The package manager for Windows
Chocolatey - Software Management Automation
The sane way to manage software on Windows
Chocolatey builds on technologies you know - unattended installation and PowerShell. Chocolatey works with all existing software installation technologies like MSI, NSIS, InnoSetup, etc, but also works with runtime binaries and zip archives. Go Pro/Business to dial that experience up to 11!
Easily manage all aspects of Windows software (installation, configuration, upgrade, and uninstallation). Chocolatey is the most reliable when software is included in the package, but can also easily download resources.
Take advantage of PowerShell to provide automated software management instructions and Chocolatey's built-in module to turn complex tasks into one line function calls!
C:\> choco sea
Install Chocolatey Now
Trusted by Business
Chocolatey can build full software deployments in 5-10 seconds! Packages from Programs and Features in under 60 seconds? You've never built software deployments faster than you will with Chocolatey!
Package Internalizer makes existing packages work completely offline, allowing organizations to take advantage of great logic without a hit to the internet!
