The screenshot shows a text editor interface. At the top, there is a toolbar with icons for bold (B), italic (I), link, unlink, bulleted list, numbered list, quote, and image. A dropdown menu is currently set to "Normal", and a "Source" button is visible. The main text area contains the following content:

We provide the following digital services to our clients.

Lorem ipsum dolor sit amet, consetetur sadipscing elitr, sed diam nonumy eirmod tempor invidunt ut labore et dolore magna aliquyam erat, sed diam voluptua.

body p

At the bottom, a "Text format" dropdown menu is open, showing "Basic HTML" as the selected option. An orange arrow points to this dropdown, and another orange arrow points to the "About text formats" link.

### Body

The screenshot shows the same text editor interface, but with the "Source" button highlighted by an orange box and a hand cursor. The main text area displays the raw HTML code for the content shown in the previous screenshot:

```
<p>We provide the following digital services to our clients.</p>
```

```
<p>Lorem ipsum dolor sit amet, consetetur sadipscing elitr, sed diam nonumy eirmod tempor invidunt ut labore
```

## Displays

The screenshot shows the 'Displays' configuration interface. At the top, there is a 'Page' button and a '+ Add' button. Below this, the 'Display name' is currently set to 'Page'. A hand icon with a circled '1' points to the 'Page' text. To the right, the 'Administrative name' field contains 'News list as a Page', with a hand icon and a circled '2' pointing to it. Below that is an empty 'Administrative description' field. At the bottom, there is an 'Apply' button and a 'Cancel' button. A hand icon with a circled '3' points to the 'Apply' button.

## Displays

This screenshot shows the 'Displays' configuration page after the changes. The 'Display name' field now shows 'News list as a Page'. An orange callout bubble with the text 'revised display name' and an arrow points to the 'News list as a Page\*' text in the top button. The '+ Add' button is also visible.

node/7 (the News page)

Basic page (node/7)

A screenshot of a Drupal page titled 'News'. At the top left is the title 'News'. Below it are 'View' and 'Edit' buttons. An orange arrow points from the 'Edit the page' text to the 'Edit' button. Below the buttons is a paragraph of filler text: 'Filler text: Lorem ipsum dolor sit amet, consetetur sadipsc elitr, sed diam nonumy eirmod tempor invidunt ut labore et dolore magna aliquyam erat, sed diam voluptua.' An orange arrow points from the 'Edit the view' text to a pencil icon on the right side of this paragraph. Below the text is a dashed orange box containing an article preview. The article title is 'An article classified with Charities and Documentation'. Below the title is the text 'Submitted by admin on Tue, 04/14/2015 - 11:52'. Below that is another paragraph of filler text. An orange arrow points from the 'View' text to the 'View' button above the dashed box. Another orange arrow points from the 'Edit the first Article in the View' text to a pencil icon on the right side of the article preview.

## Logging and errors ☆

[Home](#) » [Administration](#) » [Configuration](#) » [Development](#)

### Error messages to display

- None
- Errors and warnings
- All messages
- All messages, with backtrace information

It is recommended that sites running on production environments do not display any errors.

### Database log messages to keep

1000 ▼

The maximum number of messages to keep in the database log.  
Requires a [cron maintenance task](#).

## Maintenance mode ☆

[Home](#) » [Administration](#) » [Configuration](#) » [Development](#)

Use maintenance mode when making major updates, particularly if the updates could disrupt visitors or the update process. Examples include upgrading, importing or exporting content, modifying a theme, modifying content types, and making backups.

- Put site into maintenance mode

Visitors will only see the maintenance mode message. Only users with

### Message to display when in maintenance mode

@site is currently under maintenance. We should be back shortly. Thank you for your patience.

## MEDIA

### ➤ File system

Tell Drupal where to store uploaded files and how they are accessed.

### ➤ Image styles

Configure styles that can be used for resizing or adjusting images on display.

### ➤ Image toolkit

Choose which image toolkit to use if you have installed optional toolkits.

### Public file system path

`sites/drupal-8.dd/files`

A local file system path where public files will be stored. This directory must exist and be writable by Drupal. This directory must be relative to the Drupal installation directory and be accessible over the web. This must be changed in `settings.php`

Local site:	<a href="http://drupal-8.dd:8083">http://drupal-8.dd:8083</a>
Local code:	<a href="C:\Users\Nick\Sites\devdesktop\drupal-8">C:\Users\Nick\Sites\devdesktop\drupal-8</a>
Local database:	<a href="#">drupal_8</a>
PHP version:	Default (5.5.23) ▼

### Temporary directory

`c:\windows\temp`

### Delete orphaned files after

6 hours ▼

Orphaned files are not referenced from any content but remain in the file system and may appear in administrative listings. **Warning:** If enabled, orphaned files will be permanently deleted and may not be recoverable.

## Image styles ☆

[Home](#) » [Administration](#) » [Configuration](#) » [Media](#)

Image styles commonly provide thumbnail sizes by scaling and cropping images, but can also add various effects before an image is displayed. When an image is displayed with a style, a new file is created and the original image is left unchanged.

[+ Add image style](#)

STYLE NAME	OPERATIONS
Large (480×480)	<a href="#">Edit</a> ▼
Medium (220×220)	<a href="#">Edit</a> ▼
Thumbnail (100×100)	<a href="#">Edit</a> ▼

magna aliquyam erat, sed diam volu

← 200 by 200 pixels

## Image toolkit ☆

[Home](#) » [Administration](#) » [Configuration](#) » [Media](#)

### Select an image processing toolkit

- GD2 image manipulation toolkit

#### ▼ GD2 IMAGE MANIPULATION TOOLKIT SETTINGS

##### JPEG quality

%

Define the image quality for JPEG manipulations. Ranges from 0 to 100.

[Save configuration](#)

## Search pages ☆

[Home](#) » [Administration](#) » [Configuration](#) » [Search and metadata](#)

#### ▼ INDEXING PROGRESS

Only items in the index will appear in search results. To build and maintain a correctly configured [cron maintenance task](#) is required.

**100% of the site has been indexed. There are 0 items left to index.**

[Re-index site](#)

#### ▼ [INDEXING THROTTLE](#)

##### Number of items to index per cron run

▼

The maximum number of items indexed in each pass of a [cron maintenance task](#). If necessary, reduce the number of items to prevent timeouts and memory errors while indexing. Some search page types may have their own setting for this.

## ▼ DEFAULT INDEXING SETTINGS

Search pages that use an index may use the default index provided by the Search module, or they may use a different indexing mechanism. These settings are for the default index. *Changing these settings will cause the default search index to be rebuilt to reflect the new settings. Searching will continue to work, based on the existing index, but new content won't be indexed until all existing content has been re-indexed.*

*The default settings should be appropriate for the majority of sites.*

### Minimum word length to index

The number of characters a word has to be to be indexed. A lower setting means better search result ranking, but also a larger database. Each search query must contain at least one keyword that is this size (or longer).

#### Simple CJK handling

Whether to apply a simple Chinese/Japanese/Korean tokenizer based on overlapping sequences. Turn this off if you want to use an external preprocessor for this instead. Does not affect other languages.

## ▼ LOGGING

### Log searches

If checked, all searches will be logged. Uncheck to skip logging. Logging may affect performance.

▼ SEARCH PAGES

Search page type:  
 Add new page

## Downloads

### Recommended releases

Version	Download	Date
8.x-1.0-alpha1	tar.gz (13.45 KB)   <b>zip (17.31 KB)</b>	2015-Dec-03
7.x-1.1	tar.gz (14.45 KB)   zip (18.21 KB)	2015-Jan-29
6.x-1.5	tar.gz (15.46 KB)   zip (20.06 KB)	2013-Sep-20

### Development releases

Version	Download	Date
8.x-1.x-dev	tar.gz (14.45 KB)   zip (18.21 KB)	2015-Dec-03
7.x-1.x-dev	tar.gz (14.45 KB)   zip (18.21 KB)	2015-May-19
6.x-1.x-dev	tar.gz (15.46 KB)   zip (20.06 KB)	2013-Oct-19

A context menu is open over the 'zip (17.31 KB)' link. The menu items are: 'Open link in new tab', 'Open link in new window', 'Open link in incognito window', 'Save link as...', and 'Copy link address'. The 'Copy link address' option is highlighted in blue. A red circle with the number '1' is placed over the 'Copy link address' option.

The Drupal administration toolbar is shown. It includes buttons for 'Back to site', 'Manage', 'Shortcuts', and 'admin'. Below these are tabs for 'Content', 'Structure', 'Appearance', and 'Extend'. A red circle with the number '2' is placed over the 'Extend' tab.

A blue button labeled '+ Install new module' is shown. A red circle with the number '3' is placed over the button.

The 'Install from a URL' section is shown. A text input field contains the URL: `http://ftp.drupal.org/files/projects/views_accordion-8.x-1.0-alpha1.zip`. A red circle with the number '4' is placed over the input field, and the word 'paste' is written next to it. Below the input field, there is a note: 'For example: `http://ftp.drupal.org/files/projects/name.tar.gz`'.

The word 'Or' is shown above a blue button labeled 'Install'. A red circle with the number '5' is placed over the 'Install' button.

## Installed themes

### Bartik 8.0.1 (default theme)

A flexible, recolorable theme with many options.

[Settings](#)

### Seven 8.0.1 (admin theme)

The default administration theme for Drupal 7 and 8. It uses a sans-serif font to emphasize the tool-like nature of the interface.

[Settings](#) | [Set as default](#)

### ▼ TOGGLE DISPLAY

Enable or disable the display of certain page elements.

- User pictures in posts ①
- User pictures in comments ②
- User verification status in comments ③
- Shortcut icon ④

### ▼ LOGO IMAGE SETTINGS

Use the default logo supplied by the theme  
**to custom logo** **Supply an alternative**

Examples: `logo.svg` (for a file in the public filesystem),  
`public://logo.svg`, or `core/themes/seven/logo.svg`.

#### Upload logo image

Choose file No file chosen

If you don't have direct file access to the server, use this field to upload your logo.

### ▼ SHORTCUT ICON SETTINGS

Your shortcut icon, or 'favicon', is displayed in the address bar and bookmarks of most browsers.

Examples: `favicon.ico` (for a file in the public filesystem), `public://favicon.ico`, or `core/themes/seven/favicon.ico`.

#### Upload icon image

Choose file No file chosen

If you don't have direct file access to the server, use this field to upload your shortcut icon.

## Rules

[View](#) [Version control](#) [Revisions](#) [Automated Testing](#)

Posted by [fago](#) on November 7, 2007 at 1:34pm

The Rules module allows site administrators to define conditionally executed actions based on occurring events (known as reactive or ECA rules). It's a replacement with more features for the trigger module in core and the successor of the Drupal 5 [workflow-ng](#) module.

### Maintainers for Rules

[klausi](#) - 228 commits  
last: 3 days ago, first: 6 years ago

[fago](#) - 976 commits  
last: 1 week ago, first: 7 years ago

[View all committers](#)  
[View commits](#)

### Issues for Rules

### Example use cases

- Build flexible content publishing workflows changes
- Send customized mails to notify your users about important
- Create custom redirections, system messages, breadcrumbs, ...
- Build an eCommerce store using [Drupal Commerce](#)

And many more...

...to avoid duplicates, please...
