Nagios® Core™

Nagios® Core™
Version 4.0.0
September 20, 2013
Check for updates

Get Started

- Start monitoring your infrastructure
- Change the look and feel of Nagios
- Extend Nagios with hundreds of addons
- Get support
- Get training
- Get certified

Don't Miss...

- Improve your Nagios skillset with self-paced and instructor led training services.
- Monitor business processes with the new Nagios BPI addon...
- Try the new Nagios V-Shell interface

Quick Links

- Nagios Library (tutorials and docs)
- Nagios Labs (development blog)
- Nagios Exchange (plugins and addons)
- Nagios Support (tech support)
- Nagios.com (company)
- Nagios.org (project)

 Logged in as nagiosadmin

You are requesting to schedule downtime for a particular service

Command Options

Host Name: localhost
Service: HTTP
Author (Your Name): Nagios Admin
Comment: Required maintenance of web service
 Triggered By: N/A
Start Time: 02-25-2016 17:17:08
End Time: 02-25-2016 19:17:08
 Type: Fixed
 If Flexible, Duration: 2 Hours 0 Minutes

Command Description

This command is used to schedule downtime for a particular service. During the specified downtime, Nagios will not send notifications out about the service. When the scheduled downtime expires, Nagios will send out notifications for this service as it normally would. Scheduled downtimes are preserved across program shutdowns and restarts. Both the start and end times should be specified in the following format: `mmddyyyy hh:mm:ss`. If you select the *fixed* option, the downtime will be in effect between the start and end times you specify. If you do not select the *fixed* option, Nagios will treat this as "flexible" downtime. Flexible downtime starts when the service enters a non-OK state (sometime between the start and end times you specified) and lasts as long as the duration of time you enter. The duration fields do not apply for fixed downtime.

Please enter all required information before committing the command. Required fields are marked in red. Failure to supply all required values will result in an error.

Chapter 05: Using Additional Web Interfaces

The screenshot displays the Nagios Instance Overview dashboard. At the top, it identifies the instance as 'NAGCHECKER' and 'Nagios Instance'. The main heading is 'instance overview' with the Nagios logo. Below this is a 'HOSTS AND SERVICES SUMMARY' section. A white box contains the following data: 'NAGIOS INSTANCE (GENERIC)', 'HOSTS DOWN: 0', 'HOSTS OK: 81', 'Service Criticals: 3' (highlighted in red), 'Service Warnings: 6' (highlighted in yellow), 'Services OK: 277', and 'Current status: RED' (highlighted in red). At the bottom of the dashboard, it shows 'LAST UPDATE: 05.11.2014, 22:39:38' and three circular icons: a refresh icon, a bidirectional arrow icon, and a settings gear icon.
