

Chapter 1: Introducing Vue

Pen Settings

HTML CSS **JavaScript** Behavior

JavaScript Preprocessor ?

None ▼

Add script as a module ?

Add `type="module"` on the Pen's `<script>` tag

Add External Scripts/Pens ?

Any URLs added here will be added as `<script>`s in order, and run *before* the JavaScript in the editor. You can use the URL of any other Pen and it will include the JavaScript from that Pen.
