SWISS  
STYLE  
DESIGN

# The History Begin in 1920 to 1960

The style is really contribute to modern design right now both in style or typography itself

+

We need to say thanks to swiss designer and architect because what they invent in their time is usable to us a modern graphic designer

+

Swiss design is a complement of Bauhaus style, in art and architecture

like Bauhaus the philosophy of swiss style we can use it until now

+

This is not just an art style in graphic design but it's like a lifestyle for designer in the modern time.  
Always think creative with this kind of style.

+

SWISS  
STYLE  
DESIGN

# Chapter 2: Web Design and its Components

## The Grid System

The ultimate resource in grid systems.

" The grid system is an aid, not a guarantee. It permits a number of possible uses and each designer can look for a solution appropriate to his personal style. But one must learn how to use the grid; it is an art that requires practice. "  
**Josef Müller-Brockmann**

## About

---

## Unit Grid System

### Tools

February 1, 2014

An unitless, fluid, elastic, semantic, responsive, scalable, debuggable, declarative, simple to use grid system. And... HTML5 and CSS3 ready.

Tags: [CSS3](#), [framework](#), [grid system](#), [HTML5](#), [responsive](#)

## Grid-Based Web Design, Simplified

### Articles

February 1, 2014

If you want to reap their benefits of grids on your next project but are unsure of the specifics, this article is for you.

Tags: [grid system](#)

## Marcus Gärde Grid System

### Articles

February 1, 2014

A new method developed by Marcus Gärde to produce grid systems based on old books and scrolls.

Tags: [baseline grid](#), [grid system](#)

## Grids, Design Guidelines, Broken Rules, and the Streets of New York City

### Articles

February 1, 2014

What do the streets of New York City have to do with web and graphic design? For better or worse, the grid.

Tags: [efficiency](#), [foundation](#), [grid system](#)

## GuideGuide

### Tools

February 1, 2014

GuideGuide is a Photoshop extension that allows you to easily create grids with guides.

Tags: [grid system](#), [guides](#), [photoshop](#)

## Basel;ne

### Tools

February 1, 2014

Basel;ne is a typographic experiment focused on vertical rhythm and real baseline grid for modern browsers.

Tags: [baseline grid](#), [typography](#), [vertical rhythm](#)

The image shows the top portion of the Amazon mobile app interface. At the top, there is a promotional banner for 'NEW & INTERESTING FINDS ON AMAZON' with an 'EXPLORE' button and icons for a yellow robot, an orange bear, a green ring, and a blue ring. Below this is the Amazon logo, a 'Sign In' button with a user icon, and a shopping cart icon. A search bar with the text 'Search' and a magnifying glass icon is positioned below the navigation. The main content area features the heading 'Earth's biggest selection' followed by a list of menu items: Deals, Interesting Finds, Amazon Music, Amazon Video, Treasure Truck, Amazon Restaurants, Books, and Echo & Alexa. Each item has a right-pointing arrow or a downward-pointing chevron.

### Earth's biggest selection

- Deals
- Interesting Finds
- Amazon Music
- Amazon Video
- Treasure Truck
- Amazon Restaurants
- Books
- Echo & Alexa

### Easiest way around

One tap and a car comes directly to you. Hop in—your driver knows exactly where to go. And when you get there, just step out. Payment is completely seamless.

### Anywhere, anytime

Daily commute. Errand across town. Early morning flight. Late night drinks. Wherever you're headed, count on Uber for a ride—no reservations required.

### Low-cost to luxury

Economy cars at everyday prices are always available. For special occasions, no occasion at all, or when you just need a bit more room, call a black car or SUV.

REASONS TO RIDE

# Why PayPal?

## Safer

We keep your financial information securely encrypted so you can pay online with confidence, even if you don't know the seller.

### Security

## Flexible

Link all your cards and bank accounts and choose which one to use at checkout. You don't need money in your PayPal account and you'll keep earning reward points.\*

### Manage your account

## Convenient

Pay with PayPal on millions of sites on your computer or mobile, and in apps. Activate One Touch™ to check out in one click.

### One Touch™

## Protected

You can be refunded with Buyer Protection if something goes wrong. We can also refund your return shipping costs if you need to send something back.

### Buyer Protection Refunded Returns

## Chapter 4: Responsive Versus Adaptive Design

# CONTENT IS LIKE WATER

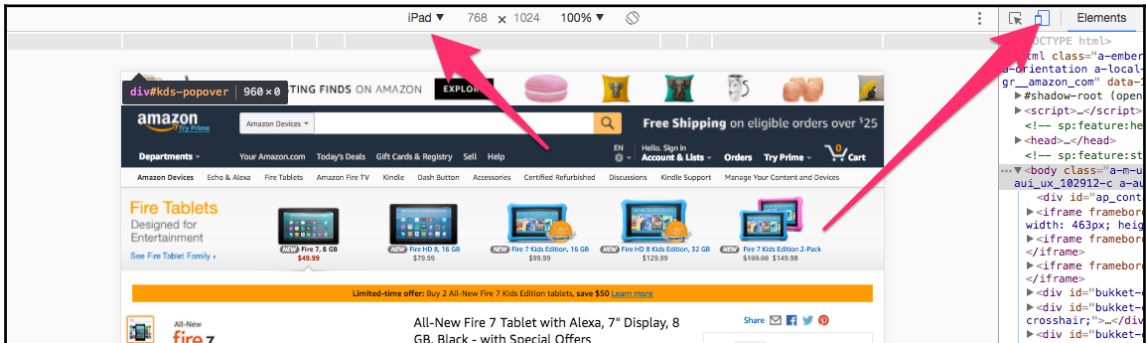

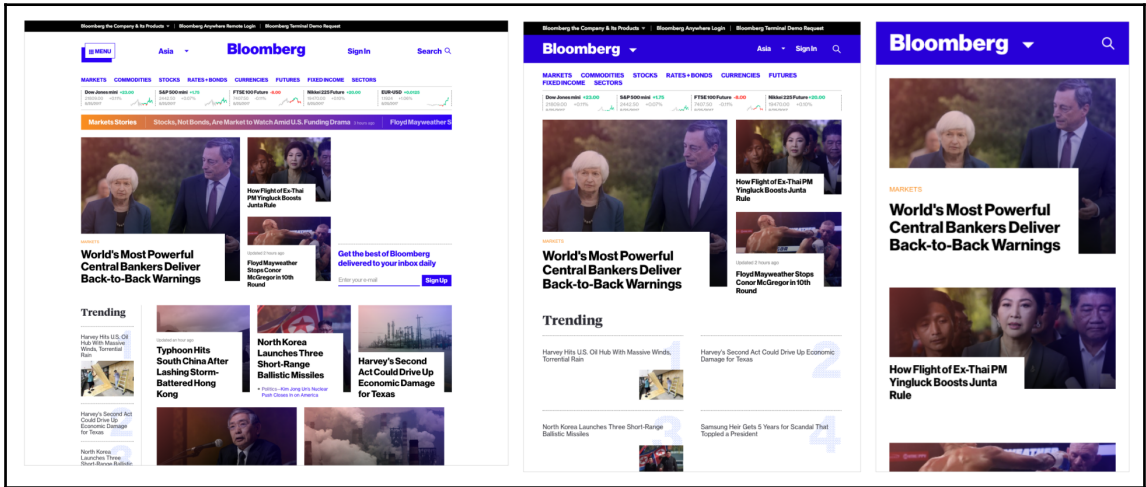

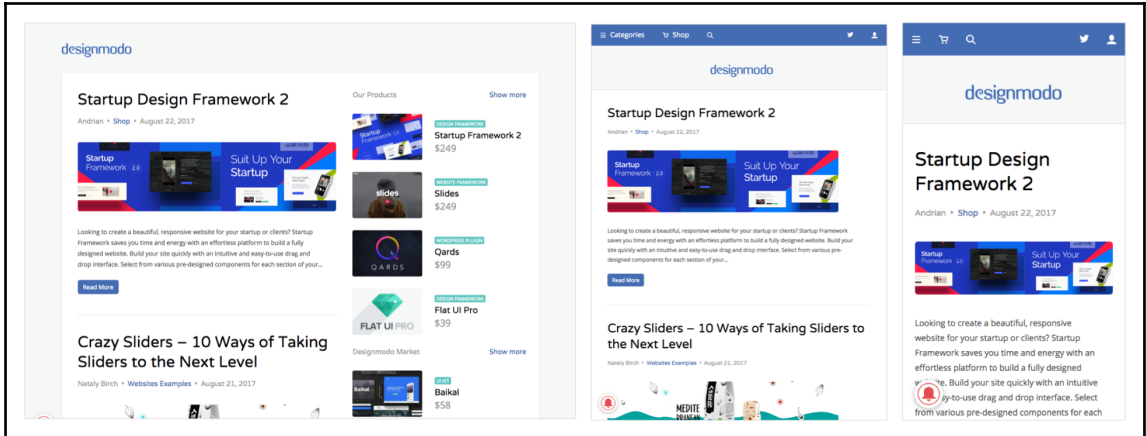

“ You put water into a cup it becomes the cup.  
You put water into a bottle it becomes the bottle.  
You put it in a teapot, it becomes the teapot. ”

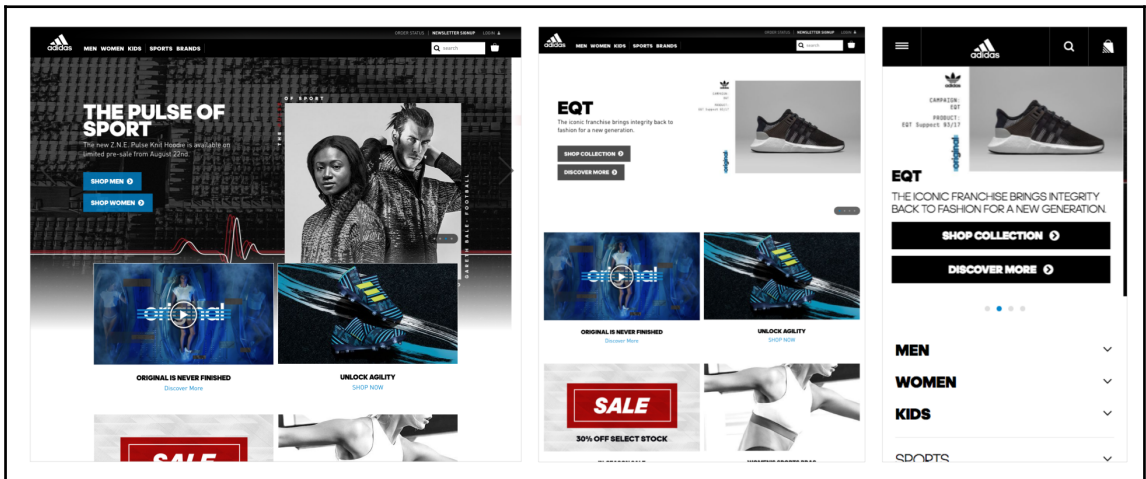

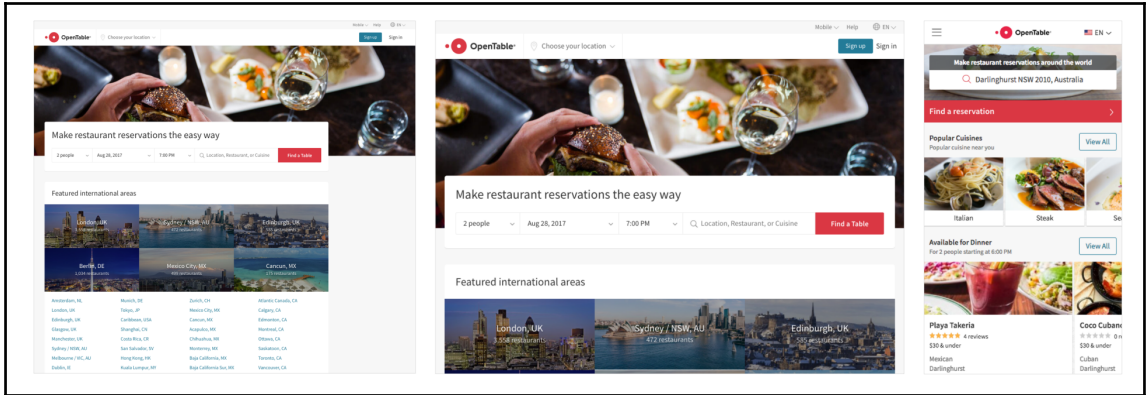

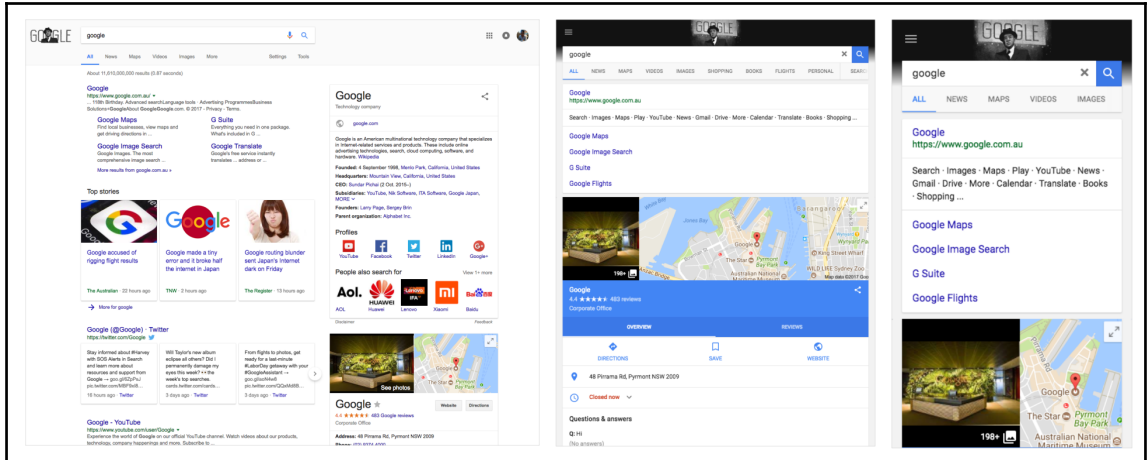

The image shows three versions of the Stripe website layout, demonstrating responsive design:

- Desktop:** Full-width layout with a navigation bar, a main headline, and a sidebar.
- Tablet:** Medium-width layout with a navigation bar, a main headline, and a sidebar.
- Mobile:** Single-column layout with a navigation bar, a main headline, and a sidebar.

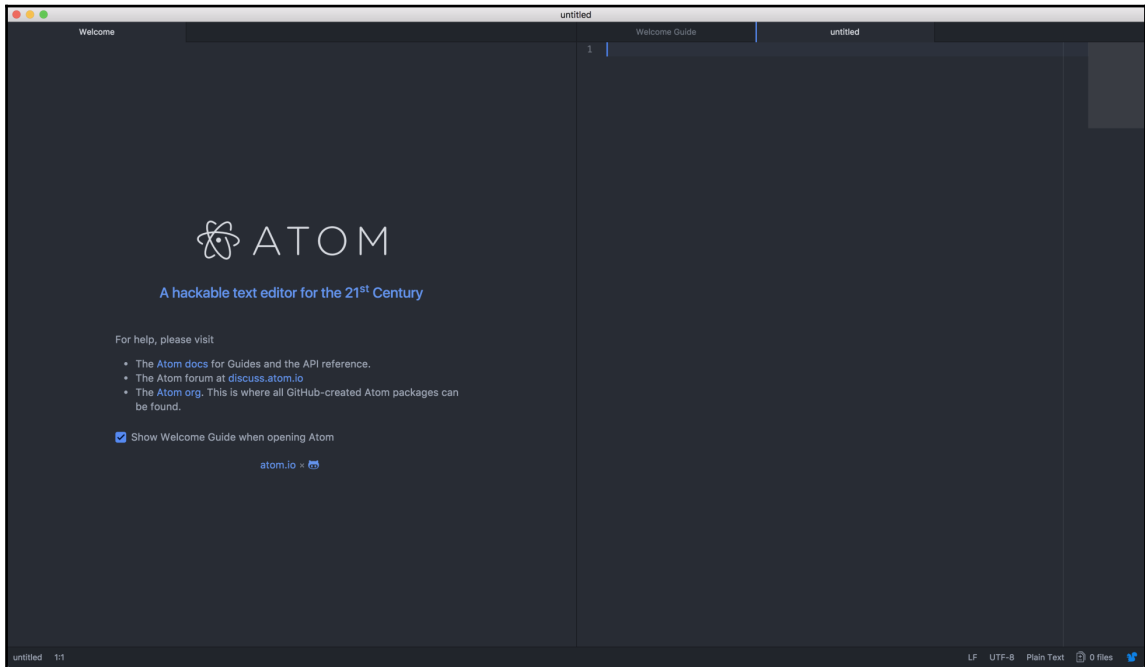

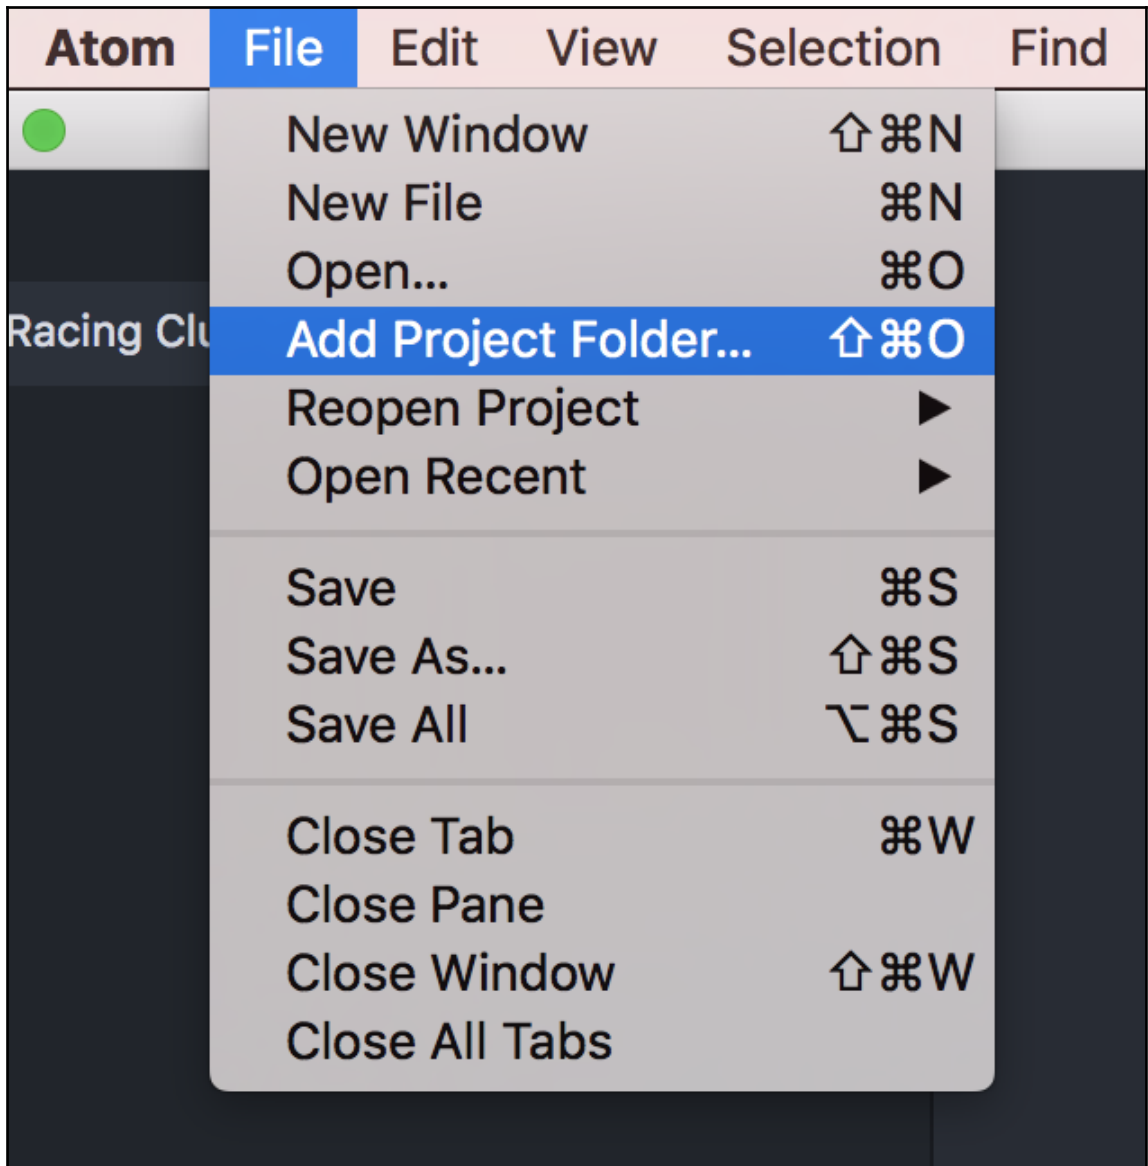

---

# Chapter 5: Learning HTML5

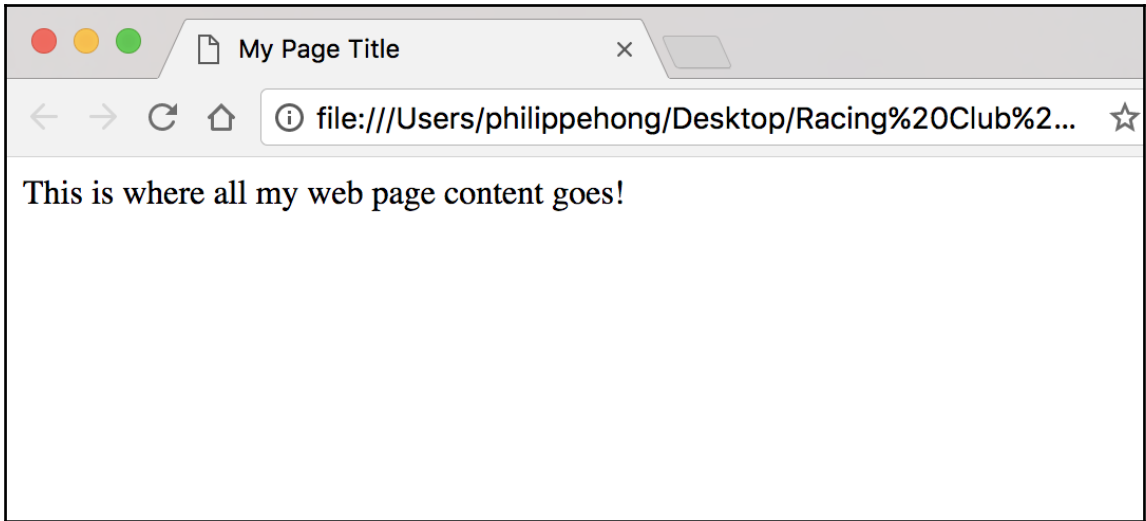

---

**Opening Tag**  
Everything after this becomes a first-level Heading

`<h1> John Doe </h1>`

**Closing Tag**  
The slash makes it a closing tag, ending the heading

The diagram shows the text `<h1> John Doe </h1>` on a dark background. The opening tag `<h1>` is highlighted in red, and the closing tag `</h1>` is also highlighted in red. A white arrow points from the text "Opening Tag" to the opening tag. Another white arrow points from the text "Closing Tag" to the closing tag.

# Waypoints

[About](#)[Guides](#)[Shortcuts](#)[API](#)

Waypoints is the easiest way to trigger a function when you scroll to an element.

```
var waypoint = new Waypoint({
  element: document.getElementById('waypoint'),
  handler: function(direction) {
    console.log('Scrolled to waypoint!')
  }
})
```

```
npm install waypoints
```

-or-

```
bower install waypoints
```

Builds are available for multiple DOM libraries.

# Instafeed.js

## What is it?

---

Instafeed.js is a dead-simple way to add Instagram photos to your website. No jQuery required, just plain 'ol javascript. (*see ↑ there?*)

download

view on github

current version: 1.4.1

Over 25 of your favorite Azure services are free—always. Start developing now. Get a year of free services and a \$200 credit for 30 days.

ads via Carbon

## Examples

---

- [Hemeon.com](#) by [Marc Hemeon](#)
- [VinThomas.com](#) by [Vin Thomas](#)
- [Garand.me](#) by [Anthony Garand](#)

## Installation

---

Setting up Instafeed.js is pretty straight-forward. Just download the script and include it in your HTML:

```
<script type="text/javascript" src="path/to/instafeed.min.js"></script>
```

Instafeed.js also supports AMD/CommonJS:

```
// AMD  
require(["path/to/instafeed"], function(Instafeed) {
```

## Find Instagram User ID

Find Instagram ID

You numeric Instagram User ID will appear here.

### What is this tool?

This tool called "Find Instagram User ID" provides an easy way for developers and designers to get Instagram account numeric ID by username.

### How to use?

This tool accepts any Instagram username, for example: ninjazhai, 9gag, google

Put your Instagram username on the text box and click the "Find Instagram ID" button, or simply press enter.

The Instagram user ID will appear in the green box. Based on your input, it will show several related Instagram accounts.

---

## Get Your Instagram Access Token

In order to display your Instagram photos on your own website, you are required to provide an Instagram Access Token. You can do this by clicking the generator button below. After clicking, you'll be prompted by Instagram to authorize Pixel Union to access your Instagram photos, and you may need to enter your Instagram login credentials.

[Generate Access Token](#)

You'll be brought right back here and, if all went well, your Instagram Access Token will be ready for you. Copy and paste this access token into the correct field. Remember to keep your access token private and never paste it in a location where others might access it.

---

### FREQUENTLY ASKED QUESTIONS

---

#### What's an Instagram Access Token?

The Instagram Access Token is a long string of characters unique to your account that grants other applications access to your Instagram feed.

#### Why do I need a token?

Without the token, your website will be unable to talk to the Instagram servers. The token provides a secure way for a website to ask Instagram's permission to access your profile and display its images.

---

## It worked!

Use this token in the appropriate field on your website or blog, and you should have a working Instagram widget.

```
7149634230.1677ed0.45cf9bad017c431ba5365cc84797...
```

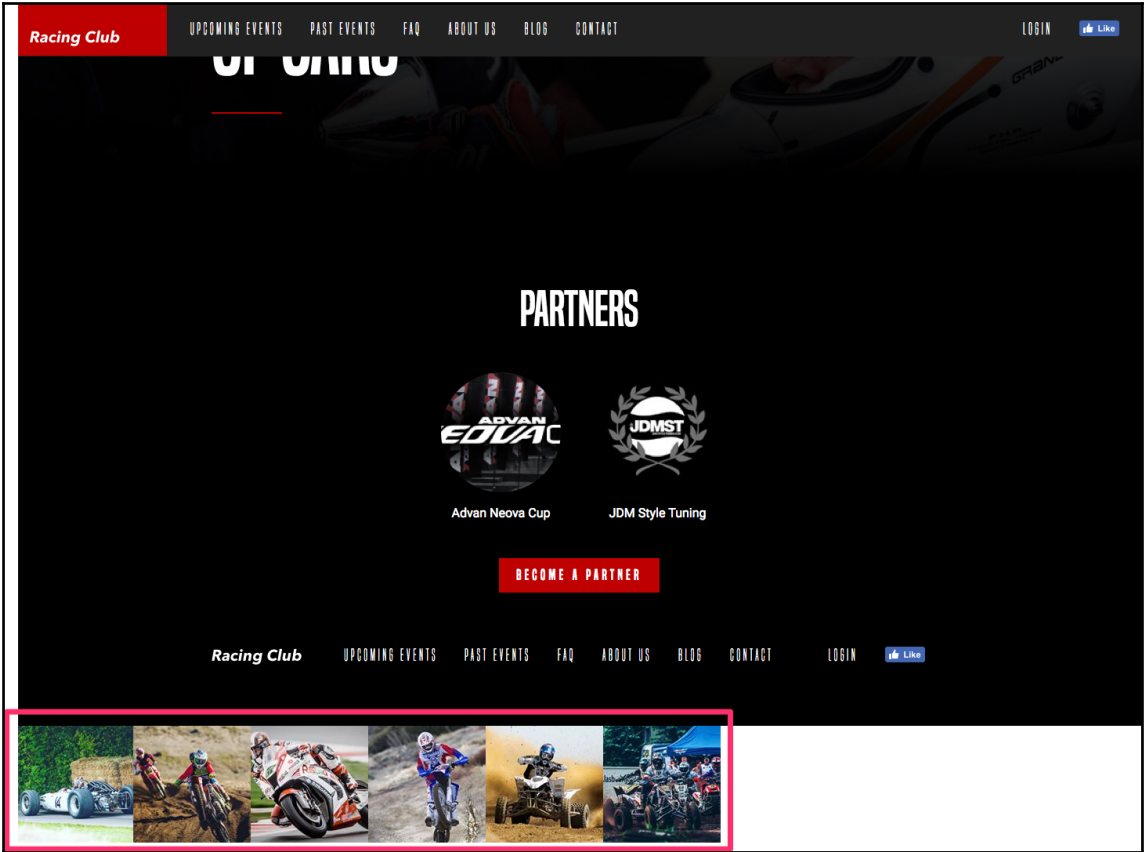

If you're having problems using your token, get in contact with the service that set up the theme or template you're using for your website. If you're using a [Pixel Union theme](#), our [customer support team](#) would be happy to help!

text-shadow: none;
margin: 0;
border: 1px solid #ccc;
padding: 5px;
width: 640 x 640px;
```

---

# Chapter 10: Optimizing and Launching Our Website

Favicon Generator. For real.

### Favicon for iOS - Web Clip

iPhone and iPad users can pin your web site on their home screen. The link looks like a native app.

Settings Assets Dedicated picture

Your favicon is not transparent. This is a good thing for iOS Web Clips. Yet, web clip corners are rounded. Depending of your favicon, it may disrupt its design. For example, if your favicon features a square border, it will be cut at the corners. Look at the sample on the left and check how your favicon will be rendered on iOS. What do you want to do?

- Use the original favicon as is.
- Add margins and a plain background.

Background color #FFFFFF Tip: You can pick a color directly from the preview.

Margin size (for a 57x57 icon)

### Favicon for Android Chrome

Add to Homescreen is a also a feature of Android Chrome. Your visitors can mix their natives apps and web bookmarks.

Main settings Options Assets Dedicated picture

Android is flexible regarding icon design. However, it automatically rounds icons which can be bad news if your icon needs square corners. Also, make sure your favicon will always be prominent, whatever the background. Use the options below to find the best fit.

- No change, keep the master picture as it is.
- Add margins and a plain background.

Background color #FFFFFF Tip: You can pick a color directly from the preview.

Margin size (for a 96x96 icon)

- Apply a slight drop shadow, similar to official Google apps (Gmail, Play Store, YouTube...).

Touch Bar

## Favicon Generator Options

Path    Version/Refresh    Compression    Scaling algorithm    App name    Additional files

I will place favicon files ( `favicon.ico` , `apple-touch-icon.png` , etc.) at the root of my web site. Recommended.

I cannot or I do not want to place favicon files at the root of my web site. Instead I will place them here:

Generate your Favicons and HTML code

HOME    PHOTOSHOP    DEVELOPER API    ANALYZER    LOGIN

**Drop your .png or .jpg files here!**  
Up to 20 images, max 5 MB each.

tiny jpg

## Smart JPEG and PNG compression

Optimize your images with a perfect balance in quality and file size.

### What does TinyJPG do?

TinyJPG reduces the file size of your JPEG images. Every uploaded image is **analyzed** to apply the best possible JPEG encoding. Based on the **content of your image** an optimal strategy is chosen. The result is a quality image without wasting storage or bandwidth!

### Why should I use TinyJPG?

JPEG is the most popular format for photos on your websites and apps. Many JPEG files do not use optimal compression, wasting valuable bytes. Balancing **quality** and **small file size** used to be a time consuming task that only humans could do. Not anymore. Let us worry about compression.

**Introducing TinyPNG Pro**

All your files at once  
25 MB upload limit

**Go Pro!**

### How does it work?

**Panda says:** Excellent question! When you upload a JPEG file, the image is analyzed. Textures, patterns and colours are **automatically identified**. The encoder creates an optimally compressed JPEG file based on that information. The final result is compared with the original and fine-tuned. Distracting JPEG artifacts are minimized **without big sacrifices in file size**. Unnecessary

### Create perfect thumbnails

The API now **resizes** images intelligently!  
Whenever you change the **aspect ratio**, **smart cropping** removes the boring bits.

Example:

### Industry Category

### Reporting Time Zone

### Tracking ID

UA- [redacted]

### Status

No data received in past 48 hours. [Learn more](#)

### Website Tracking

#### Global Site Tag (gtag.js)

This is the Global Site Tag (gtag.js) tracking code for this property. Copy and paste this code as the first item into the <HEAD> of every web page that you want to track. If you already have a Global Site Tag on your page, simply add the **config** line from the snippet below to your existing Global Site Tag.

```
<!-- Global site tag (gtag.js) - Google Analytics -->
<script async src="https://www.google-analytics.com/gtag/js?id=UA-[redacted]"></script>
<script>
  window.dataLayer = window.dataLayer || [];
  function gtag(){dataLayer.push(arguments);}
  gtag('js', new Date());

  gtag('config', 'UA-[redacted]');
</script>
```

The Global Site Tag provides streamlined tagging across Google's site measurement, conversion tracking and remarketing products – giving you better control while making implementation easier. By using gtag.js, you will be able to benefit from the latest dynamic features and integrations as they become available. [Learn more](#)

## Introduction

Get started with Bootstrap, the world's most popular framework for building responsive, mobile-first sites, with BootstrapCDN and a template starter page.

Get the guide that breaks down the "why" and "how" for scenarios suited to the cloud, ads via Carbon

- Quick start
- CSS
- JS
- Starter template
- Important globals
- HTML5 doctype
- Responsive meta tag
- Box-sizing
- Reboot
- Community

## Quick start

Looking to quickly add Bootstrap to your project? Use BootstrapCDN, provided for free by the folks at MaxCDN. Using a package manager or need to download the source files? [Head to the downloads page.](#)

## CSS

Copy-paste the stylesheet `<link>` into your `<head>` before all other stylesheets to load our CSS.

```
<link rel="stylesheet" href="https://maxcdn.bootstrapcdn.com/bootstrap/4.0.0/css/bootstrap.min.css" integrity="sha384-Kj3o2Dk1IvYK3UENzW79C14w911Y96Lg40m288" crossorigin="anonymous">
```

## JS

Many of our components require the use of JavaScript to function. Specifically, they require `jQuery`, `Popper.js`, and our own JavaScript plugins. Place the following `<script>`s near the end of your pages, right before the closing `</body>` tag, to enable them. `jQuery` must come first, then `Popper.js`, and then our JavaScript plugins.

We use `jQuery's slim build`, but the full version is also supported.

```
<script src="https://code.jquery.com/jquery-3.2.1.slim.min.js" integrity="sha384-KJ3o2Dk1IvYK3UENzW79C14w911Y96Lg40m288" crossorigin="anonymous"></script><script src="https://cdnjs.cloudflare.com/ajax/libs/popper.js/1.12.0/umd/popper.min.js" integrity="sha384-Sn18vbw5toq6L778y34bnkU6eXs4y6f153926eX8" crossorigin="anonymous"></script><script src="https://maxcdn.bootstrapcdn.com/bootstrap/4.0.0/js/bootstrap.min.js" integrity="sha384-J8X4vInwZmId450SYjnIqOUZfXG4MUTYzO3+0A9FFi6wT6pMh7H8S" crossorigin="anonymous"></script>
```

Curious which components explicitly require `jQuery`, our `JS`, and `Popper.js`? Click the show components link below. If you're at all unsure about the general page structure, keep reading for an example page template.

[Show components requiring JavaScript](#)

## Examples

Quickly get a project started with any of our examples ranging from using parts of the framework to custom components and layouts.

# Alerts

Provide contextual feedback messages for typical user actions with the handful of available and flexible alert messages.

A complete cloud platform designed for developers. Try it free - \$100 credit. ads via Carbon

## Examples

Alerts are available for any length of text, as well as an optional dismiss button. For proper styling, use one of the eight **required** contextual classes (e.g., `.alert-success`). For inline dismissal, use the [alerts jQuery plugin](#).

This is a primary alert—check it out!

This is a secondary alert—check it out!

This is a success alert—check it out!

This is a danger alert—check it out!

---

## Examples

Bootstrap includes several predefined button styles, each serving its own semantic purpose, with a few extras thrown in for more control.

```
<button type="button" class="btn btn-primary">Primary</button>
<button type="button" class="btn btn-secondary">Secondary</button>
<button type="button" class="btn btn-success">Success</button>
<button type="button" class="btn btn-danger">Danger</button>
<button type="button" class="btn btn-warning">Warning</button>
<button type="button" class="btn btn-info">Info</button>
<button type="button" class="btn btn-light">Light</button>
<button type="button" class="btn btn-dark">Dark</button>

<button type="button" class="btn btn-link">Link</button>
```

Copy

### Conveying meaning to assistive technologies

Using color to add meaning only provides a visual indication, which will not be conveyed to users of assistive technologies – such as screen readers. Ensure that information denoted by the color is either obvious from the content itself (e.g. the visible text), or is included through alternative means, such as additional text hidden with the `.sr-only` class.

## Outline buttons

In need of a button, but not the hefty background colors they bring? Replace the default modifier classes with the `.btn-outline-*` ones to remove all background images and colors on any button.

```
<button type="button" class="btn btn-outline-primary">Primary</button>
<button type="button" class="btn btn-outline-secondary">Secondary</button>
<button type="button" class="btn btn-outline-success">Success</button>
<button type="button" class="btn btn-outline-danger">Danger</button>
<button type="button" class="btn btn-outline-warning">Warning</button>
<button type="button" class="btn btn-outline-info">Info</button>
<button type="button" class="btn btn-outline-light">Light</button>
<button type="button" class="btn btn-outline-dark">Dark</button>
```

Copy

## Inline forms

Use the `.form-inline` class to display a series of labels, form controls, and buttons on a single horizontal row. Form controls within inline forms vary slightly from their default states.

- Controls are `display: flex`, collapsing any HTML white space and allowing you to provide alignment control with [spacing and flexbox](#) utilities.
- Controls and input groups receive `width: auto` to override the Bootstrap default `width: 100%`.
- Controls **only appear inline in viewports that are at least 576px wide** to account for narrow viewports on mobile devices.

You may need to manually address the width and alignment of individual form controls with [spacing utilities](#) (as shown below). Lastly, be sure to always include a `<label>` with each form control, even if you need to hide it from non-screenreader visitors with `.sr-only`.

```
<form class="form-inline">
  <label class="sr-only" form="inlineFormInputName2">Name</label>
  <input type="text" class="form-control mb-2 mr-sm-2" id="inlineFormInputName2" placeholder="Jane Doe">
  <label class="sr-only" form="inlineFormInputGroupUsername2">Username</label>
  <div class="input-group mb-2 mr-sm-2">
    <div class="input-group-text">@</div>
    <input type="text" class="form-control" id="inlineFormInputGroupUsername2" placeholder="Username">
  </div>
  <div class="form-check mb-2 mr-sm-2">
    <input class="form-check-input" type="checkbox" id="inlineFormCheck">
    <label class="form-check-label" form="inlineFormCheck">
      Remember me
    </label>
  </div>
  <button type="submit" class="btn btn-primary mb-2">Submit</button>
</form>
```

Custom form controls and selects are also supported.

## Grid system

Use our powerful mobile-first flexbox grid to build layouts of all shapes and sizes thanks to a twelve column system, five default responsive tiers, Sass variables and mixins, and dozens of predefined classes.

Get the guide that breaks down the "why" and "how" for scenarios suited to the cloud, ads via Carbon

### How it works

Bootstrap's grid system uses a series of containers, rows, and columns to layout and align content. It's built with [flexbox](#) and is fully responsive. Below is an example and an in-depth look at how the grid comes together.

**New to or unfamiliar with flexbox?** [Read this CSS Tricks flexbox guide](#) for background, terminology, guidelines, and code snippets.

```
<div class="container">
  <div class="row">
    <div class="col-sm">
      One of three columns
    </div>
    <div class="col-sm">
      One of three columns
    </div>
    <div class="col-sm">
      One of three columns
    </div>
  </div>
</div>
```

The above example creates three equal-width columns on small, medium, large, and extra large devices using our predefined grid classes. Those columns are centered in the page with the parent `.container`.

---

## Responsive classes

Bootstrap's grid includes five tiers of predefined classes for building complex responsive layouts. Customize the size of your columns on extra small, small, medium, large, or extra large devices however you see fit.

### All breakpoints

For grids that are the same from the smallest of devices to the largest, use the `.col` and `.col->` classes. Specify a numbered class when you need a particularly sized column; otherwise, feel free to stick to `.col`.

col	col	col	col
col-8		col-4	

```
<div class="row">
  <div class="col">col</div>
  <div class="col">col</div>
  <div class="col">col</div>
  <div class="col">col</div>
</div>
<div class="row">
  <div class="col-8">col-8</div>
  <div class="col-4">col-4</div>
</div>
```

Copy

---

## Responsive classes

Bootstrap's grid includes five tiers of predefined classes for building complex responsive layouts. Customize the size of your columns on extra small, small, medium, large, or extra large devices however you see fit.

### All breakpoints

For grids that are the same from the smallest of devices to the largest, use the `.col` and `.col->` classes. Specify a numbered class when you need a particularly sized column; otherwise, feel free to stick to `.col`.

col	col	col	col
col-8		col-4	

```
<div class="row">
  <div class="col">col</div>
  <div class="col">col</div>
  <div class="col">col</div>
  <div class="col">col</div>
</div>
<div class="row">
  <div class="col-8">col-8</div>
  <div class="col-4">col-4</div>
</div>
```

Copy

---

## Stacked to horizontal

Using a single set of `.col-sm-*` classes, you can create a basic grid system that starts out stacked before becoming horizontal with at the small breakpoint (`sm`).

col-sm-8		col-sm-4
col-sm	col-sm	col-sm

```
<div class="row">
  <div class="col-sm-8">col-sm-8</div>
  <div class="col-sm-4">col-sm-4</div>
</div>
<div class="row">
  <div class="col-sm">col-sm</div>
  <div class="col-sm">col-sm</div>
  <div class="col-sm">col-sm</div>
</div>
```

Copy

## Responsive breakpoints

Since Bootstrap is developed to be mobile first, we use a handful of [media queries](#) to create sensible breakpoints for our layouts and interfaces. These breakpoints are mostly based on minimum viewport widths and allow us to scale up elements as the viewport changes.

Bootstrap primarily uses the following media query ranges—or breakpoints—in our source Sass files for our layout, grid system, and components.

```
// Extra small devices (portrait phones, less than 576px)
// No media query since this is the default in Bootstrap

// Small devices (landscape phones, 576px and up)
@media (min-width: 576px) { ... }

// Medium devices (tablets, 768px and up)
@media (min-width: 768px) { ... }

// Large devices (desktops, 992px and up)
@media (min-width: 992px) { ... }

// Extra large devices (large desktops, 1200px and up)
@media (min-width: 1200px) { ... }
```

Copy

Since we write our source CSS in Sass, all our media queries are available via Sass mixins:

```
@include media-breakpoint-up(xs) { ... }
@include media-breakpoint-up(sm) { ... }
@include media-breakpoint-up(md) { ... }
@include media-breakpoint-up(lg) { ... }
@include media-breakpoint-up(xl) { ... }

// Example usage:
@include media-breakpoint-up(sm) {
  .some-class {
    display: block;
  }
}
```

Copy

We occasionally use media queries that go in the other direction (the given screen size *or smaller*):

```
// Extra small devices (portrait phones, less than 576px)
@media (max-width: 575.98px) { ... }

// Small devices (landscape phones, less than 768px)
@media (max-width: 767.98px) { ... }
```

Copy

---

We occasionally use media queries that go in the other direction (the given screen size *or smaller*):

```
// Extra small devices (portrait phones, less than 576px)
@media (max-width: 575.98px) { ... }

// Small devices (landscape phones, less than 768px)
@media (max-width: 767.98px) { ... }

// Medium devices (tablets, less than 992px)
@media (max-width: 991.98px) { ... }

// Large devices (desktops, less than 1200px)
@media (max-width: 1199.98px) { ... }

// Extra large devices (large desktops)
// No media query since the extra-large breakpoint has no upper bound on its width
```

Copy

---

# Chapter 12: Building a Website with Bootstrap

## Starter template

Be sure to have your pages set up with the latest design and development standards. That means using an HTML5 doctype and including a viewport meta tag for proper responsive behaviors. Put it all together and your pages should look like this:

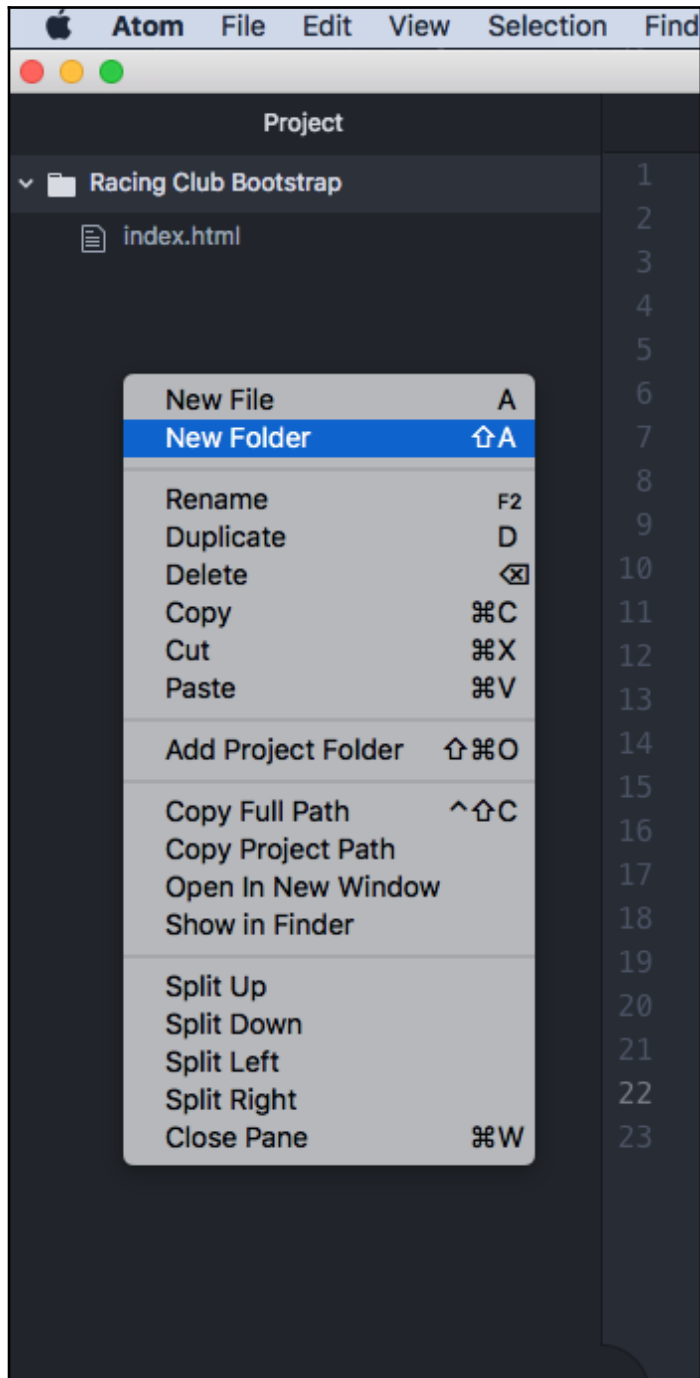

```
<!doctype html>
<html lang="en">
  <head>
    <!-- Required meta tags -->
    <meta charset="utf-8">
    <meta name="viewport" content="width=device-width, initial-scale=1, shrink-to-fit=no">

    <!-- Bootstrap CSS -->
    <link rel="stylesheet" href="https://maxcdn.bootstrapcdn.com/bootstrap/4.0.0/css/bootstrap.min.css" integrity="sha384-Gn5384xqIla0oKA+858BRXpPg6fy4IWvTNh0E263XmFcJ1SAw1GgFAM/dA156Xm" c

    <title>Hello, world!</title>
  </head>
  <body>
    <h1>Hello, world!</h1>

    <!-- Optional JavaScript -->
    <!-- jQuery first, then Popper.js, then Bootstrap JS -->
    <script src="https://code.jquery.com/jquery-3.2.1.slim.min.js" integrity="sha384-Kj3o2DkIikvYIK3UJENz0M7KCKr/r/E9/0pg6AAZGJwFDMWNA/GpGFF93hXpG5KMN" crossorigin="anonymous"></script>
    <script src="https://cdnjs.cloudflare.com/ajax/libs/popper.js/1.12.9/umd/popper.min.js" integrity="sha384-ApNbgh9B+Y10KtV3Rn7W3mpPxhU9K/Sc0sAP7hU1b339j77fakFPskvXusvfa0b4Q" crossorigin="
    <script src="https://maxcdn.bootstrapcdn.com/bootstrap/4.0.0/js/bootstrap.min.js" integrity="sha384-JZr65peJh4U0Zd8J0t6vLEHfe/JQ6IRRS0QxSFFWp11MquVdAjUar5+76PVCmYl" crossorigin="anonym
  </body>
</html>
```

That's all you need for overall page requirements. Visit the [Layout docs](#) or our [official examples](#) to start laying out your site's content and components.

# Spacing

Bootstrap includes a wide range of shorthand responsive margin and padding utility classes to modify an element's appearance.

Download the free "Total Economic Impact (TEI) of Microsoft Azure PaaS" study today, ads via Carbon

## How it works

Assign responsive-friendly `margin` or `padding` values to an element or a subset of its sides with shorthand classes. Includes support for individual properties, all properties, and vertical and horizontal properties. Classes are built from a default Sass map ranging from `.25rem` to `3rem`.

## Notation

Spacing utilities that apply to all breakpoints, from `xs` to `xl`, have no breakpoint abbreviation in them. This is because those classes are applied from `min-width: 0` and up, and thus are not bound by a media query. The remaining breakpoints, however, do include a breakpoint abbreviation.

The classes are named using the format `{property}{sides}-{size}` for `xs` and `{property}{sides}-{breakpoint}-{size}` for `sm`, `md`, `lg`, and `xl`.

Where `property` is one of:

- `m` - for classes that set `margin`
- `p` - for classes that set `padding`

Where `sides` is one of:

- `t` - for classes that set `margin-top` or `padding-top`
- `b` - for classes that set `margin-bottom` or `padding-bottom`
- `l` - for classes that set `margin-left` or `padding-left`

- How it works
- Notation
- Examples
- Horizontal centering

## Download

Download Bootstrap to get the compiled CSS and JavaScript, source code, or include it with your favorite package managers like npm, RubyGems, and more.

Get apps to market 50% faster. Get the free "Total Economic Impact (TEI) of Microsoft Azure PaaS" study by Forrester Consulting. Download at no cost. ads via Carbon

### Compiled CSS and JS

Download ready-to-use compiled code for **Bootstrap v4.0.0** to easily drop into your project, which includes:

- Compiled and minified CSS bundles (see [CSS files comparison](#))
- Compiled and minified JavaScript plugins

This doesn't include documentation, source files, or any optional JavaScript dependencies (jQuery and Popper.js).

[Download](#)

### Source files

Compile Bootstrap with your own asset pipeline by downloading our source Sass, JavaScript, and documentation files. This option requires some additional tooling:

- Sass compiler (Libsass or Ruby Sass is supported) for compiling your CSS.
- [Autoprefixer](#) for CSS vendor prefixing

Should you require [build tools](#), they are included for developing Bootstrap and its docs, but they're likely unsuitable for your own purposes.

[Download source](#)

### BootstrapCDN

Skip the download with [BootstrapCDN](#) to deliver cached version of Bootstrap's compiled CSS and JS to your project.

# Chapter 13: Introduction to Client-Side Rendering

The screenshot shows the Vue.js homepage. At the top left is the 'Vue.js' logo. To the right is a search bar and a navigation menu with links for 'Learn', 'Ecosystem', 'Team', 'Support Vue', and 'Translations'. The main heading is 'The Progressive JavaScript Framework'. Below this are three buttons: 'WHY VUE.JS?', 'GET STARTED', and 'GITHUB'. A 'Special Sponsors' section follows, featuring logos for 'stdlib' (Function as a Service Platform and Library) and 'bit' (The fastest way to share code). Three key features are highlighted: 'Approachable' (Already know HTML, CSS and JavaScript? Read the guide and start building things in no time!), 'Versatile' (An incrementally adoptable ecosystem that scales between a library and a full-featured framework), and 'Performant' (20KB min+gzip Runtime, Blazing Fast Virtual DOM, Minimal Optimization Efforts).

The screenshot shows the 'Installation' page on the Vue.js website. The left sidebar contains a navigation menu with sections for 'Special Sponsors' (stdlib, bit), 'Guide' (2x), 'Essentials', and 'Installation' (Vue Devtools, Direct <script> Include, CDN, NPM, CLI, Explanation of Different Builds, Terms, Runtime + Compiler vs. Runtime-only, Development vs. Production Mode, CSP environments, Dev Build, Bower, AMD Module Loaders, Introduction, The Vue Instance, Template Syntax, Computed Properties and Watchers, Class and Style Bindings, Conditional Rendering, List Rendering). The main content area is titled 'Installation' and includes a '# Compatibility Note' (Vue does not support IE8 and below, because it uses ECMAScript 5 features that are unshimmable in IE8. However it supports all ECMAScript 5 compliant browsers.), a '# Release Notes' section (Latest stable version: 2.5.16, Detailed release notes for each version are available on GitHub.), and a 'Vue Devtools' section (When using Vue, we recommend also installing the Vue Devtools in your browser, allowing you to inspect and debug your Vue applications in a more user-friendly interface.). Below this is a 'Direct <script> Include' section (Simply download and include with a script tag. Vue will be registered as a global variable.) and a warning icon with text: 'Don't use the minified version during development. You will miss out on all the nice features for common mistakes.' The right sidebar shows 'Patron Sponsors' (tootwit, VueSchool, DataCamp) and a 'Become a Sponsor' button.

---

## # CDN

We recommend linking to a specific version number that you can update manually:

```
<script src="https://cdn.jsdelivr.net/npm/vue@2.5.16/dist/vue.js"></script>
```

HTML

You can browse the source of the NPM package at [cdn.jsdelivr.net/npm/vue](https://cdn.jsdelivr.net/npm/vue).

Vue is also available on [unpkg](#) and [cdnjs](#) (cdnjs takes some time to sync so the latest release may not be available yet).

Make sure to read about [the different builds of Vue](#) and use the **production version** in your published site, replacing `vue.js` with `vue.min.js`. This is a smaller build optimized for speed instead of development experience.

JSFiddle interface showing a blank fiddle. The top navigation bar includes Run, Save, Tidy, Collaborate, Update, Exporting to Github Gist, Settings, and Sign in. The left sidebar contains Fiddle meta (Untitled fiddle, No description), Resources, Async requests, and Other (links, license). The main editor area is divided into HTML, CSS, and JavaScript + No-Library (pure JS) sections, each with a line number 1. A blue notification box at the bottom left asks for whitelisting JSFiddle in ad blockers.

JSFiddle interface showing a working fiddle. The HTML section contains the following code:

```

1 <script src="https://cdn.jsdelivr.net/npm/vue/dist/vue.js"></script>
2
3 <div id="app">
4   <p>
5     {{title}}
6   </p>
7 </div>

```

The CSS section is empty with a line number 1. The JavaScript + No-Library (pure JS) section contains the following code:

```

1 var app = new Vue({
2   el: '#app',
3   data: {
4     title: "Hello World!"
5   }
6 })

```

The Result section displays "Hello World!".

## How to start Home / API / How to start

To get access to weather API you need an API key whatever account you choose from Free to Enterprise.

### How to get API key (APPID)

[Sign up](#) to get unique API key on your account page

### How to use API key in API call

**Description:**

To get access to weather API you need an API key whatever account you chose from Free to Enterprise.

Activation of an API key for Free and Startup plans takes 10 minutes. For other tariff plans it is 10 to 60 minutes.

We keep right to not to process API requests without API key.

**API call:**

`http://api.openweathermap.org/data/2.5/forecast?id=524901&APPID={APIKEY}`

**Parameters:**

**APPID** {APIKEY} is your unique API key

**Example of API call:**

`api.openweathermap.org/data/2.5/forecast?id=524901&APPID=1111111111`

---

## API keys

[Home](#)

Setup **API keys** My Services My Payments Billing plans Map editor Block logs History bulk

Logout

Activation of an API key for **Free** and **Startup accounts** takes **10 minutes**. For **other accounts** it takes from **10 to 60 minutes**. You can generate as many API keys as needed for your subscription. We accumulate the total load from all of them.

Key	Name	Create key
<input type="text" value="9b0536aa088c8e398d4fa5b8ae320ad2"/>	Default <input type="checkbox"/> <input type="checkbox"/>	<input type="text"/> <input type="button" value="Generate"/>

---

## By city name

### Description:

You can call by city name or city name and country code. API responds with a list of results that match a searching word.

There is a possibility to receive a central district of the city/town with its own parameters (geographic coordinates/id/name) in API response. [Example](#)

### API call:

`api.openweathermap.org/data/2.5/weather?q={city name}`

`api.openweathermap.org/data/2.5/weather?q={city name},{country code}`

### Parameters:

**q** city name and country code divided by comma, use ISO 3166 country codes

### Examples of API calls:

`api.openweathermap.org/data/2.5/weather?q=London`

`api.openweathermap.org/data/2.5/weather?q=London,uk`

① `samples.openweathermap.org/data/2.5/weather?q=London,uk&appid=b6907d289e10d714a6e88b30761fae22`

The screenshot shows the 'designers toolbox' website. The top navigation bar includes 'DESIGN RESOURCES', 'LOREM IPSUM GENERATOR', and 'DONATE'. A left sidebar lists various design resources, with 'Lorem Ipsum Generator' highlighted. The main content area is titled 'DESIGN RESOURCES Lorem Ipsum (Greeking) Generator'. It features a form with three numbered steps: 1. 'Text starts with: Lorem ipsum dolor...' with a dropdown arrow; 2. 'Number of Characters' set to 7; 3. 'End with a period.' with a checked checkbox. A 'Generate Text' button is present. Below the form, it says 'Text will appear below.' and shows a large empty text area.

Overview Using Less.js Functions In-Depth Guide Tools GitHub ▾

# {less}

It's CSS, with just a little more.

Use with Node.js:

```
npm install -g less  
> lessc styles.less styles.css
```

Or the browser:

```
<link rel="stylesheet/less" type="text/css" href="styles.less" />  
<script src="//cdnjs.cloudflare.com/ajax/libs/less.js/3.0.0/less.min.js" ></script>
```

tiny png

## Smart PNG and JPEG compression

Optimize your images with a perfect balance in quality and file size.

### What does TinyPNG do?

TinyPNG uses smart lossy compression techniques to **reduce the file size** of your PNG files. By selectively decreasing the number of colors in the image, fewer bytes are

### Why should I use TinyPNG?

PNG is useful because it's the only widely supported format that can store partially **transparent images**. The format uses compression, but the files can still be large.

### Introducing TinyPNG Pro

All your files at once  
25 MB upload limit
