This is an example page. It’s different from a blog post because it will stay in one place and will show up in your site navigation (in most themes). Most people start with an About page that introduces them to potential site visitors. It might say something like this:

Hi there! I’m a bike messenger by day, aspiring actor by night. This is my blog. I live in Los Angeles, have a great dog named Jack, and I like pizza. (And gettin’ caught in the rain.)

...or something like this:

The XYZ Doohickey Company was founded in 1971, and has been providing quality doohickeys to the public ever since. Located in Gotham City, XYZ employs over 2,000 people and does all kinds of awesome things for the Gotham community.

As a new WordPress user, you should go to your dashboard to delete this page and create new pages for your content. Have fun!

Chapter 11: Compiling Less Real Time for Development Using Grunt

```plaintext
#site-navigation {
    background-color: #F2BF72;
}
ul.nav-menu {
    .current_page_item a {
        color: darkblue;
    }
}
```

Directory Structure:
```
app
  dev
    css
      index.html
    less
      app.less
  node_modules
  package.json
```
Base

This is a simple Base CSS

H1 type headers

```html
<div class="h1">H1 type headers</div>
```

The server is running successfully!
