

Chapter 1: Brief Repository Overview and Usage of the Issue Tracker

Create a new repository

A repository contains all the files for your project, including the revision history.

Owner

 axilleas ▾

Repository name

super-duper-octo-robot ✓

Great repository names are short and memorable. Need inspiration? How about **super-duper-octo-robot**.

Description (optional)

A bot that checks for grammatical errors

 **Public**

Anyone can see this repository. You choose who can commit.

 **Private**

You choose who can see and commit to this repository.

Initialize this repository with a README

This will let you immediately clone the repository to your computer. Skip this step if you're importing an existing repository.

Add .gitignore: **None** ▾

Add a license: **None** ▾

Create repository

Quick setup — if you've done this kind of thing before

or HTTPS SSH `git@github.com:axilleas/github-essentials.git`

We recommend every repository include a [README](#), [LICENSE](#), and [.gitignore](#).

...or create a new repository on the command line

```
echo "# github-essentials" >> README.md
git init
git add README.md
git commit -m "first commit"
git remote add origin git@github.com:axilleas/github-essentials.git
git push -u origin master
```

...or push an existing repository from the command line

```
git remote add origin git@github.com:axilleas/github-essentials.git
git push -u origin master
```

...or import code from another repository

You can initialize this repository with code from a Subversion, Mercurial, or TFS project.

Chapter 2: Using the Wiki and Managing Code Versioning

The screenshot shows the GitHub Wiki 'Create new page' interface. At the top, there is a navigation bar with links for Code, Issues (3), Pull requests (0), Projects (0), Wiki (selected), Insights, and Settings. Below the navigation bar, the heading 'Create new page' is displayed. A text input field contains the word 'Home'. Below the input field, there are two tabs: 'Write' (selected) and 'Preview'. A rich text editor toolbar is visible, containing buttons for heading levels (h1, h2, h3), link, image, bold (B), italic (I), code (<>), bulleted list, numbered list, quote, horizontal rule, and help (?). The 'Edit mode' dropdown is set to 'Markdown'. The main text area contains the text 'Welcome to the github-essentials-v2 wiki!'. Below the text area, there is an 'Edit Message' section with a text input field containing 'Initial Home page'. A green 'Save Page' button is located at the bottom right of the page.

Repository creation

Outside collaborators can **never** create repositories.

Allow members to create repositories for this organization
Allowing your organization's members to create repositories lets them share and work on projects more openly. If enabled, members will be able to create **public** and **private** repositories.

Save

Repository deletion

Allow members to delete or transfer repositories for this organization
If enabled, members with admin permissions for the repository will be able to delete or transfer **public** and **private** repositories. If disabled, only organization owners can delete or transfer repositories.

Save

Repository visibility change

Allow members to change repository visibilities for this organization
If enabled, members with admin permissions for the repository will be able to change repository visibility from **public** to **private**. If disabled, only organization owners can change repository visibilities.

Save

Repository forking

Allow forking of private repositories
If enabled, allow forking of private repositories. This setting is also configurable per-repository.

Save

Repository permissions

Choose default permissions for user roles.

Organization members
Not outside collaborators.

Read -

Give access to the people you work with

You should give access to the collaborators and teams you need to work with.

[Add teams and collaborators](#)

Seamless communication with teams

Teams are a great way for groups of people to communicate and work on code together.
Take a look at why they're great.

Flexible repository access

You can add repositories to your teams with more flexible levels of access (Admin, Write, Read).

Request to join teams

Members can quickly request to join any team. An owner or team maintainer can approve the request.

Team mentions

Use team @mentions (ex. `@github/design` for the entire team) in any comment, issue, or pull request.

[New team](#)

[Learn more](#)

Create new team
