The image displays three visualizations of a horizontal layout group, each with its corresponding property panel. The visualizations show five black rectangular cells arranged horizontally. The first visualization has no padding. The second visualization has a light gray border around the entire group and 30 units of padding on all sides. The third visualization has a light gray border on the left and bottom sides and 30 units of padding on all sides.

 Parent has a type of layout group component. A child of a layout group should not have a Aspect Ratio Fitter component, since it should be driven by the layout group.

The image shows a software interface window titled "Inspector" with a sub-header "BungeeShade-Regular Import Settings". The window contains several configuration options:

- Font Size: 16
- Rendering Mode: Smooth
- Character: Dynamic
- Ascent Calculation Mode: Face ascender metric
- Incl. Font Data:
- Font Names: Bungee Shade

Below these settings is a section titled "References to other fonts in project" with a warning icon and text: "These are automatically generated by the inspector if any of the font names you supplied match fonts present in your project, which will then be used as fallbacks for this font." Below this text, it says "No references to other fonts in project." At the bottom right, there are "Revert" and "Apply" buttons.

# Chapter 8: Animations and Particles in the UI

Inspector

Animation Event

Function: (No Function Selected)

Inspector

Animation Event

Function:

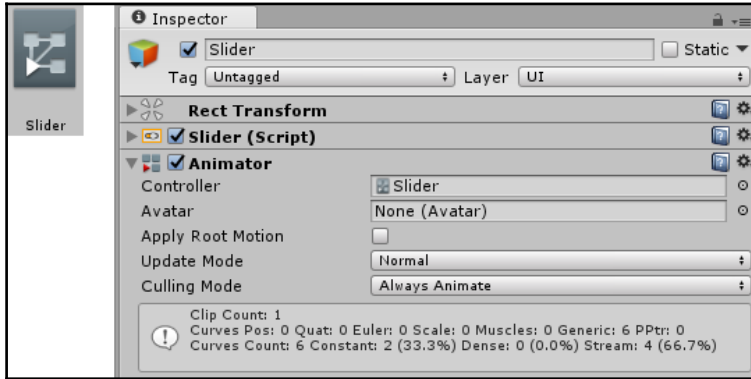

Float:

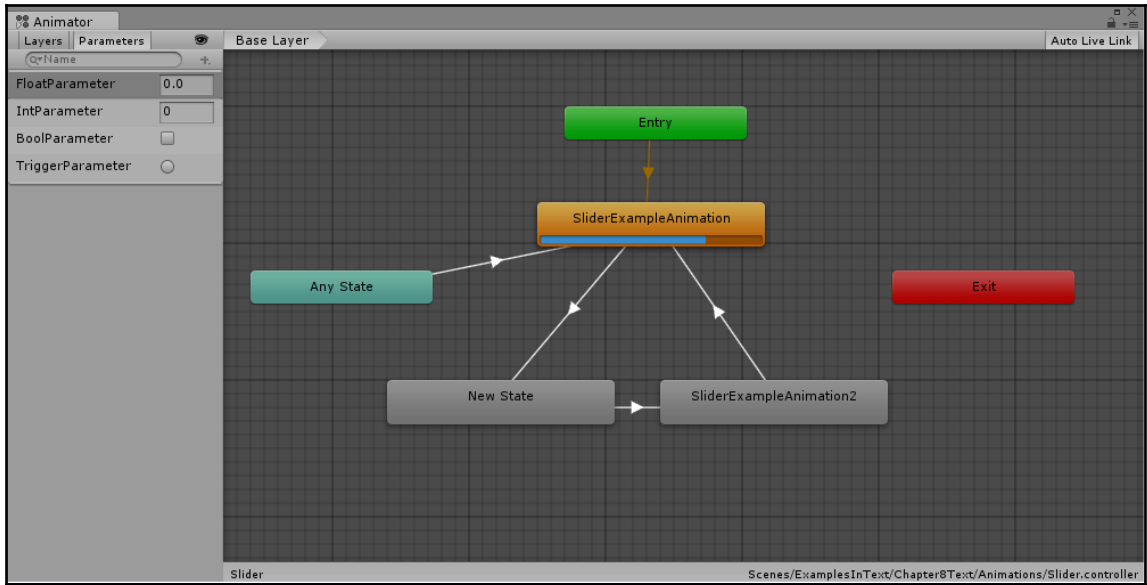

Int:

String:

Object:

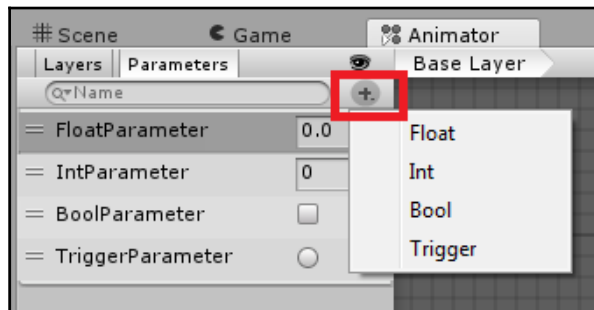

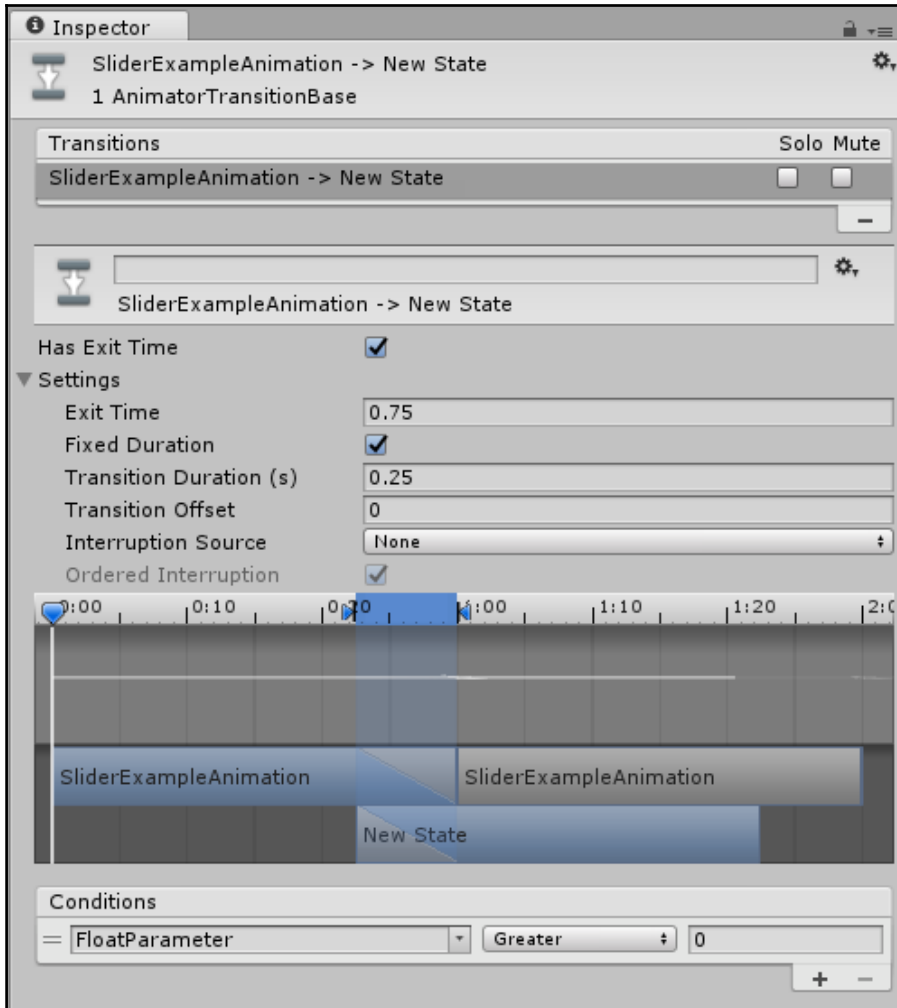

**attached to a GameObject and the GameObject is selected** **otherwise**

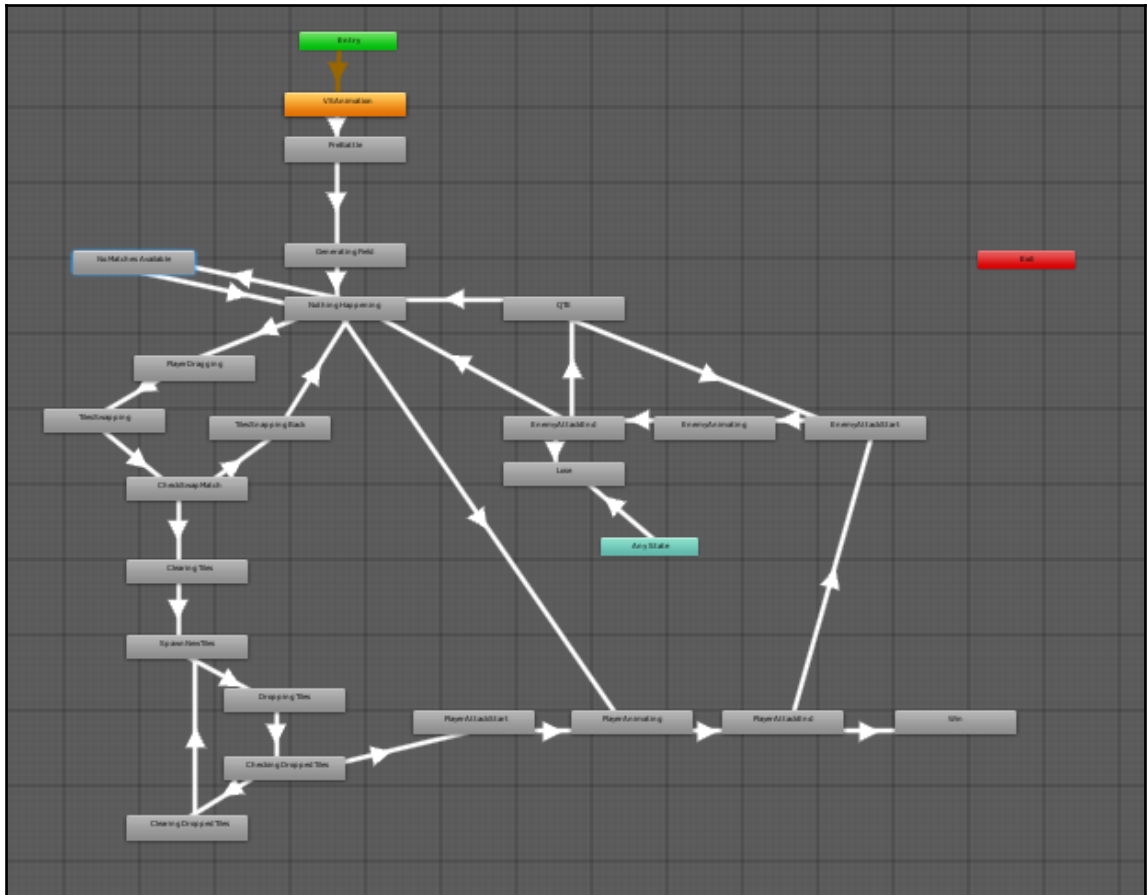

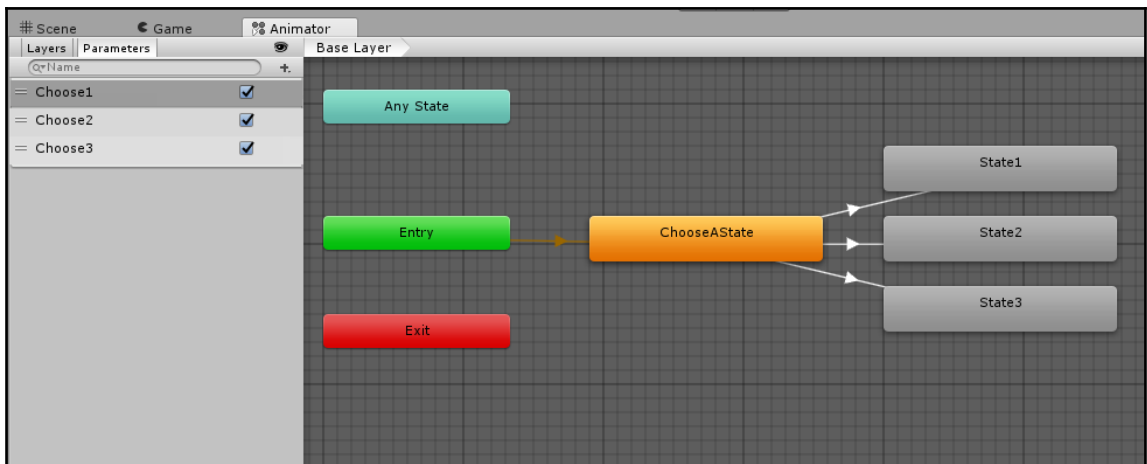

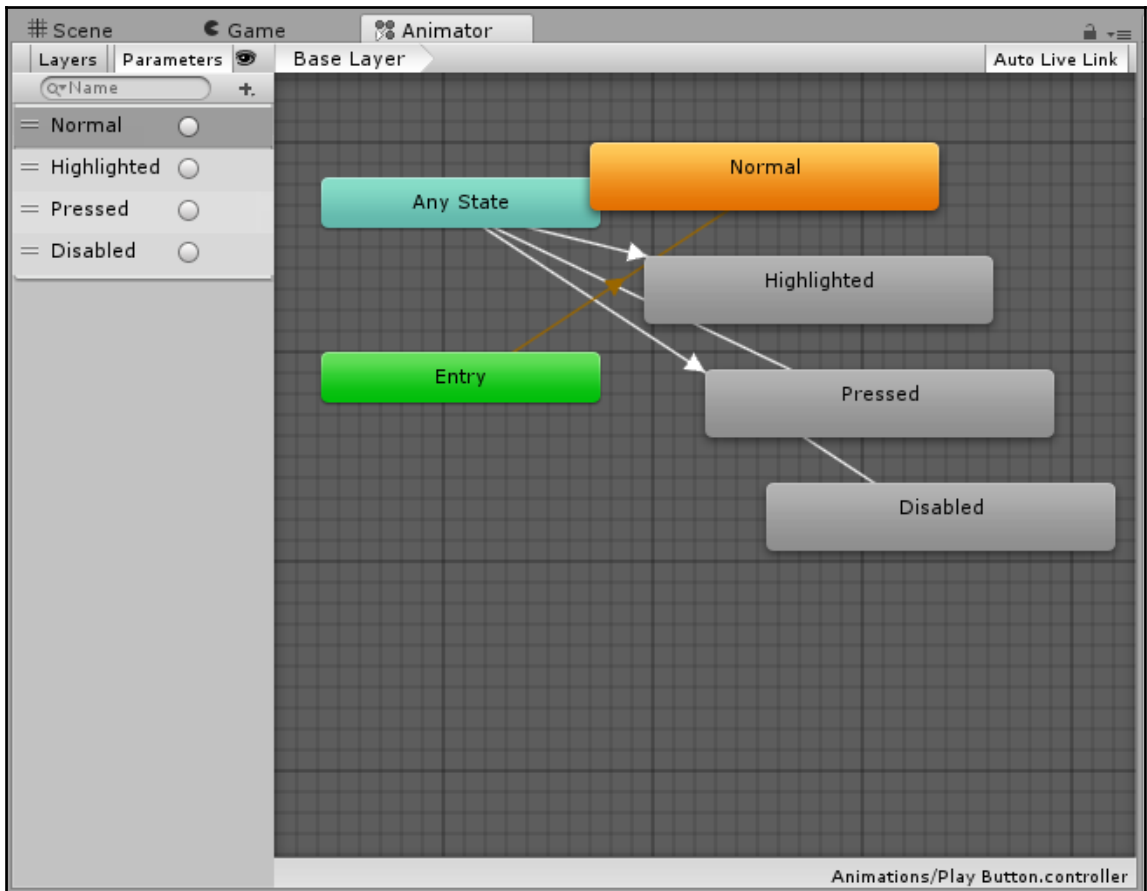

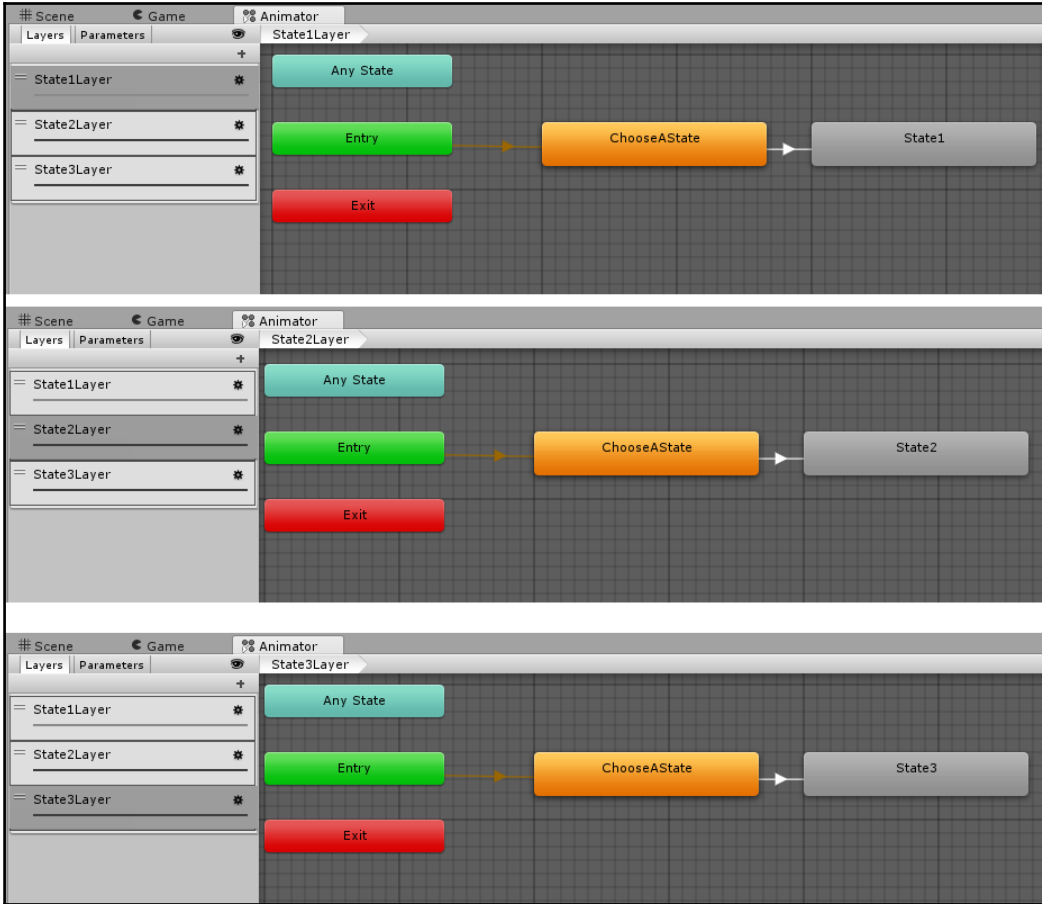

The Inspector window shows the configuration for the **SliderExampleAnimation2** state:

- Tag:**
- Motion:**
- Speed:**
- Multiplier:**   Parameter
- Mirror:**   Parameter
- Cycle Offset:**   Parameter
- Foot IK:**
- Write Defaults:**
- Transitions:** Solo Mute
- List is Empty:**

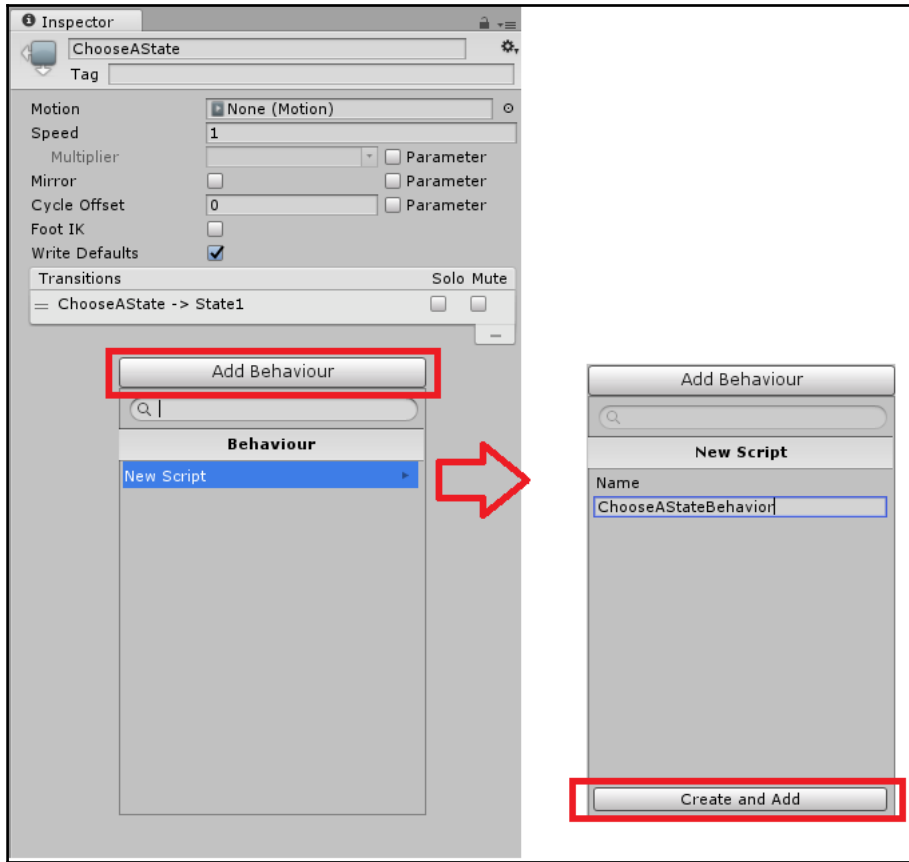

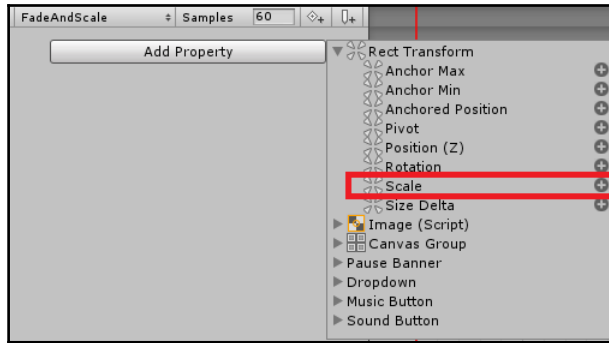

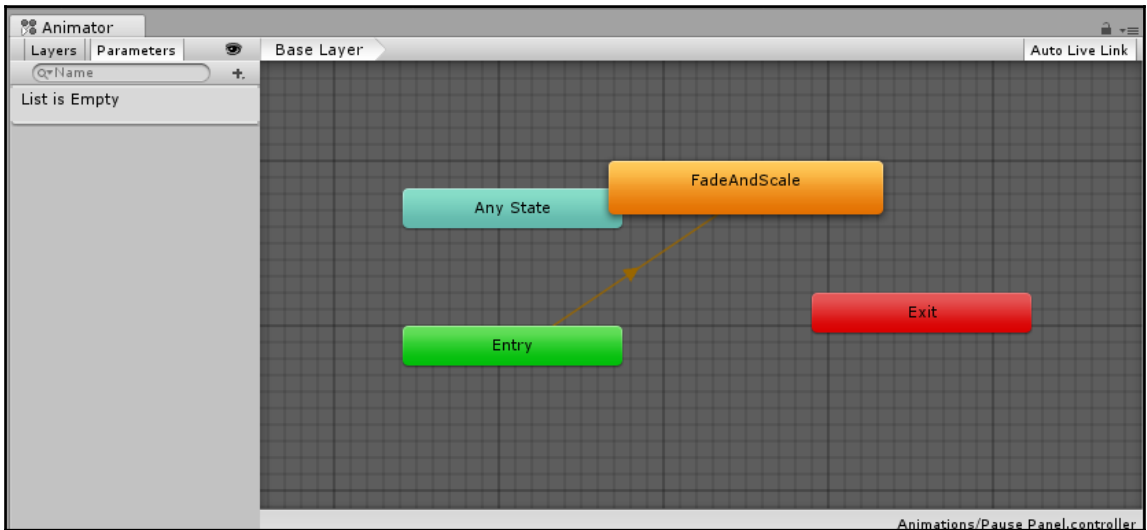

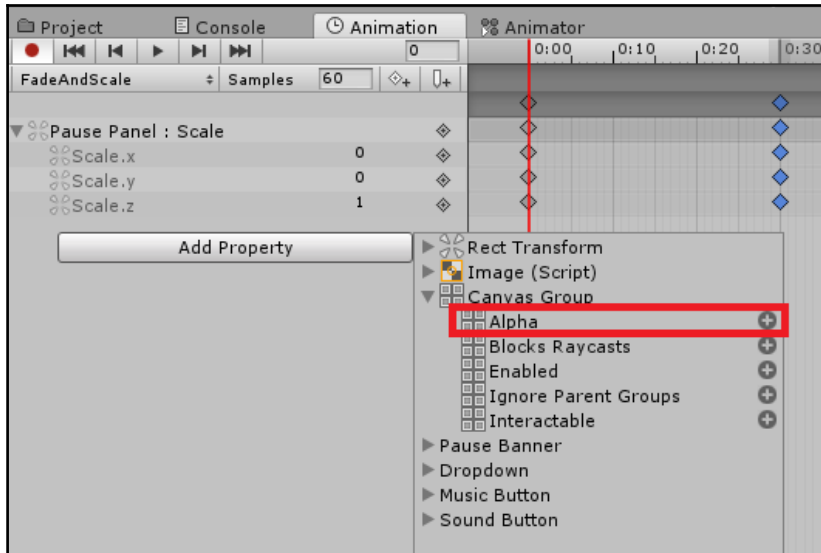

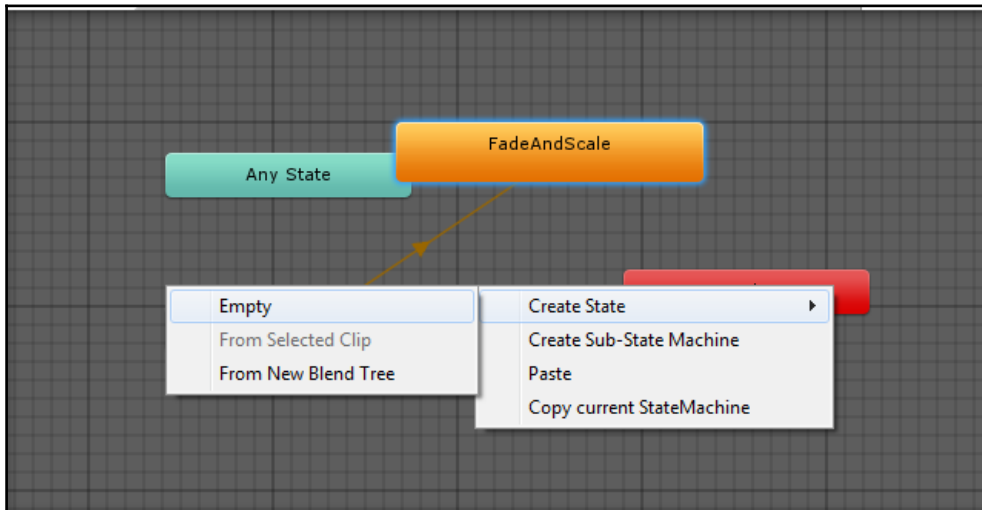

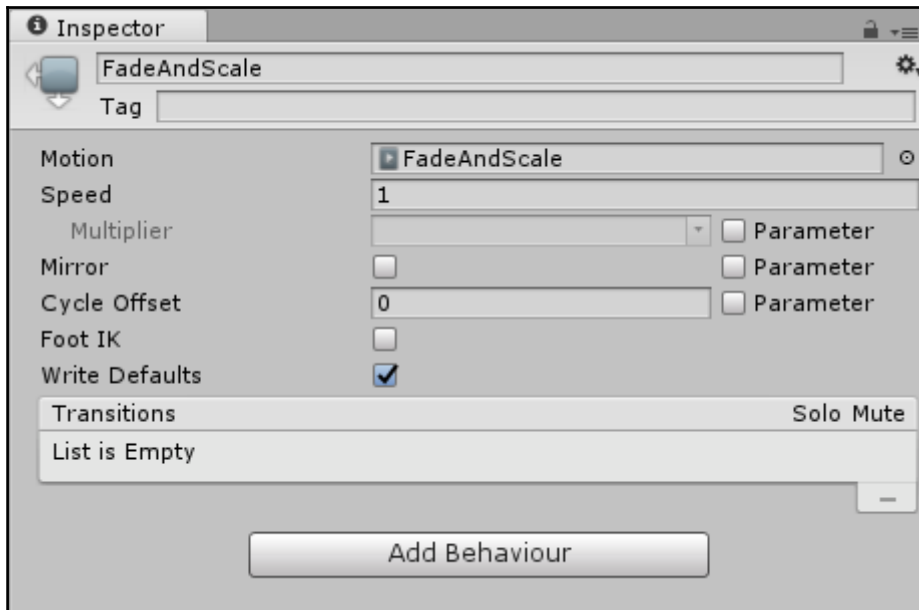

Layers	Parameters
Name	
FloatParameter	0.0
IntParameter	0
BoolParameter	<input type="checkbox"/>
TriggerParameter	<input type="radio"/>

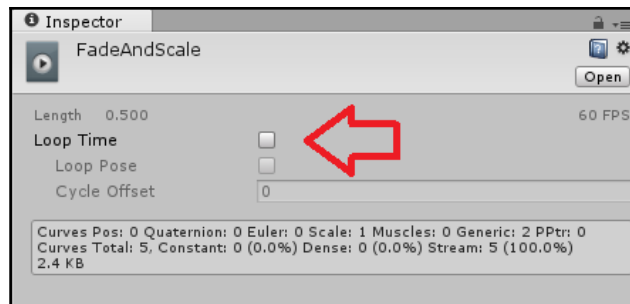

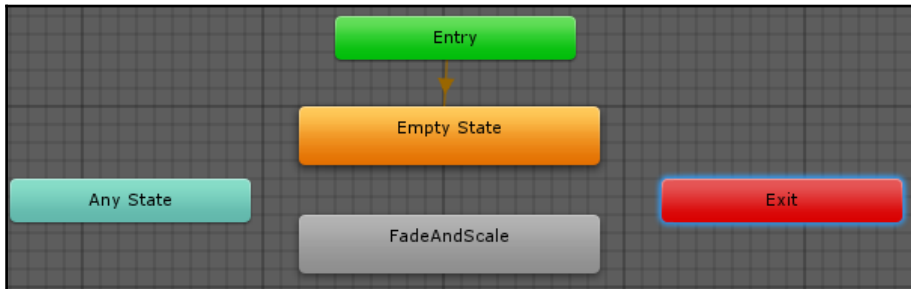

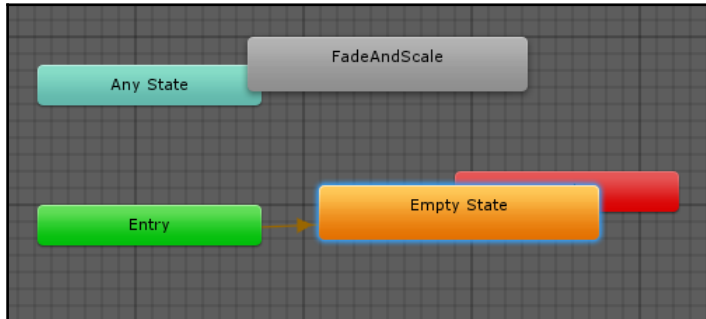

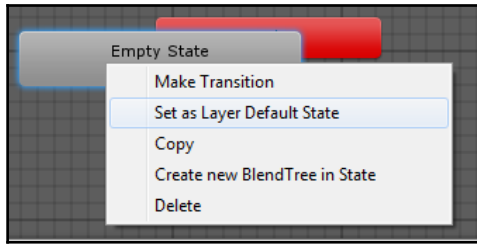

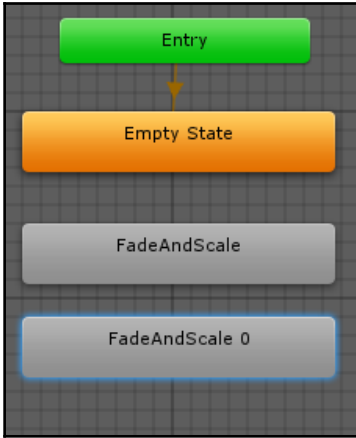

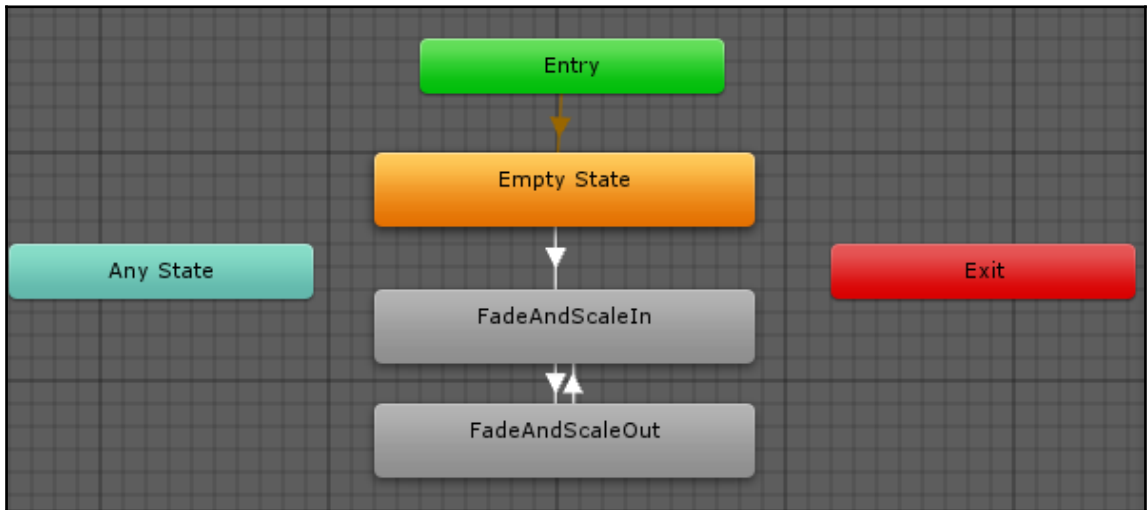

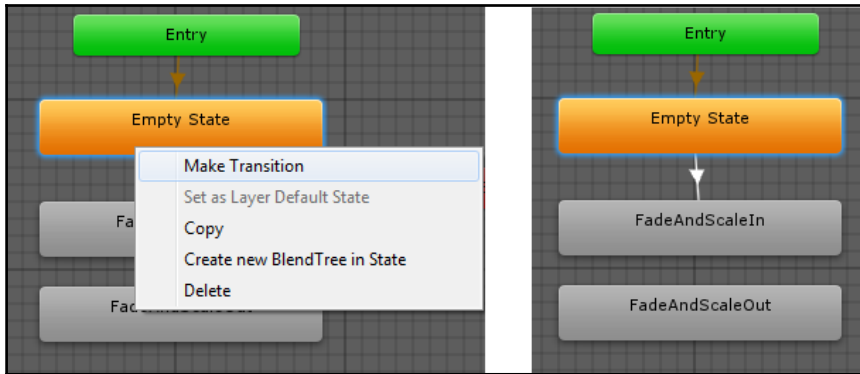

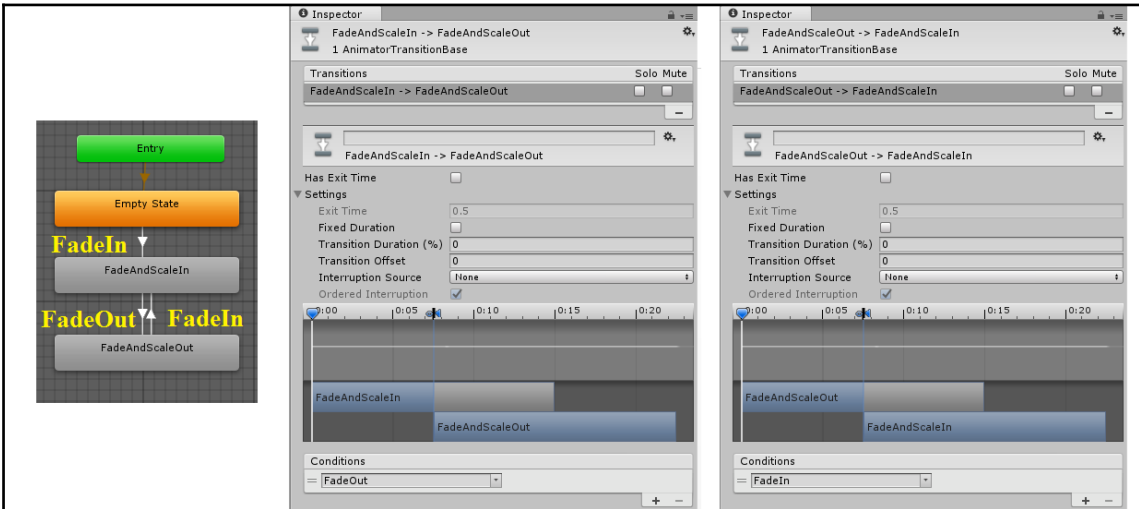

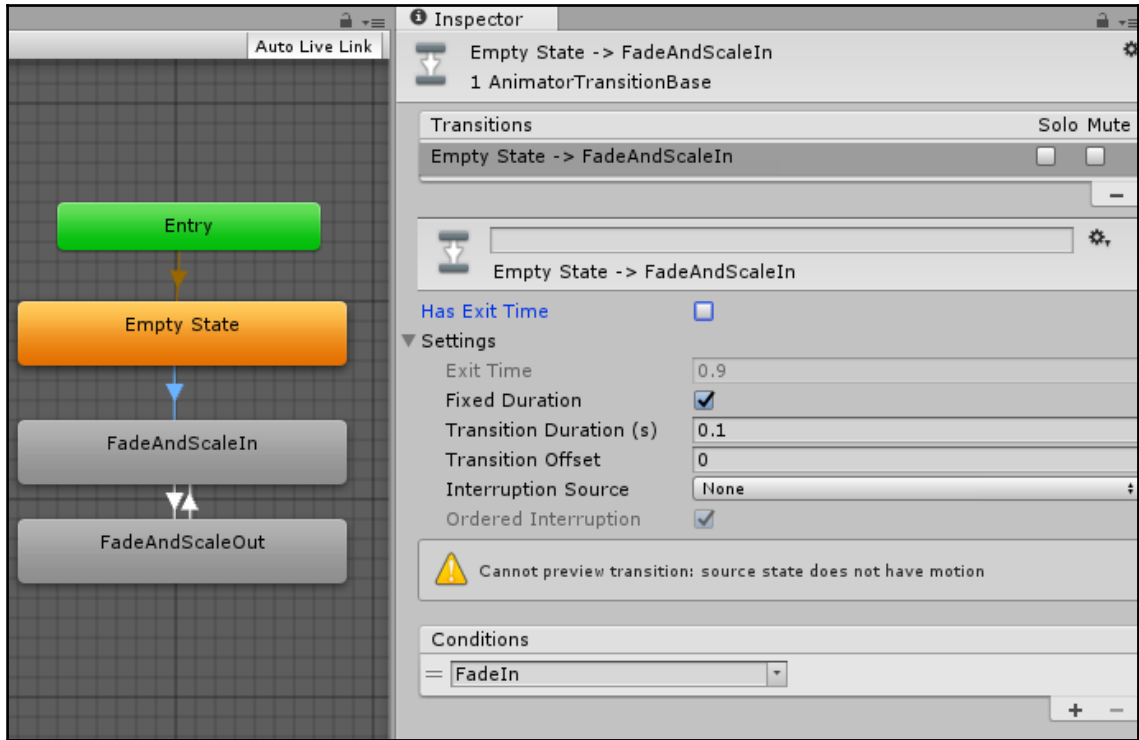

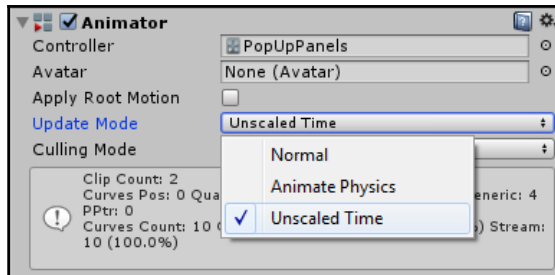

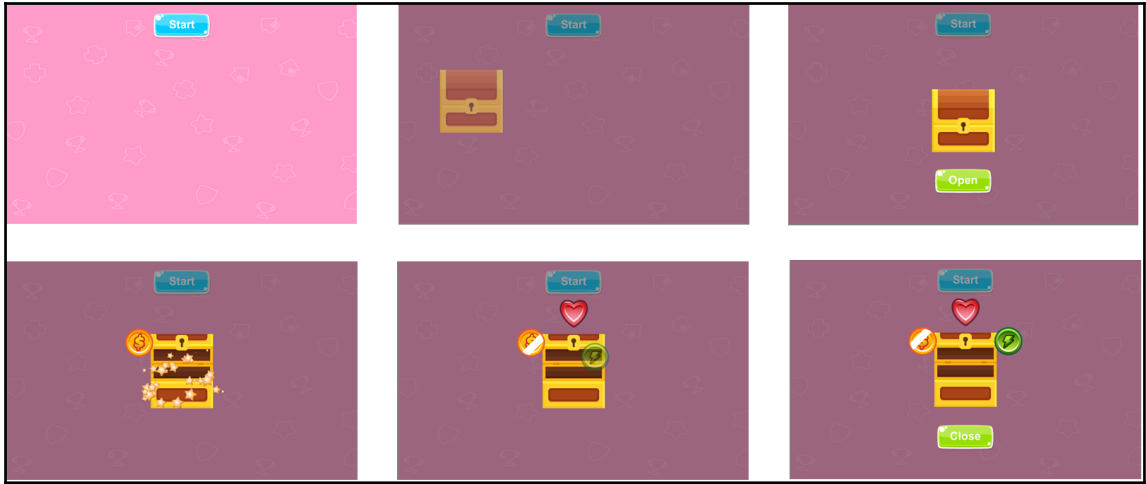

The Inspector window shows the configuration for the **FadeAndScaleOut** transition. The **Motion** is set to **FadeAndScale** with a **Speed** of **-1**. Other settings include **Mirror** (unchecked), **Cycle Offset** (0), **Foot IK** (unchecked), and **Write Defaults** (checked). The **Transitions** list is currently empty.

The left screenshot shows the **Animator** window with the **Base Layer** selected. A context menu is open over the **List is Empty** state, with **Trigger** selected. The right screenshot shows the **Animator** window with the **Base Layer** selected, showing **FadeIn** and **FadeOut** states.

ProceedStateMachine

The image displays six individual Unity Animation Timeline windows, each showing a different animation clip and its synchronization with a state machine. Each window includes a playback control bar at the top, a list of animation properties on the left, and a timeline on the right. A red vertical line indicates the current time, and a blue vertical line indicates the state machine's current state.

- CanvasGroupFadeIn:** Shows properties for Canvas Group (Alpha, Blocks Raycasts, Interactable). The state machine proceeds at 0:30.
- ChestFlyingIn:** Shows properties for Chest (Anchored Position, Image.Color). The state machine proceeds at 0:30.
- ChestOpening:** Shows properties for Chest (Image.Color, Image.Sprite). The state machine proceeds at 1:06.
- CoinPopping:** Shows properties for Coin (Anchored Position, Image.Color). The state machine proceeds at 0:30.
- HeartPopping:** Shows properties for Heart (Anchored Position, Image.Color). The state machine proceeds at 0:30.
- PowerUpPop:** Shows properties for PowerUp (Anchored Position, Image.Color). The state machine proceeds at 0:30.
