fits creative business, small businesses (restaurants, wedding planners, sport/medical shops), startups, corporate businesses, online agencies and firms, portfolios, ecommerce (WooCommerce), and freelancers. It has a multipurpose one-page design, widgetized footer, blog/news page and a clean look, is compatible with: Flat Parallax Slider, Photo Gallery, Travel Map and Elementor Page Builder . The theme is responsive, WPML, Retina ready, SEO friendly, and uses Material Kit for design.

Daily Cooking Child Theme

The image shows a WordPress dashboard sidebar on the left with menu items: Dashboard, Posts, Media, Pages, Comments, Appearance (highlighted), Themes, Customize, and Widgets. The main content area is titled 'Themes' and shows 12 installed themes. At the top right of the main area are an 'Add New' button and a search box for installed themes. The first theme preview is for 'Daily Cooking Child Theme', which features a red 'CUSTOM' stamp over a 'Daily Cooking' logo. Below the preview is an 'Active: Daily Cooking Cust...' label and a 'Customize' button. To the right of the preview is a large grey checkered area, likely a placeholder for a theme image or a second preview. Below this area is the text 'Daily Cooking Child Theme'.

Chapter 10: Social Media Integration, Podcasting, and HTTPS

Almost ready to migrate to SSL!

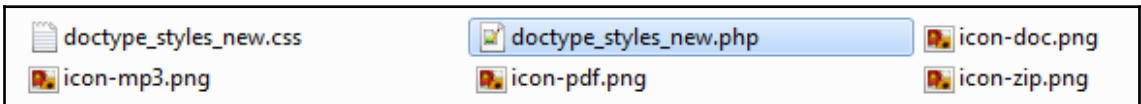

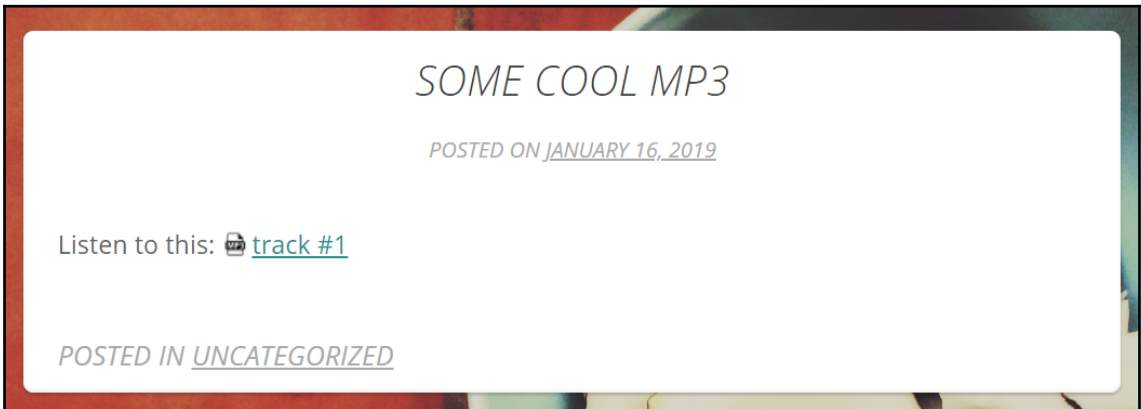

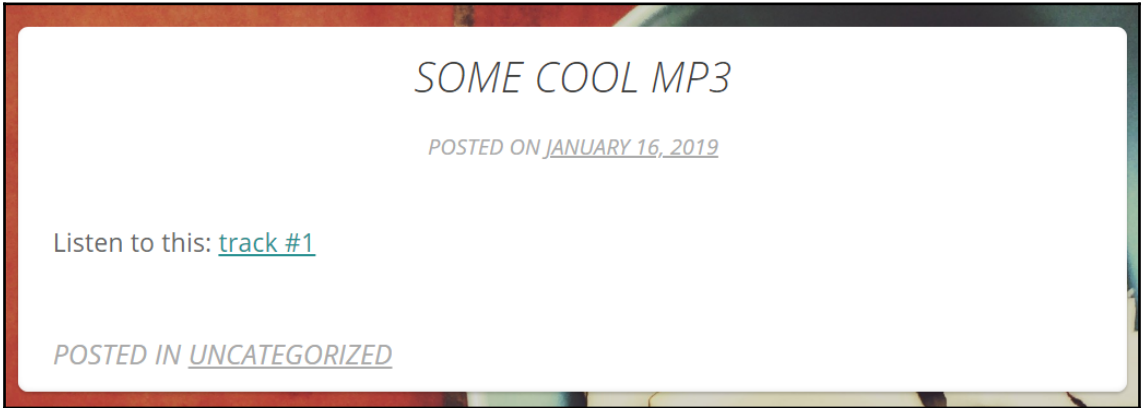

Some things can't be done automatically. Before you migrate, please check for:

- Http references in your .css and .js files: change any http:// into //
- Images, stylesheets or scripts from a domain without an ssl certificate: remove them or move to your own server.

You can also let the automatic scan of the pro version handle this for you, and get premium support and increased security with HSTS included, [check out Really Simple SSL Premium](#)

[Go ahead, activate SSL!](#)

Supported Document Types

Document types supported by the Add Document Type Styles New plugin are listed below.

To add a new type to be linked, take the following steps, in this order:

1. Upload the icon file for the new doctype to `wp-content/plugins/add_doctype_styles_new/`
2. Add a line for the new doctype to the stylesheet at `wp-content/plugins/add_doctype_styles_new/doctype_styles_new.css`
3. Add the extension of the new doctype to the list below, keeping with the comma-separated format.

Storefront is the free WordPress theme built and maintained by the makers of WooCommerce.

 **Bulletproof WooCommerce integration:** Rest assured the integration between WooCommerce, WooCommerce extensions and Storefront is water-tight.

 **Built with accessibility in mind:** Storefront adheres to the strict wordpress.org accessibility guidelines making your store accessible to the widest audience possible.

 **Child themes and extensions available:** Like WooCommerce, you can extend Storefront with an extension or child theme to make your store truly your own.

 **No Shortcodes, sliders or page builders:** Bring your favorite sliders or page builders, Storefront is built to work with the most popular options.

 **Clean, simple mobile-first design:** The perfect place to start when customizing your store, looks beautiful on any device.

 **Optimized for search:** Valid schema markup for improved SEO performance.
