Chapter 3

License information

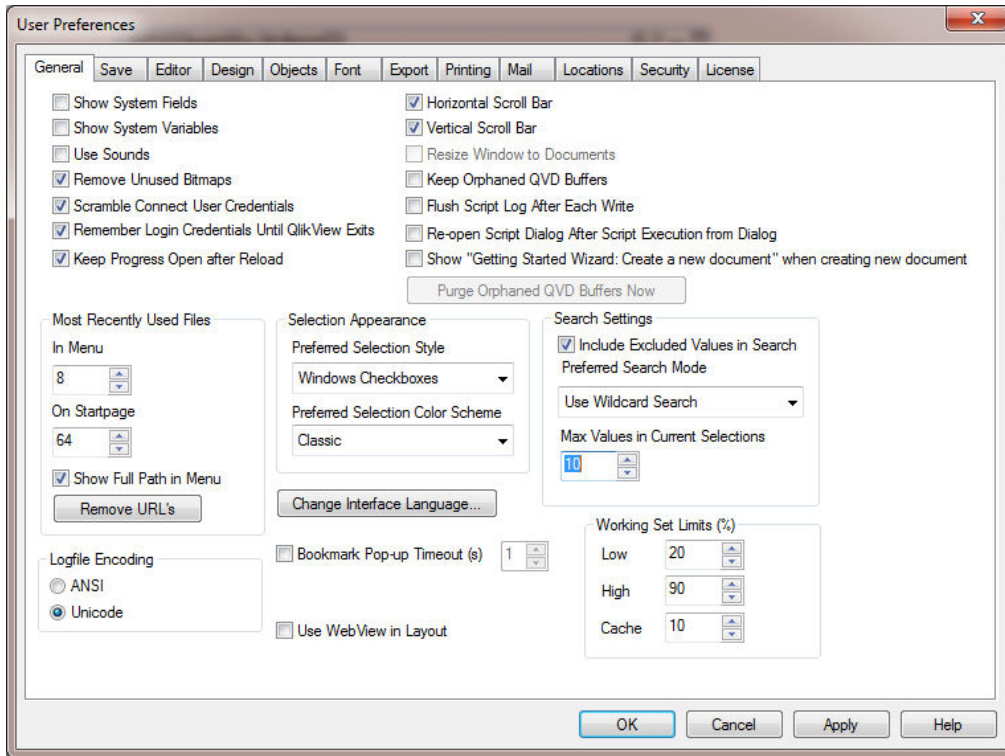

License Information

QlikView User License (using license lease from server)

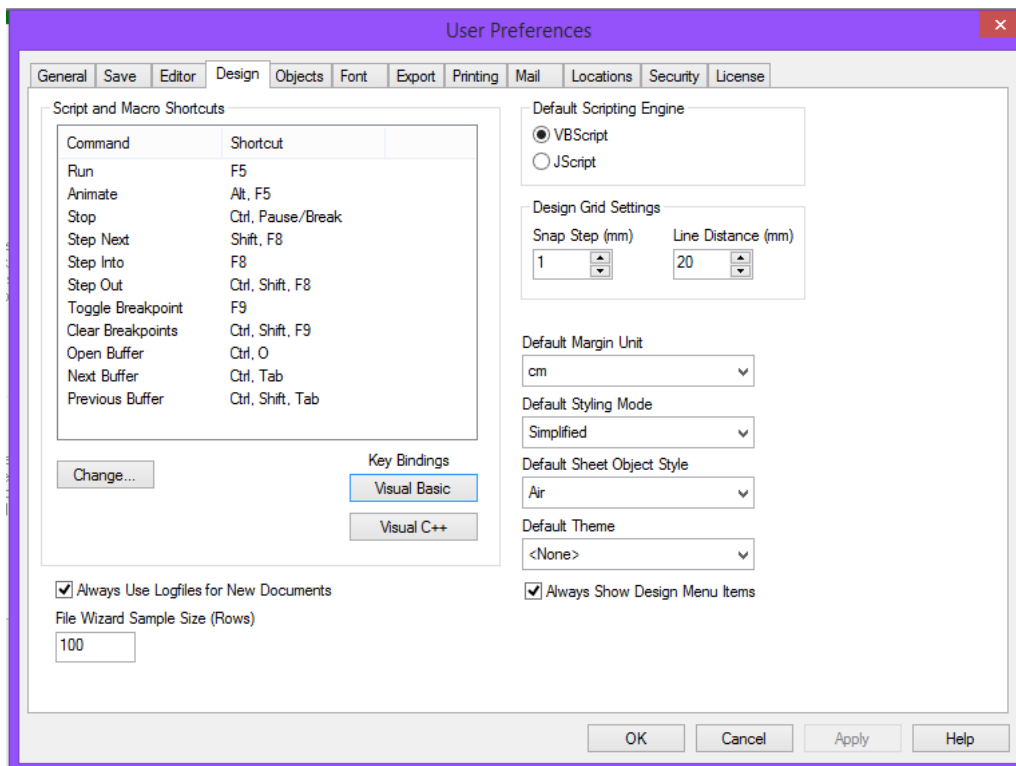

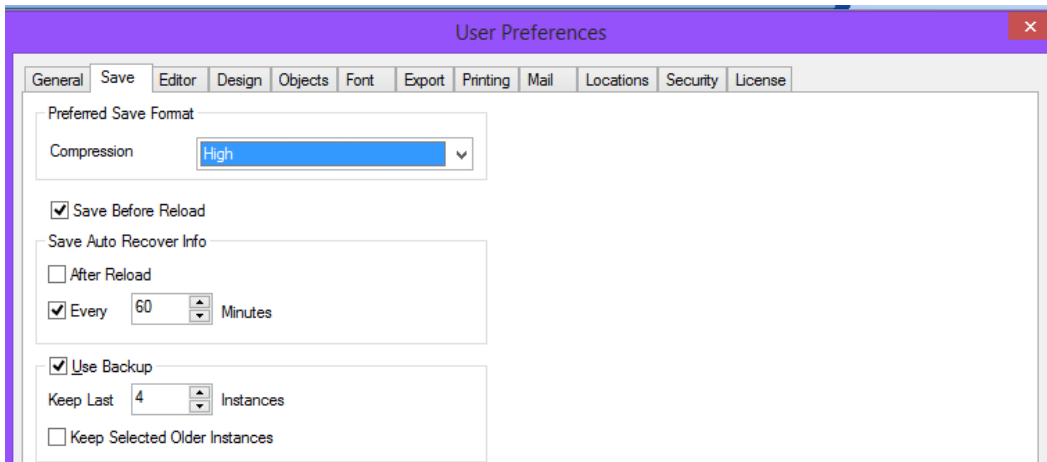

You are running QlikView with a leased license from the QlikView Server **XXX**. Your current lease will expire in 30 days.

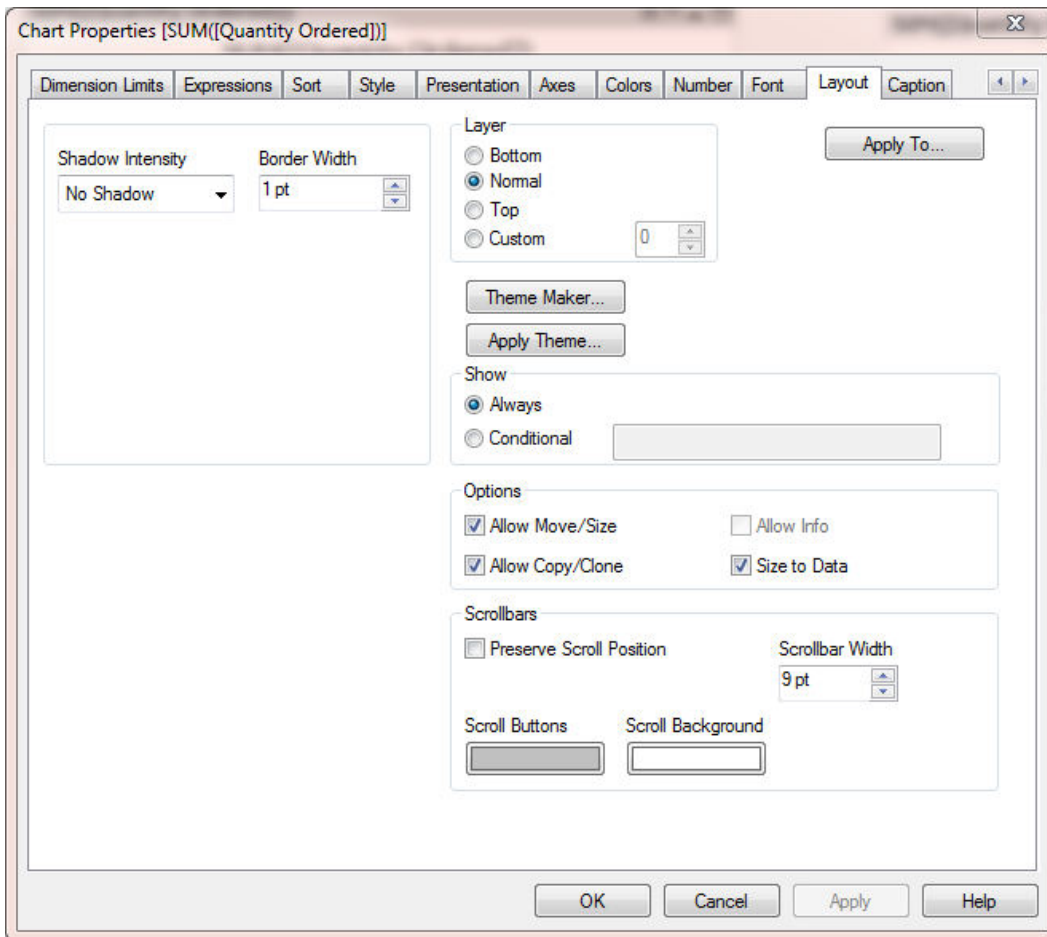

A leased license will expire if has not been updated in 30 days. Updating a leased license is done automatically in the background, provided that QlikView can connect to a QlikView Server where you have a Named Client Access License. It can also be done manually by opening a file on the server.

A screenshot of the QlikView Setup application, specifically the "System" tab and "Documents" sub-tab. The interface includes a left-hand navigation pane with a tree view showing "Management Service", "QlikView Servers", "Directory Service Connectors", "QlikView Web Servers", and "Mail Server". The main area contains several configuration sections: "CPU" with checkboxes for affinity and a "CPU Throttle" field; "Working Set" with "Low" and "High" percentage fields; "Reload Limits" with a "Max Concurrent Reloads" field; "Sessions" with fields for "Maximum Number of Concurrent Sessions", "Maximum Inactive Session Time", "Possible Session Timeout", and "Maximum Total Session Time"; and "Document" with fields for "Object Calculation Time Limit", "Max Symbols in Charts", and a checked "Allow Document Auto Load" checkbox.

A screenshot of the QlikView Properties dialog box, "General" tab. The dialog has a tabbed interface with "General" selected. It features a "Title" field with a file selection button, an "Author" field, a "Save Format" section with a "Compression" dropdown set to "High", and several buttons: "Alert Pop-ups...", "Help Pop-ups...", "Alternate States...", and "Memory Statistics...". On the right side, there is a list of checkboxes: "Use Passive FTP Semantics" (unchecked), "Generate Logfile" (checked), "Timestamp in Logfile Name" (unchecked), "Hide Unavailable Menu Options" (unchecked), "Hide Tabrow" (unchecked), "Keep Unreferenced QVD Buffers" (unchecked), "Legacy Fractile Calculation" (unchecked), "Disable Layout Undo" (unchecked), and "Use WebView in Layout" (unchecked). At the bottom right, there is a "Default Export Encoding" dropdown menu set to "UTF-8".
