

## Chapter 1: Augment Your World

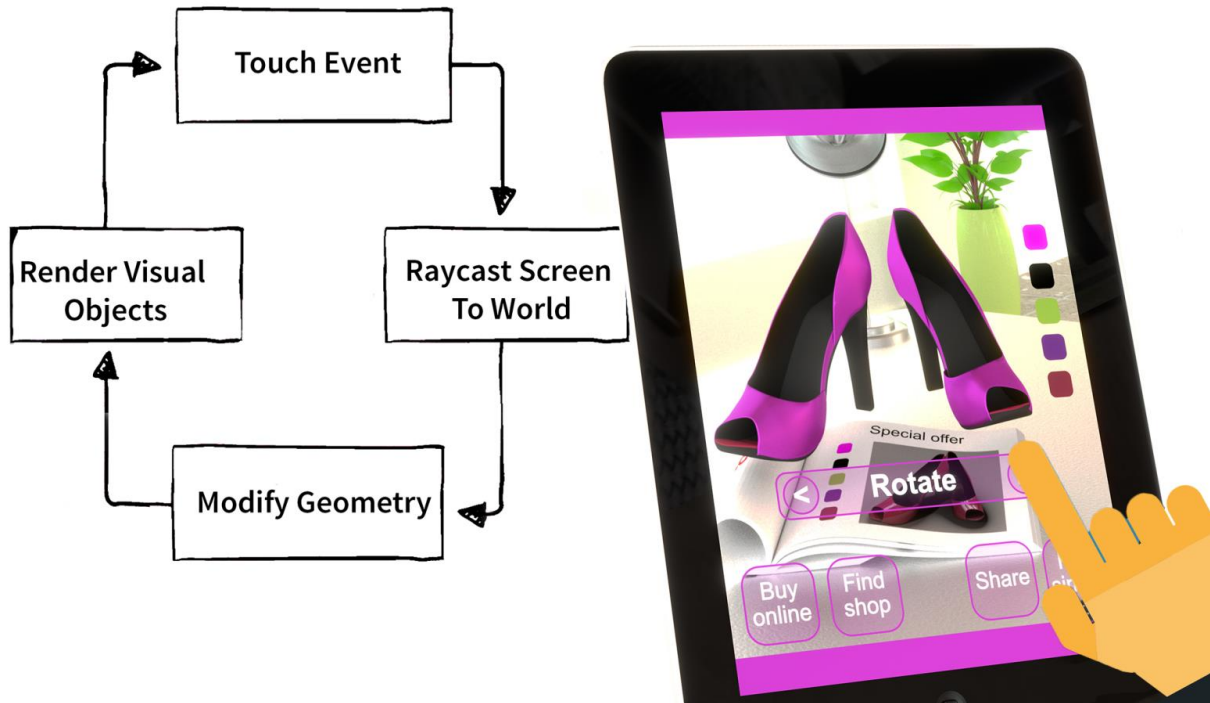

## Handheld mobile video see-through (Monocular)

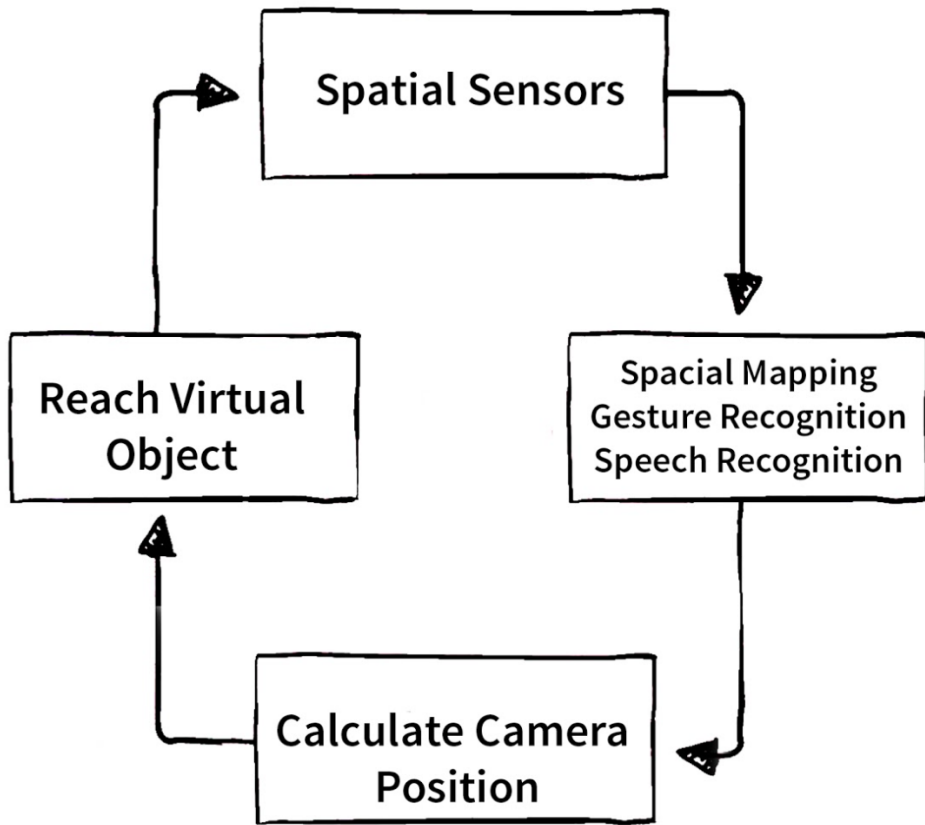

# Wearable near-eye optical see-through

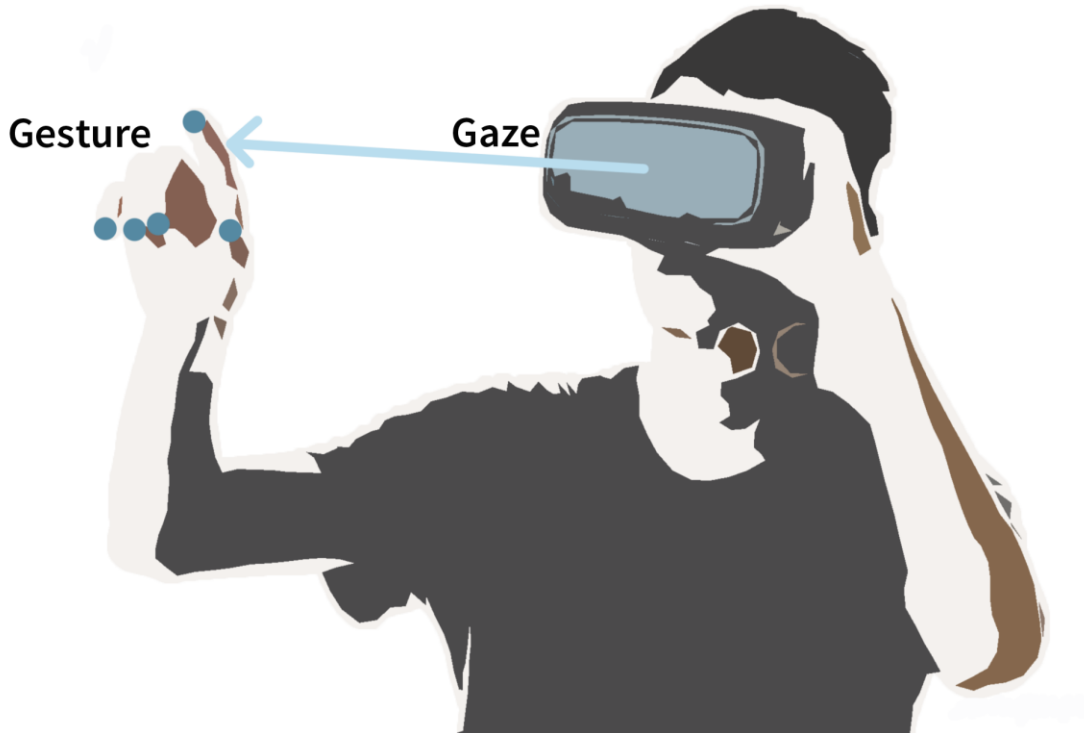

## Input Interact

**Hiro**

Multi Targets: Flakes Box

Vuforia™

**Instructions**

The folded box should look like this completed box.

1. Print this page onto an A3 or Tabloid size 200-250g cardboard paper with 'Fit to Page' option.
2. Cut along the outer strong lines.
3. Fold the box along the dashed lines.
4. Glue the marked areas with instant paper glue.

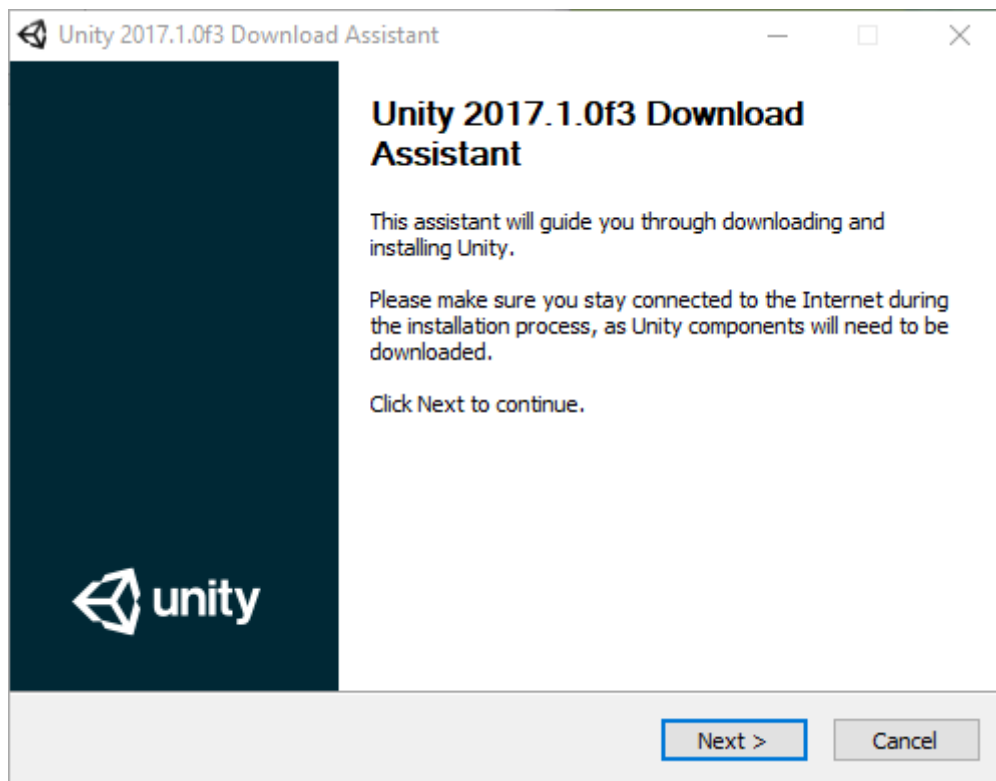

**Ideally, you'd see this.**

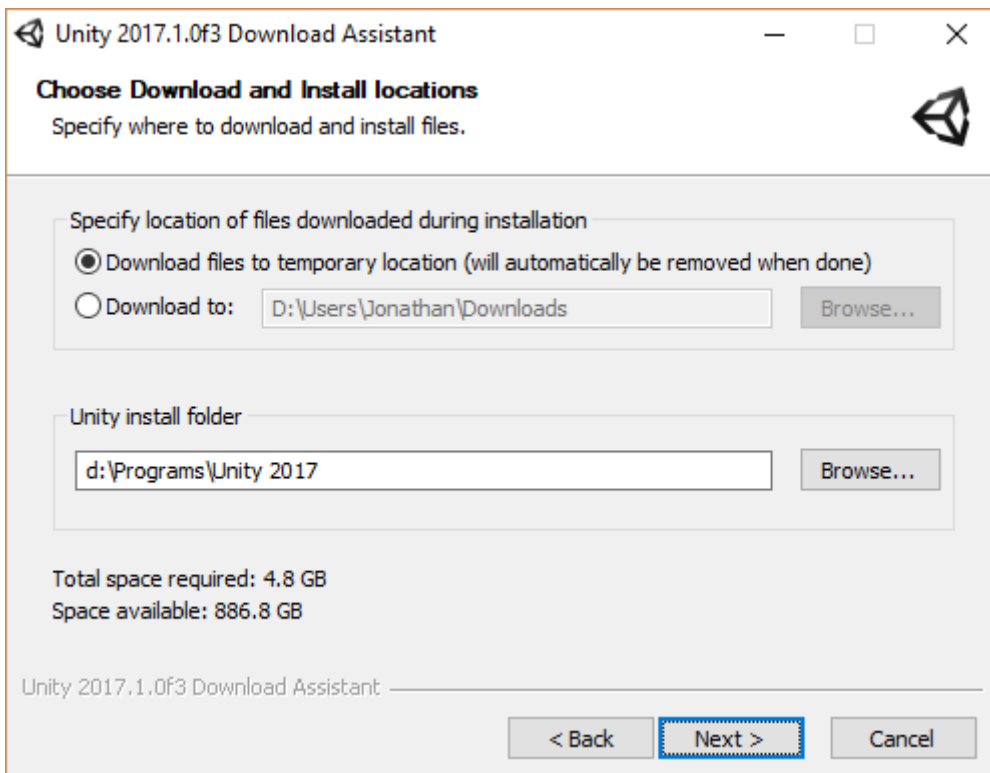

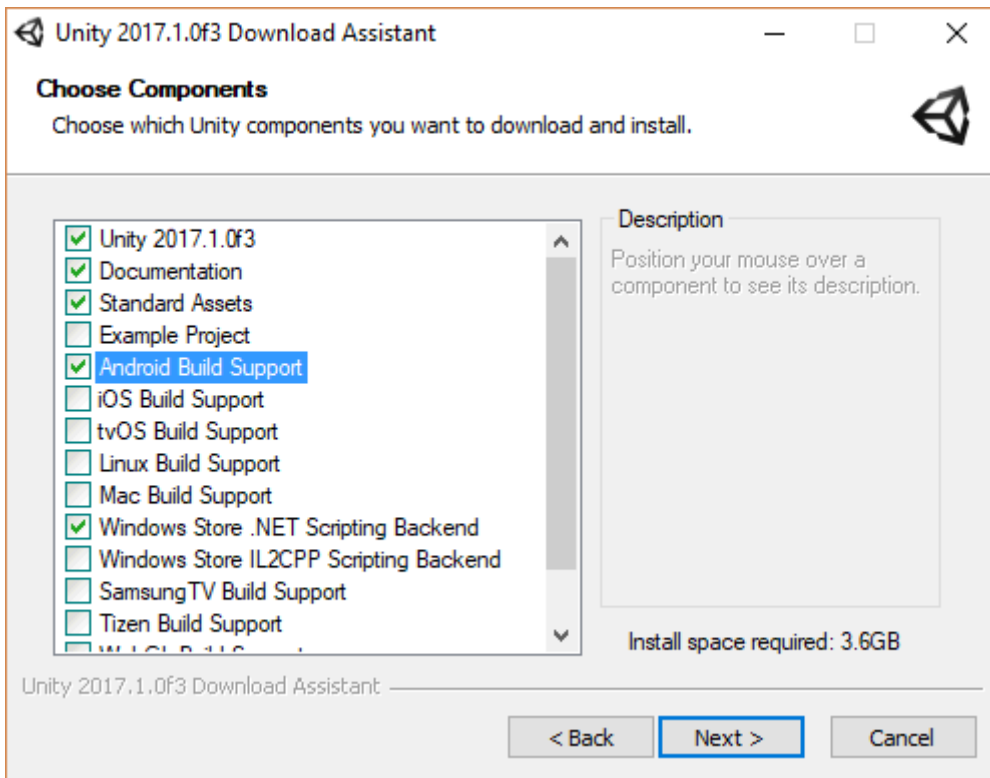

**Tilt your head down and you'll see this instead.**

# Android Studio

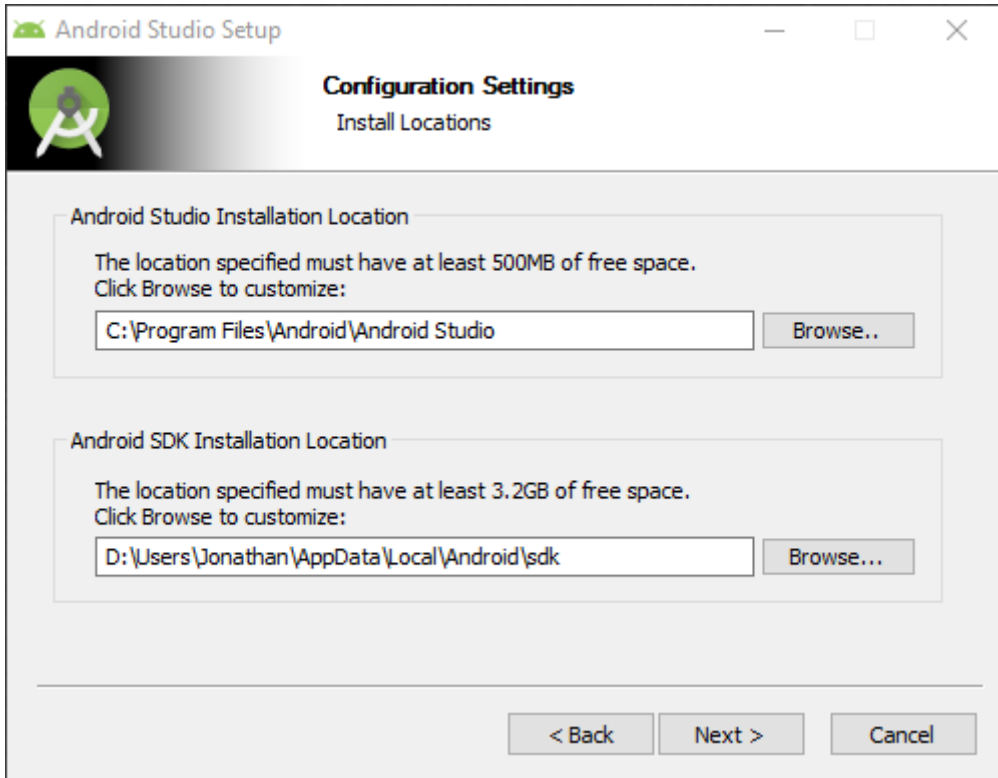

## The Official IDE for Android

Android Studio provides the fastest tools for building apps on every type of Android device.

World-class code editing, debugging, performance tooling, a flexible build system, and an instant build/deploy system all allow you to focus on building unique and high quality apps.

**DOWNLOAD ANDROID STUDIO**  
2.3 FOR WINDOWS (1,848 MB)

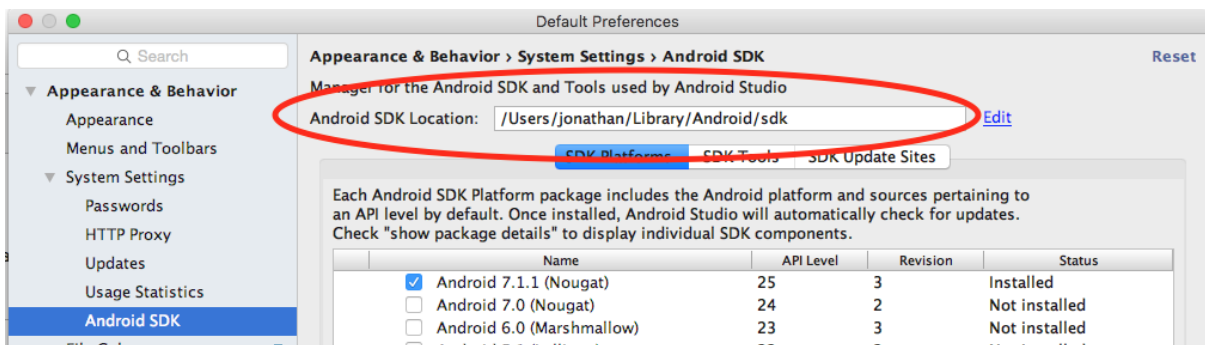

### Get just the command line tools

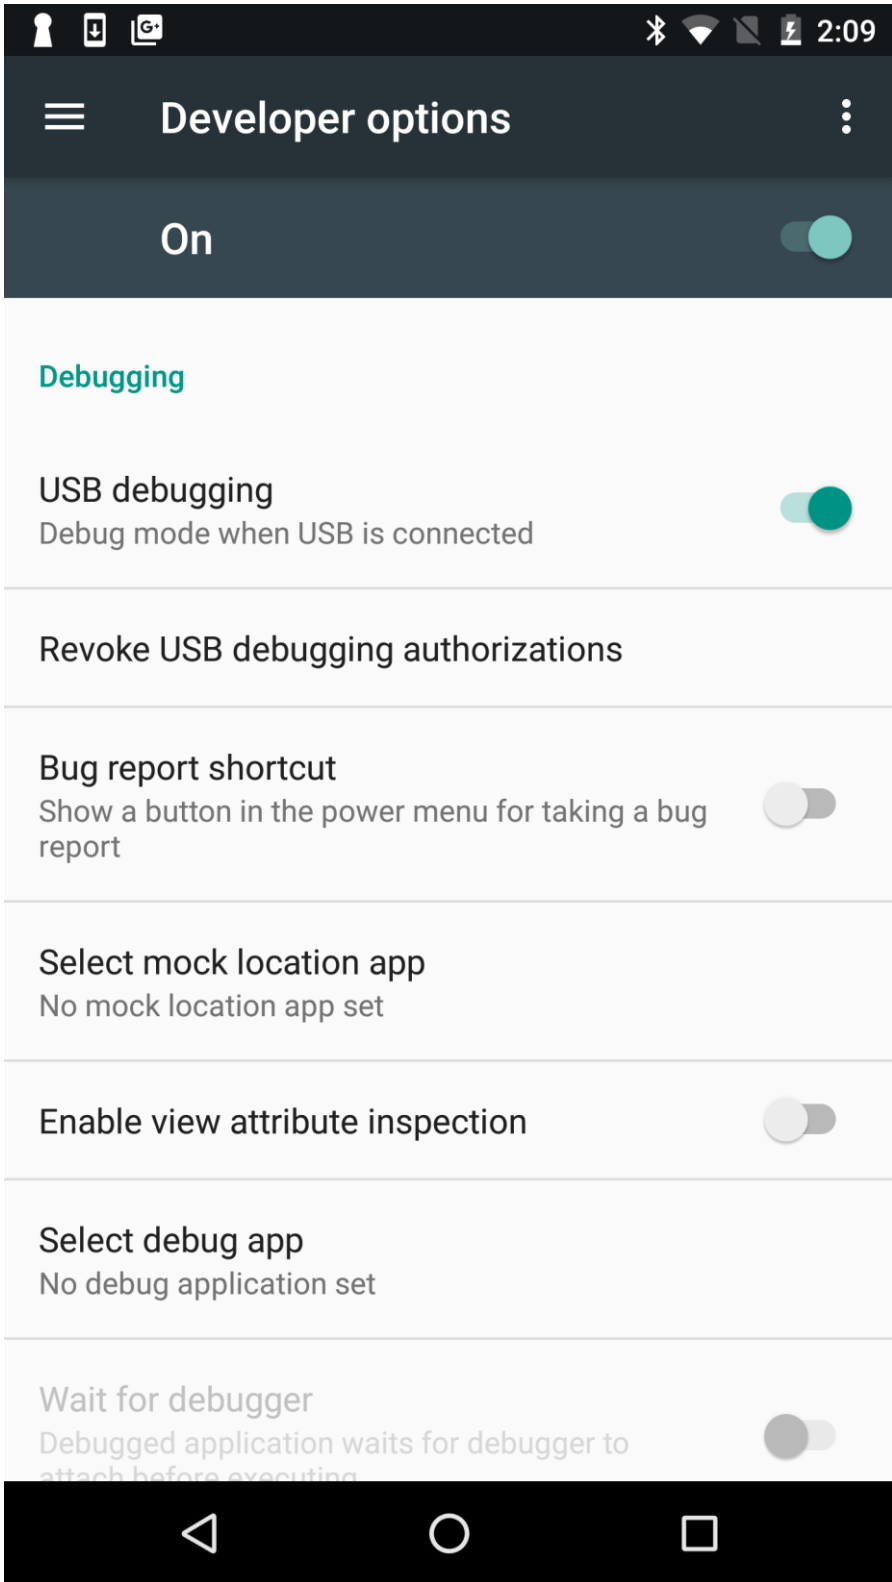

If you do not need Android Studio, you can download the basic Android command line tools below. You can use the included [sdkmanager](#) to download other SDK packages.

These tools are included in Android Studio.

Platform	SDK tools package	Size	SHA-1 checksum
Windows	<a href="#">tools_r25.2.3-windows.zip</a>	292 MB (306,745,639 bytes)	b965decb234ed793eb9574bad8791c50ca574173
Mac	<a href="#">tools_r25.2.3-macosx.zip</a>	191 MB (200,496,727 bytes)	0e88c0bdb8f8ee85cce248580173e033a1bbc9cb
Linux	<a href="#">tools_r25.2.3-linux.zip</a>	264 MB (277,861,433 bytes)	aafe7f28ac51549784efc2f3bdfc620be8a08213

## wikiHow to Change a Tire Expert Reviewed

Community Q&A

Have you ever been stuck on the side of the road with a flat tire? Do you want to be able to change a tire without having to ask for help? Fortunately, changing a tire is a pretty simple task, provided you're prepared and willing to exert a little effort.

3		1 Find a flat, stable and safe place to change your tire.	You should have a solid, level surface that will restrict the car from rolling. If you are near a road, park as far from traffic as possible and turn on your emergency flashers (hazard lights). Avoid soft ground and hills.	step1		
4		2 Apply the parking brake and put car into "Park" position.	If you have a standard transmission, put your vehicle in first or reverse.		step2-video	
5		3 Block other tires	Place a heavy object (e.g., rock, concrete, spare wheel, etc.) in front of the front and back tires.		step3-video	

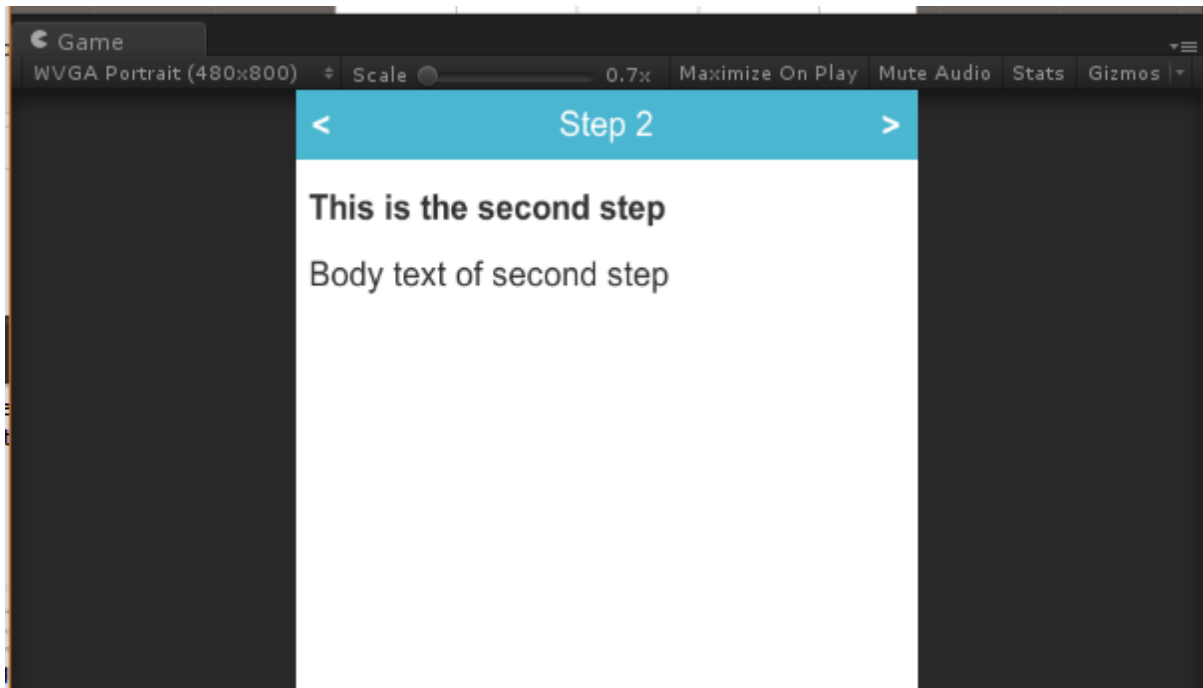

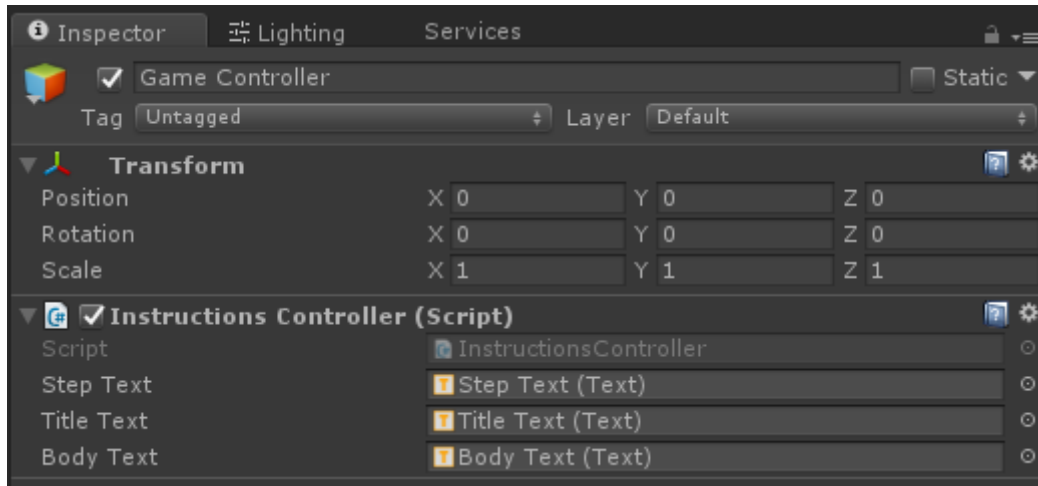

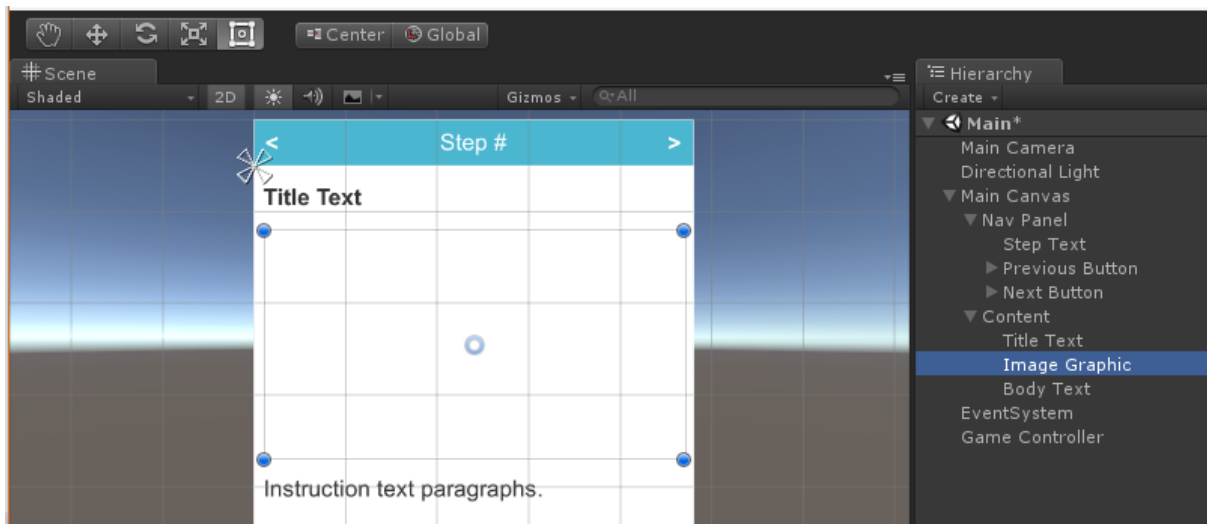

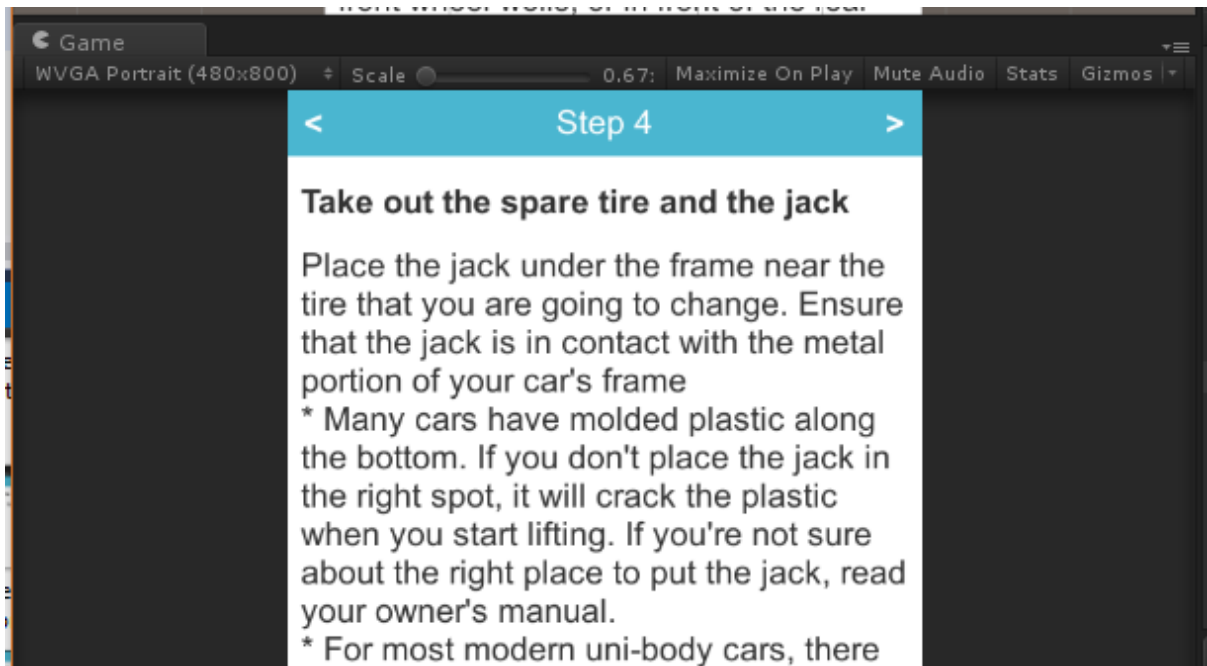

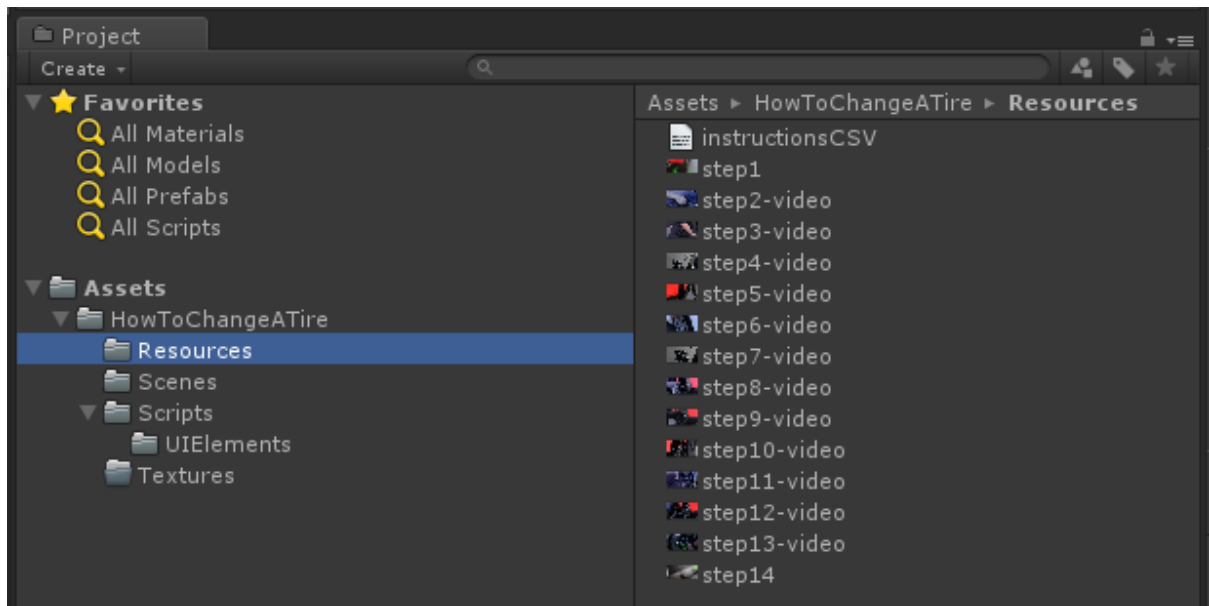

< Step: 1 >

**Find a flat, stable and safe place to change your tire.**

You should have a solid, level surface that will restrict the car from rolling. If you are near a road, park as far from traffic as possible and turn on your emergency flashers (hazard lights). Avoid soft ground and hills.

Step: 4

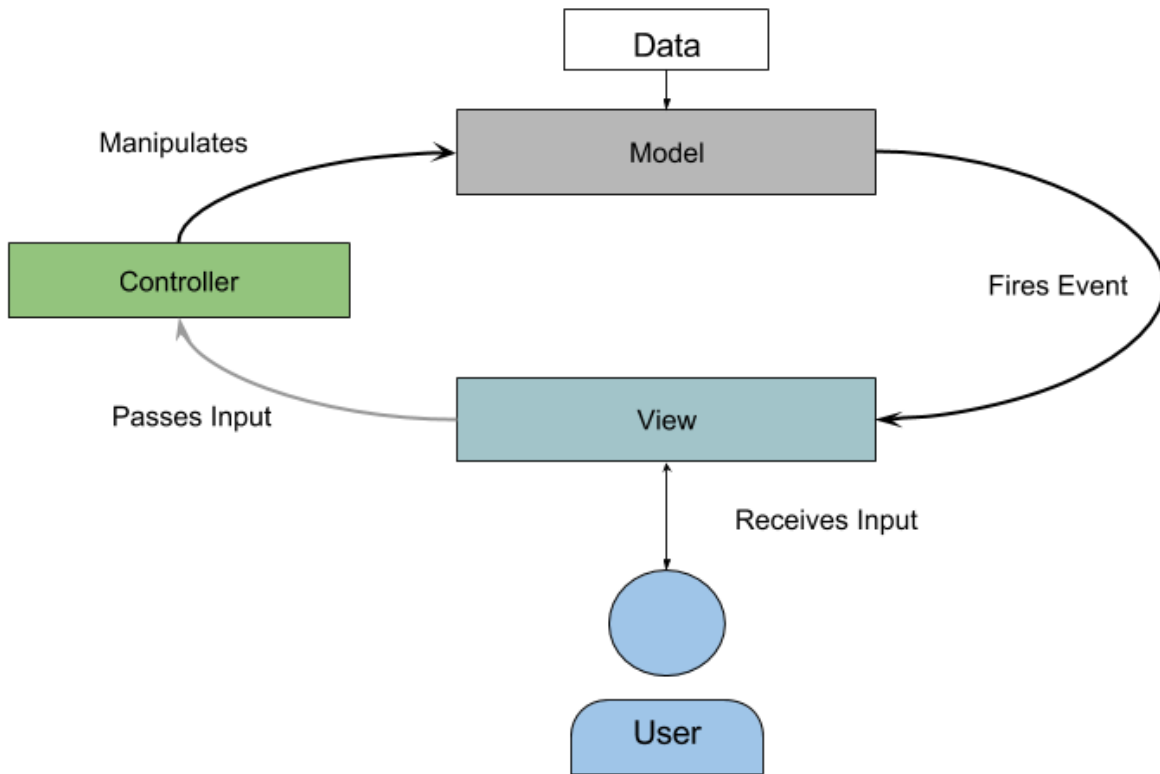

### Take out the spare tire and the jack

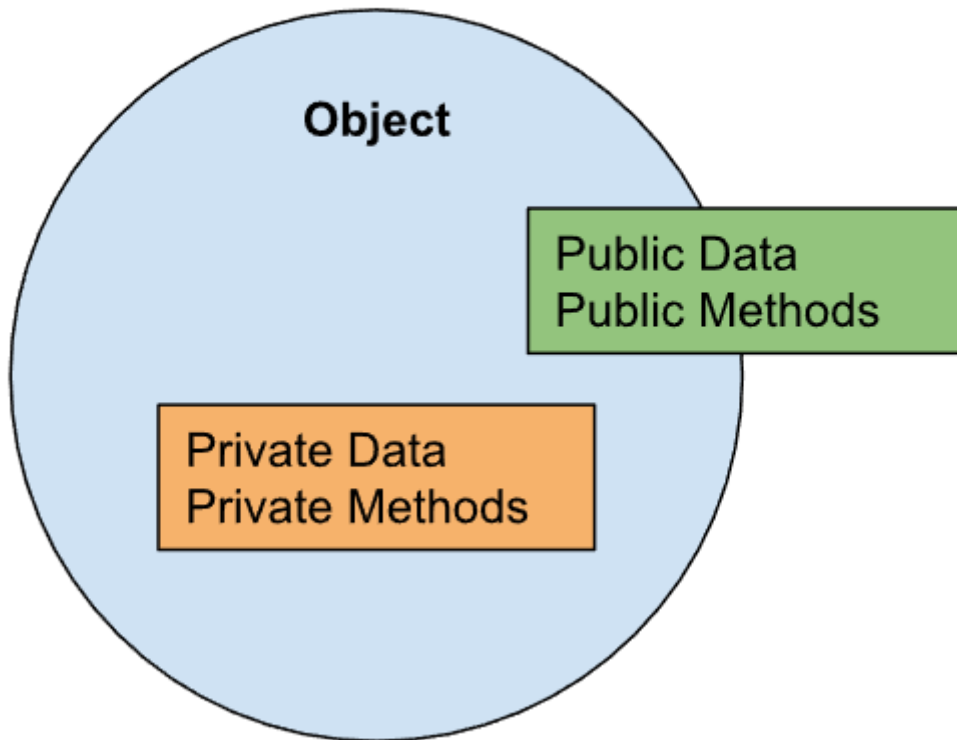

Place the jack under the frame near the tire that you are going to change. Ensure that the jack is in contact with the metal portion of your car's frame  
\* Many cars have molded plastic along the bottom. If you don't place the jack in the right spot, it will crack the plastic when you start lifting. If you're not sure about the right place to put the jack, read your owner's manual

**Remove the hubcap and  
loosen the nuts**

Remove the hubcap and  
loosen the nuts by turning  
counterclockwise. Don't  
take them all the way off;  
just break the resistance.  
By keeping the wheel on  
the ground when you first  
loosen the nuts, you'll  
make sure that you're  
turning the nuts instead of  
the wheel.

• Use the wrench that  
came with your car or a  
standard cross wrench.  
Your wrench may have  
different sizes of openings  
on different ends. A  
correctly-sized wrench will  
slip easily over the nut, but  
will not rattle.

• Try to prepare for any  
unforeseen tire changes  
by keeping the exact  
socket size for your lug  
nuts as well as a breaker  
bar handy in the trunk.  
• It can take quite a lot of  
force to break your lug  
nuts free. If all else fails,  
you can use your body  
weight or stomp on the  
wrench (be absolutely  
certain you are turning it  
the correct way.)
