Peer A

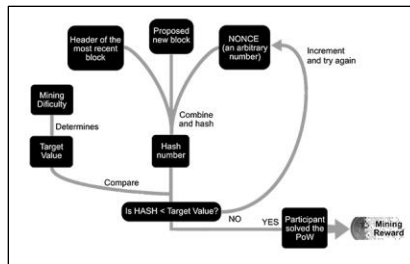

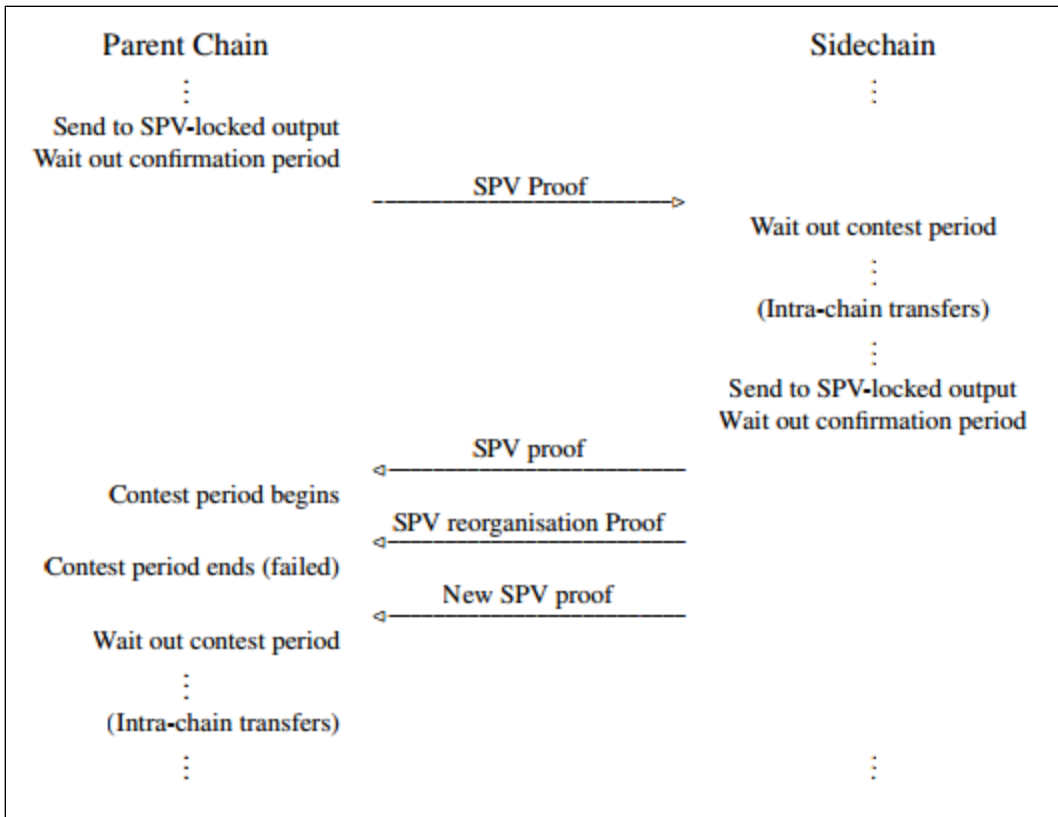

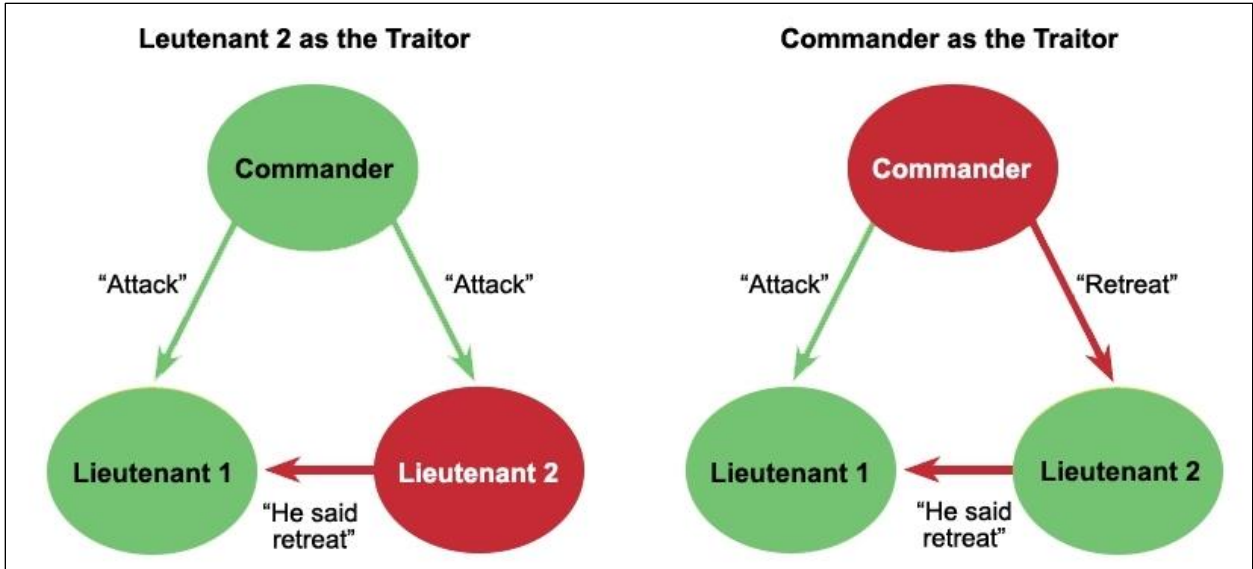

Peer B

Peer C

With proof of work it is a requirement to solve an expensive computer calculation, also called mining, where its first to win

With proof-of-stake, the creator of a new block is chosen in a deterministic way, depending on its wealth, also called stake

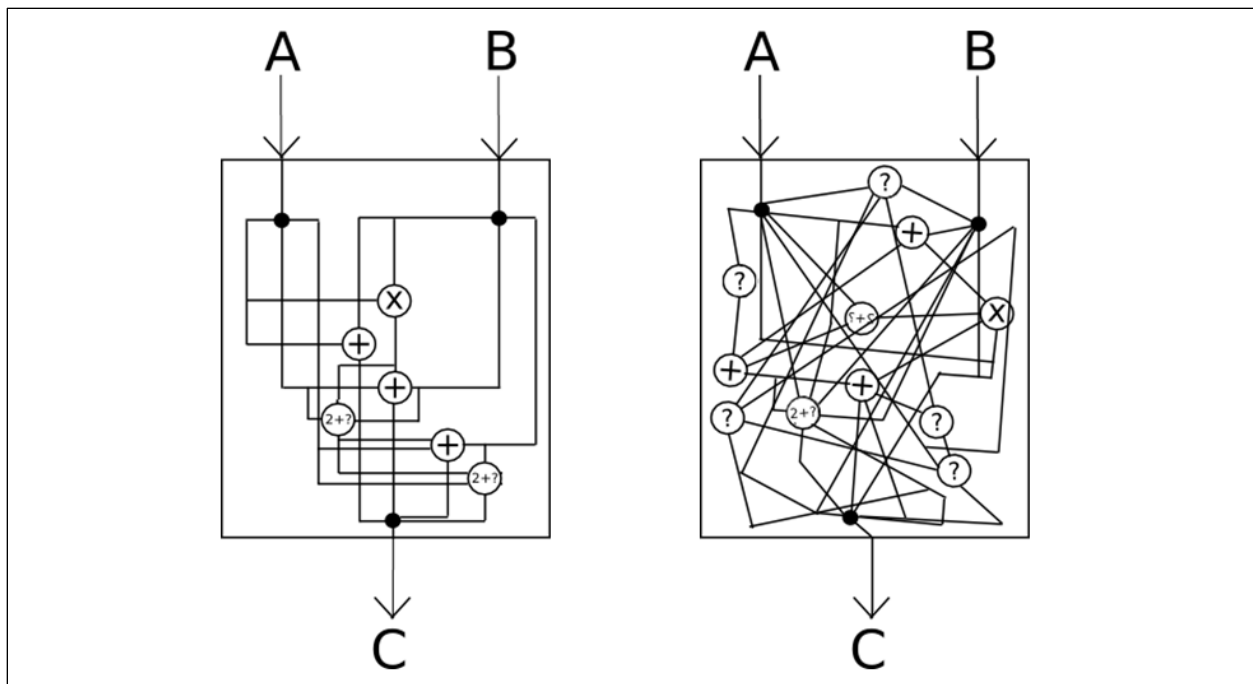

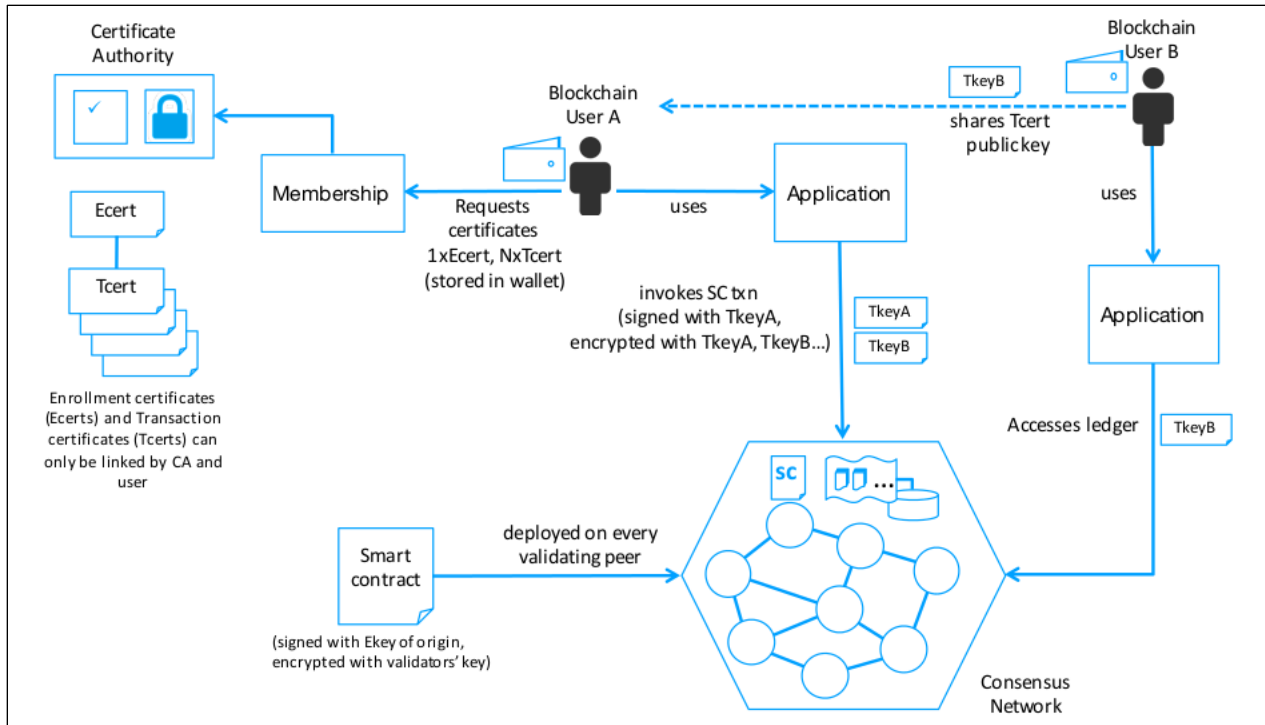

Chapter 5: Blockchain 101 - Security, Privacy, and Smart Contracts

Organization ID ?	Role	MSP ID
AcmeServices	Founder	AcmeServices

Add Organizations ✕

Find and upload certificates for the members you want to add to the network. Each member must export certificates for their instance and give the certificate file to the network founder for upload. You can upload multiple certificates at the same time.

Provide Organization Certificate:

-  EmergencySer...tes.json EmergencyServices −
-  AutoLease_ce...tes.json AutoLease − +

Add

Chaincodes Summary

Filter by Chaincode ID...

Chaincode ID	Version
▶ insurancechain	1

Deploy Chaincode (Advanced)

✓ SUCCESS!
Chaincode installed successfully
You may now continue to instantiate the chaincode to the channel and enable it in REST proxy.

Step 2 of 3: Instantiate This step is optional at this time. You may complete this now or at a later time.

Specify the information required to instantiate the chaincode to the channel and on the peers you specify. After you instantiate the chaincode, the specified peers can deploy and use the chaincode for transactions.

Add Organizations

Find and upload certificates for the members you want to add to the network. Each member must export certificates for their instance and give the certificate file to the network founder for upload. You can upload multiple certificates at the same time.

Provide Organization Certificate:

 USAAutomotiv...tes.json	USAAutomotive	<div style="background-color: #007bff; color: white; width: 20px; height: 20px; border-radius: 50%; display: flex; align-items: center; justify-content: center;">+</div>

Application Development

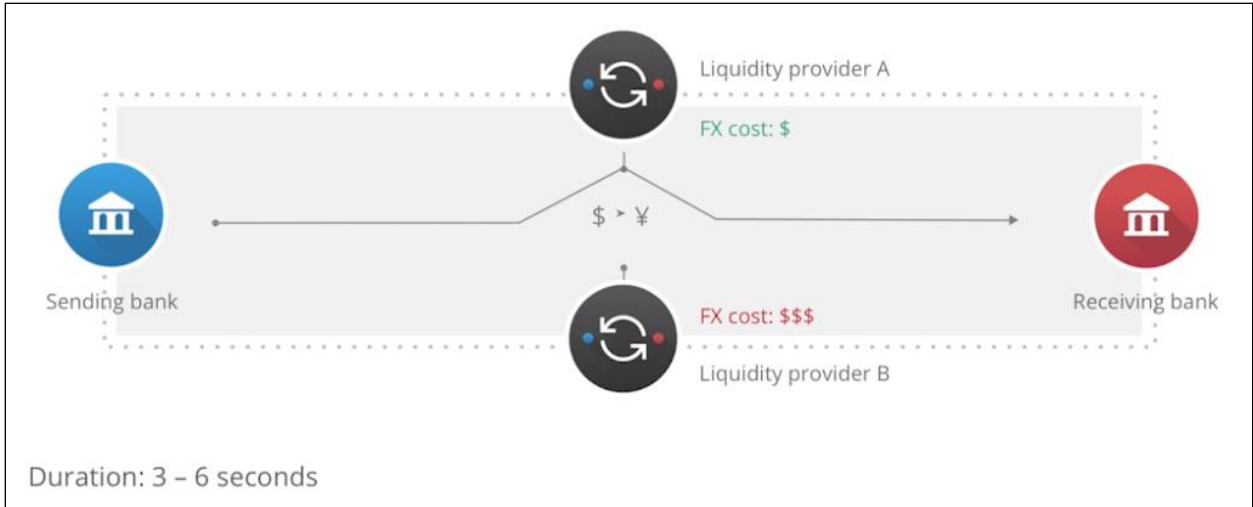

An application leverages OABCS to implement the largest part of your business logic layered on top of the blockchain. For example, an application can initialize and manage the distributed ledger's state through blockchain transactions executed by chaincodes that are endorsed and committed by the network's peers. An application can also dynamically create new channels and install and instantiate new chaincodes.

See the [OABCS documentation for application developers](#).

- **Node.js SDK** - You can install and use the Hyperledger Fabric Node.js SDK. The default grpc module must be rebuilt to connect to OABCS orderers and peers; you can do that manually or you can use the scripts provided here.
[Go to the rebuilding grpc-node module guide.](#)
[Download automation script for Linux and MacOS.](#)
[Download automation script for Windows.](#)
[Go to Hyperledger Fabric SDK documentation.](#)
- **Go SDK** - You can install and use the Hyperledger Fabric Go SDK.
[Go to Hyperledger Fabric SDK documentation.](#)
[Download the Go SDK package.](#)
- **Java SDK** - You can install and use the Hyperledger Fabric Java SDK. The default grpc module must be rebuilt to connect to OABCS orderers and peers; you can do that manually or you can use the already modified package provided here.
[Go to the rebuilding grpc-java package guide.](#)
[Download grpc-netty-1.11.0.jar package.](#)
[Go to Hyperledger Fabric SDK documentation.](#)
- **OABCS** - If you want your applications to interact with the current OABCS instance, you can use the development package, which includes all blockchain configurations and cryptos.
[Download the development package.](#)

MAXIMIZE ASSET UTILIZATION

Empowering you to take control of your supply chain by delivering you full information for managing your physical and financial assets.

Chapter 17: Blockchain Across the Healthcare Industry

INITIAL HEALTH THREAT TARGETS

Worldwide infectious diseases

- Tuberculosis
- Zika
- Malaria
- Dengue
- Chagas

Research and treatments to combat antimicrobial resistance (AMR)

Oncology research and treatments for:

- Pancreatic cancer
- Brain cancer

Virology research and treatments for:

- Hepatitis B & C
- Influenza A & B
- Respiratory Syncytial Virus

Bacteriology research and treatments for:

- Methicillin-resistant Staphylococcus aureus (MRSA)
- Clostridium difficile (C. Diff)

Neurology research and treatments for:

- Alzheimer's disease

Chapter 18: Future Industry and Technology Directions
