Get Certified: Roadmap

GIAC offers over 30 cyber security certifications in security administration, management, legal, audit, forensics and software security. A Certification Roadmap has been created to help you determine what certifications are right for specific job needs or career goals. Each GIAC certification is designed to stand on its own, and represents a certified individual's mastery of a particular set of knowledge and skills. There is no particular "order" in which GIAC certifications must be earned; though we recommend that candidates master lower level concepts before moving on to more advanced topics.

GIAC certifications align with individual job based disciplines and typically correspond to topics presented in SANS full 5-6 day courses. GIAC certification attempts have a 4 month time frame.

Logical Operations would like to recognize and thank the many security professionals who helped make CFR possible. These workshop participants include:

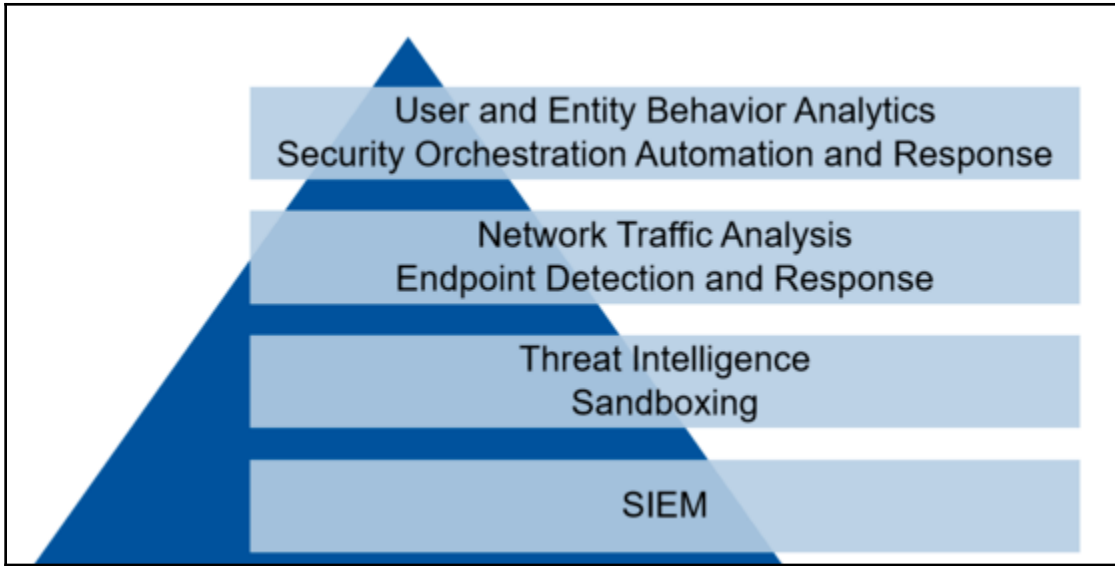

- Dr. Timothy Summers, CEO, Summers & Company
- Dr. Erdal Ozkaya, Cyber security Architect, Microsoft
- Tyler Wrightson, Founder, Leet Systems

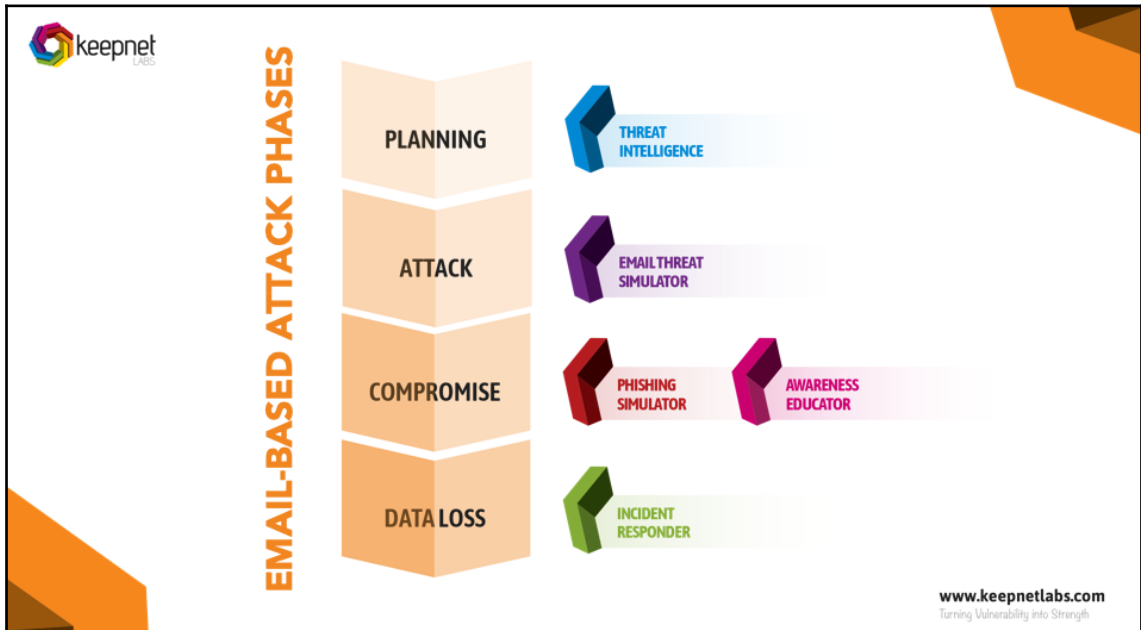

Chapter 10: Security Intelligence Resources

Chapter 11: Expert Opinions on Getting Started with Cybersecurity

Erdal Ozkaya A Conscientious Achiever

Great achievements are not attained by impulse. Achievement is the culmination of many feats, experience, education and acquired knowledge that are all brought together. Erdal Ozkaya, a NSW ATBC member, is a testament to this statement. He has conscientiously studied and passionately worked at his career to enable him to attain some very prestigious awards from Microsoft.

Erdal was born and educated in Germany, however moved to Turkey to complete his University studies to attain his, Bachelor of German Literature. His love of literature and language is apparent by the fact that he can speak four languages: English, Turkish, German and Arabic.

After completing his tertiary education in Turkey, Erdal met his future wife Arzu. Eager to make his mark in the world, Erdal had to confront the fact that his future wife had no desire to move to Germany, so Erdal made the move to Australia. During their courtship Erdal spent many hours on the computer conversing with his future wife, which sparked off his interest in Computers.

Upon arriving in Australia, Erdal immediately enrolled himself into Tertiary courses where he attained his *Diploma of Networking Engineering* and then his *Bachelor of IT support*. Erdal completed these courses whilst working in the field of Information Technology.

Erdal has only been in Australia for nine years. He is a co-founder and Senior Microsoft Instructor at CEO IT Training & Solutions Pty Ltd; one of Australia's Gold certified Microsoft Learning Partners. Erdal travels across Australia teaching IT workshops and has served as Project Manager/Engineer for several large organizations in Australia, China, Philippines and the USA.

Erdal also actively participates in worldwide events as a technical lead and speaker. He was selected "Best Technical Learning Guide" and "Best Speaker" in Microsoft Technical Education Seminars (Tech Ed) Australia. He specializes in Windows 2003, Active Directory, Windows Client O/S's, Security/Exchange, Windows 2008/R2, Sharepoint, Windows 7, EC-Council, ISO 27001.

The passion and commitment that Erdal has shown to his work has been recognized by Microsoft. In 2009 and 2010 Erdal Ozkaya was awarded the Microsoft Most Valuable Professional award.

Recently, in April 2010, Microsoft went one step further and announced Erdal Ozkaya as the **FIRST Microsoft Certified Learning Consultant** in Australia. There are only 16 recipients of this award in the world, with only one recipient in Australia, and that is Erdal Ozkaya.

The 'Microsoft Learning Consultant certification' recognizes trainers who have frequent consultations with their customers. Their role is more that of a technology trainer, they are also

required to diagnose current and desired business performance and design learning solutions to bridge the gap.

To attain this degree of certification from Microsoft is not an easy feat. The technical instructor must have exceptional technical knowledge and have great communicating skills. They must also be passionate about sharing their deep, real-world knowledge about Microsoft technologies with others.

The ATBC would like to congratulate Erdal for attaining certification as a Microsoft Learning Consultant.

If you would like to benefit from Erdal Ozkaya's inexhaustible IT knowledge, you may contact him at CEO IT Training & Solutions. Telephone: 1 300 424 446 or by email: eo2kaya@ceotraining.com.au

Interview with **Erdal Ozkaya**

Erdal Ozkaya is the founder and Senior Microsoft Instructor of CEO IT Training,

Erdal travels across Australia teaching IT workshops and has served as Project Manager/Engineer for several large organisations in Australia, China, Philippines and the USA.

Erdal actively participates in worldwide events as a Technical Lead and Speaker. He was awarded "Best Technical Learning Guide" and "Best Speaker" in Microsoft Technical Education Seminars (TechEd) Australia. He specialises in Active Directory; Windows Client and Server O/S's; Security/Exchange 2007/2010; Sharepoint2007/2010; EC-Council Security and ISO 27001/27002/ 27005.

The passion and commitment that Erdal has shown to his work has been recognized by Microsoft. In 2009, 2010, 2011 Erdal Ozkaya was awarded the Microsoft Most Valuable Professional (Windows Expert -IT Pro) award. Erdal is also a Security Consultant and Certified Ethical Hacker Trainer.

Recently, in April 2010, Microsoft went one step further and announced Erdal Ozkaya as the FIRST Microsoft Certified Learning Consultant in Australia. There are only 16 recipients of this award in the world, with only one recipient in Australia.

Re: Erdal Ozkaya, Most Valuable Professional, windows Expert-IT Pro

To whom it may concern,

It is with great pride we announce that Tim Barrett has been awarded as a Microsoft® Most Valuable Professional (MVP) for 1/1/2015 - 1/1/2016. The Microsoft MVP Award is an annual award that recognizes exceptional technology community leaders worldwide who actively share their high quality, real world expertise with users and Microsoft. All of us at Microsoft recognize and appreciate Tim's extraordinary contributions and want to take this opportunity to share our appreciation with you.

With fewer than 4,000 awardees worldwide, Microsoft MVPs represent a highly select group of experts. MVPs share a deep commitment to community and a willingness to help others. They represent the diversity of today's technical communities. MVPs are present in over 90 countries, spanning more than 30 languages, and over 70 Microsoft technologies. MVPs share a passion for technology, a willingness to help others, and a commitment to community. These are the qualities that make MVPs exceptional community leaders. MVPs' efforts enhance people's lives and contribute to our industry's success in many ways. By sharing their knowledge and experiences, and providing objective feedback, they help people solve problems and discover new capabilities every day. MVPs are technology's best and brightest, and we are honored to welcome Tim as one of them.

To recognize the contributions they make, MVPs from around the world have the opportunity to meet Microsoft executives, network with peers, and position themselves as technical community leaders. This is accomplished through speaking engagements, one on one customer event participation and technical content development. MVPs also receive early access to technology through a variety of programs offered by Microsoft, which keeps them on the cutting edge of the software and hardware industry.

As a recipient of this year's Microsoft MVP award, Tim joins an exceptional group of individuals from around the world who have demonstrated a willingness to reach out, share their technical expertise with others and help individuals maximize their use of technology.

Sincerely,

A handwritten signature in black ink that reads "S. Guggenheimer".

Steven Guggenheimer
Corporate Vice President
Developer Experience & Evangelism
Microsoft Corporation

Don't miss Erdal's update on the current cyber security threat profile

Dear CSU Students,

Join Microsoft Cybersecurity Architect [Dr Erdal Ozkaya](#) tonight to hear about current threats and his fascinating doctorate research.

I first met Erdal back in 2012 when he was Chief Technology Officer for an IT infrastructure design company called Fastlane. Erdal's enthusiasm and vitality was infectious and I couldn't help but suggest he channel it into postgraduate study. Erdal soon went on to enrol in one of our cyber security master degrees, later taught some of the subjects, published several best-selling books on cyber security and just last year graduated from our Doctor of IT. Today Erdal "travels the world helping companies that have been hacked and companies who are about to be hacked".

Agenda

Leading IT security expert, Erdal Ozkaya, now lecturing at Charles Sturt

Congratulations Erdal: KEMP Technologies Australia / New Zealand Regional Director, Erdal Ozkaya, Awarded Microsoft MVP

Apr 3 2013, Written by KEMP Technologies

Here at KEMP we love working with the smartest people, and Erdal Ozkaya is certainly one of those. As if to underline it to us all, he has once again been re-awarded Microsoft Most Valuable Professional (MVP), Windows Expert-IT Pro.

We'd like to extend our huge congratulations to Erdal on receiving this award for the third year in a row. It's a pleasure to have leaders in their field working with us in KEMP.

To find out more about Erdal and his achievements, you should check out his about page.

You can follow Erdal on twitter here: @Erdal_Ozkaya

From Erdal's announcement on his blog:

Re: Erdal Ozkaya, Most Valuable Professional, Windows Expert-IT Pro
To whom it may concern,
It is with great pride we announce that Erdal Ozkaya has been awarded as a Microsoft Most Valuable Professional (MVP) for 4/1/2013 - 4/1/2014. The Microsoft MVP Award is an annual award that recognizes exceptional technology community leaders worldwide who actively share their high quality, real world expertise with users and Microsoft. All of us at Microsoft recognize and appreciate Erdal's extraordinary contributions and want to take this opportunity to share our appreciation with you.
With fewer than 5,000 awardees worldwide, Microsoft MVPs represent a highly select group of experts. MVPs share a deep commitment to community and a willingness to help others. They represent the diversity of today's technical communities. MVPs are present in over 90 countries, spanning more than 30 languages, and over 90 Microsoft technologies. MVPs share a passion for technology, a willingness to help others, and a commitment to community. These are the qualities that make MVPs exceptional community leaders. MVPs' efforts enhance people's lives and contribute to our industry's success in many ways. By sharing their knowledge and experiences, and providing

Using tech for your business

Entrepreneurs can maximize their business through Microsoft technologies such as Server 2012, Office 365 and Windows 8.

Dec 03, 2012 10:00 am

12

2

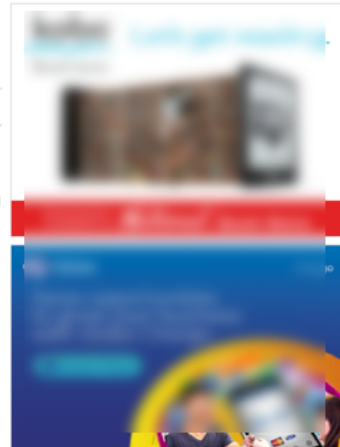

2

Upgrading the technology that runs your business could mean the difference between keeping the status quo and boosting sales. In line with their commitment to empower businesses through technology, Microsoft, together with its Certified Partner for Learning Solutions namely Fast Lane, brought Erdal Ozkaya, one of their top global IT experts to share expertise to existing and potential SME members of Microsoft Philippines Enterprise Partners during an MVP Led Community Event.

Erdal Ozkaya is one of Microsoft's Most Valuable Professionals (MVP) and an expert in several Microsoft products such as Active Directory, and Windows Client and Server. During the forum, Ozkaya shared his knowledge and expertise on the importance for SMEs and local businesses to maximize and enhance their IT infrastructure with Microsoft technologies to help them achieve business growth. He also discussed how Filipino businesses can maximize leading Microsoft technologies such as Server 2012, Office 365 and Windows 8 to accelerate the achievement of their business goals through enhancing their computing and IT ecosystem.

Server 2012 and Office 365, along with the recently launched Windows 8, are part of Microsoft's efforts to make technology affordable and available to more businesses and individuals to help strengthen their productivity and efficiency.

IT Security Guru, Erdal Ozkaya Joins emt

 12 February, 2015  Comment Off  4 Views

emt Distribution, the specialty IT security products distributor announced the expansion of its team with the appointment of Erdal Ozkaya as Chief Information Security Officer (CISO).

Erdal is an IT Security Guru with business development and management skills, and is armed with world class qualifications, such as Master of Information Systems Security (M.I.S), Bachelor of Information Technology (B.I.T.), MVP, Microsoft Certified Trainer, Microsoft Certified Learning Consultant, ISO27001 Consultant, Certified Ethical Hacker (CEH), Certified Ethical Instructor, and Licenced Penetration Tester. He is also completing his Doctor of Philosophy (Ph.D.) in IT Security.

He is also a globally recognised award winning speaker and technical expert and has been part of several major conferences such as; Microsoft TechEd, Hacker Halted, Microsoft Management Summit, AusCERT, trade shows and have featured in webcasts for Microsoft and EC-Council and many other vendors. He was awarded "Best Speaker" in TechEd Australia and won the "Circle of Excellence Award" from EC Council. His proven success deployments especially in the areas of Microsoft workloads in real life has become subject to IT magazines across Australia and New Zealand.

03 KHALID LABAN
CEO, Oryzon
Stability is a major factor when it comes to security and Laban certainly provided that for VSI Oryzon. He has made growing the channel a priority for the company and remains committed to improving pre- and post-sales infrastructure for resellers targeting the mobile security solutions space.

04 IHAB MOWAD
VP, Trend Micro MEA
The competitiveness of the security software market makes it imperative for antivirus vendors to have a person who knows what makes partners tick. Mowad fits into that category and since taking on this role, he has used his knowledge of the channel to ensure partners are well served in MEA.

01 MAYA ZAKHOUR
Channel Director, Fortinet
Zakhour has masterminded some pretty significant changes during her first full year in this role, which has seen her run the partner network of one of the region's largest security appliance vendors. This includes the transferring of core services business into the hands of partners and a mix of the FortiPartner Programme and introduced new certifications and solutions to enable partners to increase expertise and specialise their sales. Zakhour and her channel team will be keen to improve the experience of partner training and certification.

05 GRAHAM PORTER
Regional Channel Manager, NetApp Middle East
Porter looks after NetApp's partnership activities in the Middle East, making him a key channel figure in the storage market. The vendor operates a focused, channel partner ecosystem in the region, which requires dedicated management to ensure solution providers are reaching enough support.

06 MOHAMED MENAKBI
Channel Sales Director, Middle East, Fujitsu
The increased attention that Fujitsu has given to partner engagement has led it to gain a real foothold in the enterprise storage market. Having previously led Fujitsu's storage business as EMEA, Menakbi knows the steps that partners need to take to get off to a good start in IT solutions.

07 SEBASTIAN PAVIC
Regional Sales Director, MEA, Genesys
Genesys has ramped up its MEA business ever since it acquired Sub-Net last year and that has led to a really strong focus on the channel. Not only is Pavic the channel face, he has played a pivotal role in shaping the vendor's regional partner strategy.

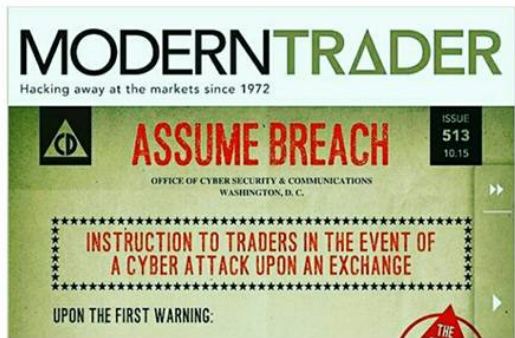

08 FADY ISKANDER
Channel & Commercial Regional Manager, Symantec
It remains to be seen how much will change for Symantec over the next year. Veritas is done, but for now it is business as usual. Iskander has a wealth of experience when it comes to the channel having previously worked for Citrix and Pivotal, and he is now using that to Symantec's benefit.

09 NIDAL OTHMAN
Managing Director, StartLink
StartLink is the go-to-market for a host of mobile security vendors in MEA, providing the specialist VMD an influential channel presence. Othman has overseen its geographical expansion, but more critically helped build a business based on having a channel with strong technical competence.

10 RAVINDER JANOTRA
Regional Manager, Cybercom
As the regional lead, Janotra has helped Cybercom further its lead in the Middle East IT security space, continuing to be market share. Janotra has been using his extensive industry experience to promote Cybercom's benefits of solutions to the channel.

Next is Erdal Ozkaya, the chief information security officer and vice president of emt Distribution, based in Dubai. A prolific speaker and security specialist, it's clear why his presentations are popular in the cyber community. His language and personality are supercharged when discussing security. Each answer comes as if it's been shot out of an electric socket.

"The first thing that comes to mind when these events happen is that it's a cyber attack from China," says Ozkaya.

Viva Bahrain eyes Microsoft cloud computing platform

MANAMA, 4 days ago

Viva Bahrain is in advanced stages of negotiation with Microsoft for the latter's cloud computing platform - Azure for business, it has emerged.

A statement issued by Microsoft quoted Viva Bahrain director for technology strategy and control Dushko Kantardjiev as saying that the telecom operator was exploring a handful of services and enablers that would benefit its business, both in terms of support and cost, said a report in the *Gulf Daily News (GDN)*, our sister publication.

Participants at the summit

"Microsoft Azure is a very viable and feasible option for VIVA and for businesses in general as it offers flexibility, security, reliability and fast time to market," Kantardjiev said.

The statement was issued after the conclusion of Microsoft's first Azure Summit in Bahrain. Organised in collaboration with EMT Distribution, the Microsoft Azure Summit roadshow kicked off in the UAE and is touring the GCC countries with Kuwait being the next stop.

IT security guru Erdal Ozkaya addressed the audience in Bahrain and spoke about the cloud and Microsoft Azure, different security aspects and customer concerns.

"Microsoft is taking important milestones to show customers that they care about security and about the data hosted on their cloud as part of their aim to provide customers the best experience regardless of the platform they are using," Ozkaya said.

Microsoft says Azure is a growing collection of integrated computing services for storage, data, networking and an application that helps businesses move faster, do more, and save money. - **TradeArabia News Service**

Microsoft, ISSAN collaborate to raise cyber security awareness

Microsoft Nigeria has called on individuals and organisations to pay needed attention to ensuring cyber security in the face of global cyber threats.

This call was made at a Cyber Security Roundtable organised by Microsoft in collaboration with Information Security Society of Africa Nigeria (ISSAN) at Eko Hotel and Suites, Lagos.

Dr. Abdul Kader, president of Information Security Society of Africa Nigeria (ISSAN) noted that Nigeria has been declared as cyber security month all over the world, to engage with awareness in order to raise cyber security awareness.

Intelligent security is key to fight sophisticated threats

NEWS, SECURITY

ADELLE GERONIMO
6 DAYS AGO

Intelligent security is increasingly becoming vital as GCC CISOs continue to battle against increasingly sophisticated threats, according to experts.

Erdal Ozkaya, Cybersecurity Architect at Microsoft, said, "An alarming number of regional organisations are still using outdated strategies and authentication models, even as international headlines continue to illustrate the intensity of the ongoing battles against bad actors."

Ozkaya made these remarks during Microsoft's most recent CISO Executive Series, where industry experts and Chief Information Security Officers gathered to share and discuss current trends in cybersecurity.

Chapter 12: How to Get Hired in Cybersecurity, Regardless of Your Background

Skills Gap

Too Many Threats

- \$1 BILLION:** PERSONALLY IDENTIFIABLE INFORMATION (PII) RECORDS STOLEN IN 2014¹
- 97%** BELIEVE APTs REPRESENT CREDIBLE THREAT TO NATIONAL SECURITY AND ECONOMIC STABILITY²
- MORE THAN 1 IN 4** ORGANIZATIONS HAVE EXPERIENCED AN APT ATTACK³
- \$150 MILLION:** AVERAGE COST OF A DATA BREACH BY 2020⁴
- 1 IN 2** BELIEVE THE IT DEPARTMENT IS UNAWARE OF ALL OF ORGANIZATION'S INTERNET OF THINGS (IOT) DEVICES⁵
- 74%** BELIEVE LIKELIHOOD OF ORGANIZATION BEING HACKED THROUGH IOT DEVICES IS HIGH OR MEDIUM⁶

Too Few Professionals

- 2 MILLION:** GLOBAL SHORTAGE OF CYBERSECURITY PROFESSIONALS BY 2019⁷
- 3X** RATE OF CYBERSECURITY JOB GROWTH VS. IT JOBS OVERALL, 2010-14⁸
- 84%** ORGANIZATIONS BELIEVE HALF OR FEWER OF APPLICANTS FOR OPEN SECURITY JOBS ARE QUALIFIED⁹
- 53%** OF ORGANIZATIONS EXPERIENCE DELAYS AS LONG AS 6 MONTHS TO FIND QUALIFIED SECURITY CANDIDATES¹⁰
- 77% OF WOMEN** SAID THAT NO HIGH SCHOOL TEACHER OR GUIDANCE COUNSELOR MENTIONED CYBERSECURITY AS CAREER. FOR MEN, IT IS 67%.¹¹
- 89% OF U.S.** CONSUMERS BELIEVE IT IS IMPORTANT FOR ORGANIZATIONS TO HAVE CYBERSECURITY-CERTIFIED EMPLOYEES.^{12,13}

Cyberattacks are growing, but the talent pool of defenders is not keeping pace. Although attacks are growing in frequency and sophistication, the availability of sufficiently skilled cybersecurity professionals is falling behind. Cybersecurity Nexus (CSX) is addressing this gap by creating a skilled global cybersecurity workforce. From the Cybersecurity Fundamentals Certificate for university students to CSXP, the first vendor-neutral, performance-based cybersecurity certification, CSX is attracting and enabling cybersecurity professionals at every stage of their careers.

Learn = Apply

Learn the cyber hygiene methodology for workforce development and acquiring talent

Implement the 3 and 6 month plan

How to Obtain Talent in 60 Days

- Identify common language projects and tasks for the role
- Identify amount of time individual will spend on each task and project
- Identify correct salary for desired role
- Understand and share need and growth strategy of this role with perspective candidates
- Have a quick and efficient interview process
- Expect applicant is passive and has many people courting them.
- Make offers quickly

Security Engineer
 Security Services
 Santa Clara, California Apply Now

Responsibilities

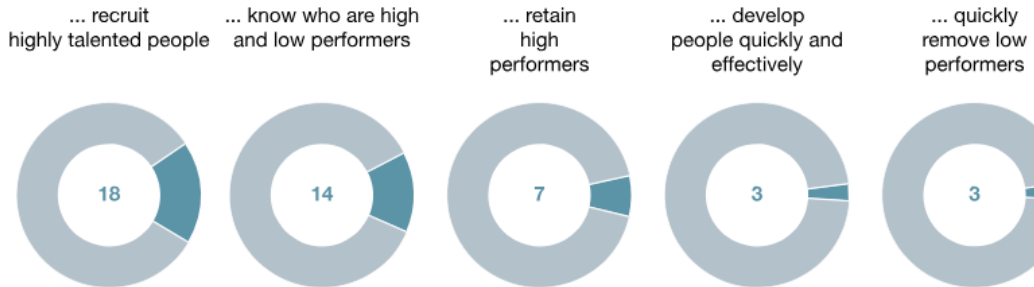

- 40% Performing incident detection involving endpoint incidents, network incidents and system/network anomalies
- 40% Responding to network-based attacks including denial of service, web application attacks, phishing, attacks to networking equipment and attacks to cloud infrastructure
- 20% Conducting incident response actions involving corporate misuse and/or litigation actions including data acquisition, preservation notices, litigation holds and e-discovery items

Tools and Environments

- Web servers: Linux and Windows
- Cloud resident services: AWS, ServiceNow, Splunk
- Operating Systems: Linux, MacOS and Windows
- Endpoint Security Products: Tanium

A whopping 82 percent of Fortune 500 executives don't believe that their companies recruit highly talented people.

% of Fortune 500 executives who agree that their organizations ...
