

Chapter 1: Getting Started with ROS Robotics Application Development

Distro	Release date	Poster	Turtle, turtle in tutorial	EOL date
ROS Kinetic Kame (Recommended)	May 23rd, 2016			May, 2021
ROS Jade Turtle	May 23rd, 2015			May, 2017
ROS Indigo Igloo	July 22nd, 2014			April, 2019 (Trusty EOL)

Supported:

Ubuntu

Ubuntu (armhf)

Experimental:

OS X (Homebrew)

Android (NDK)

Gentoo

Arch Linux

Debian Wheezy

OpenEmbedded/Yocto

(a)

(b)

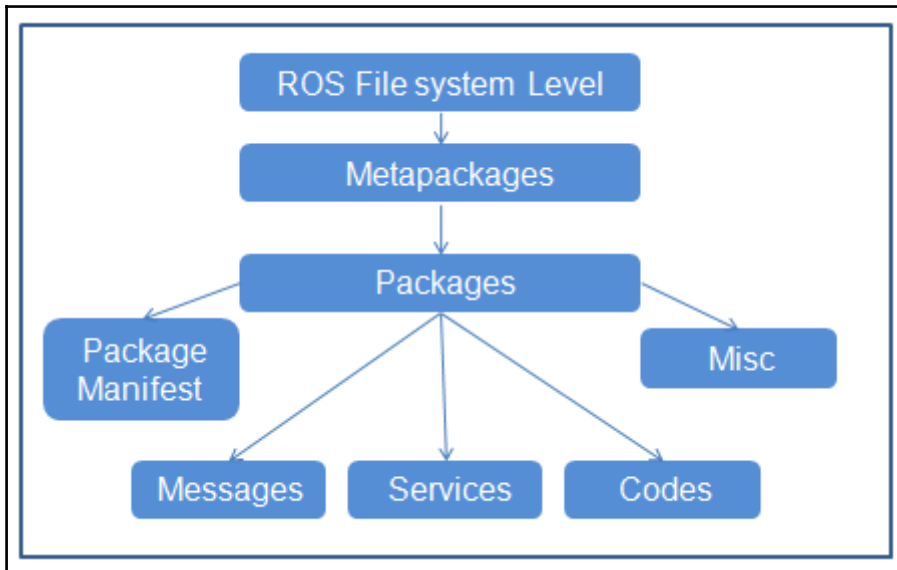

(c)

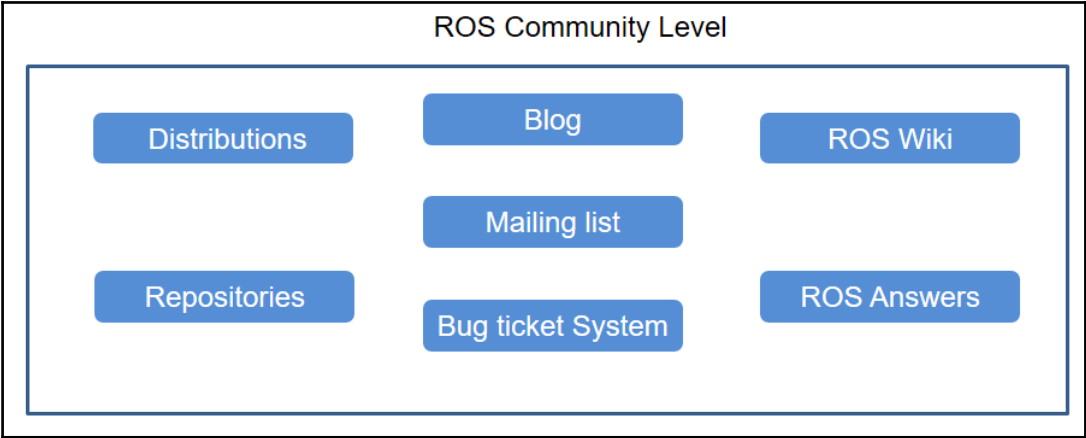

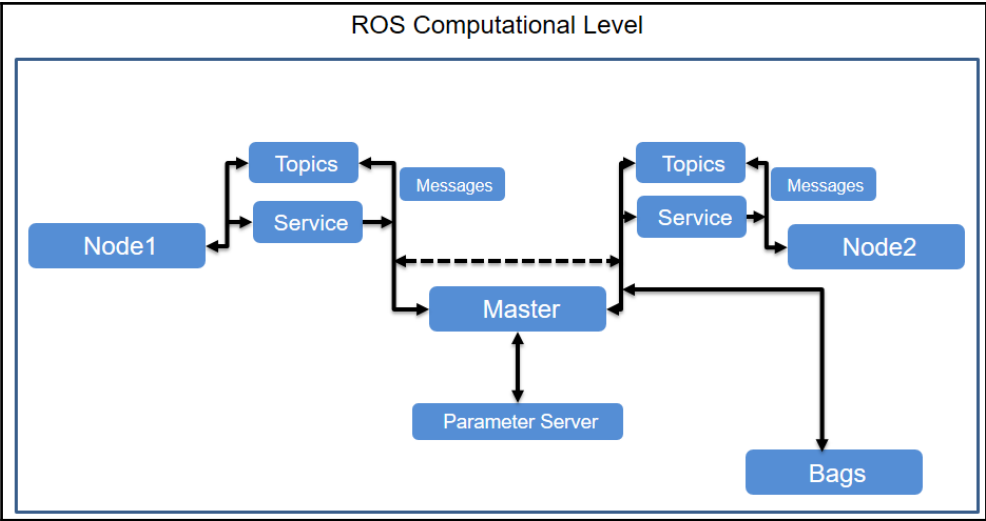

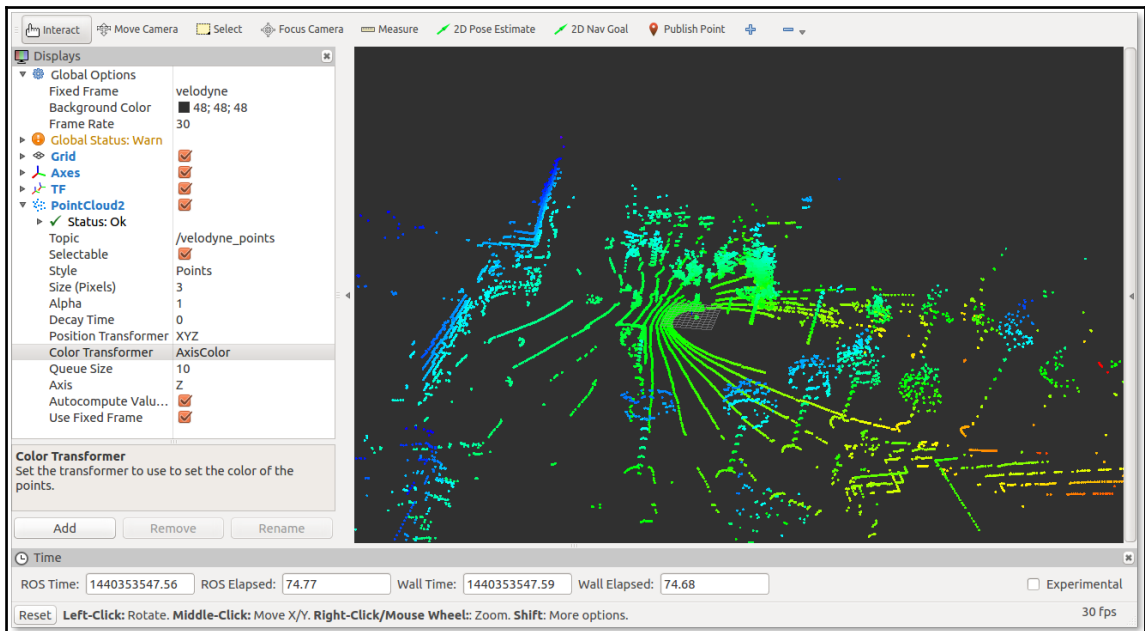

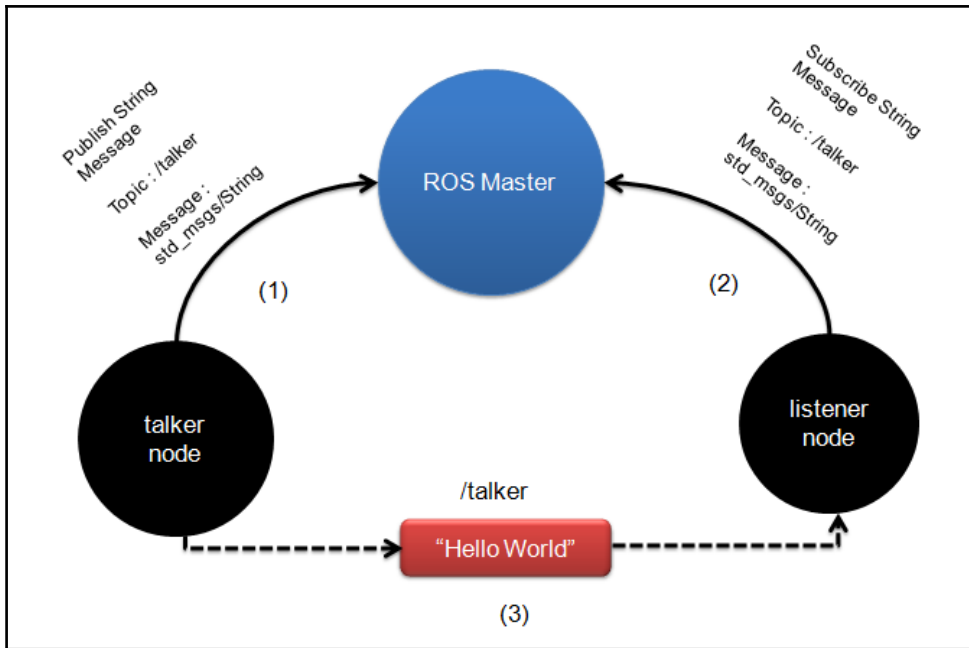

(d)

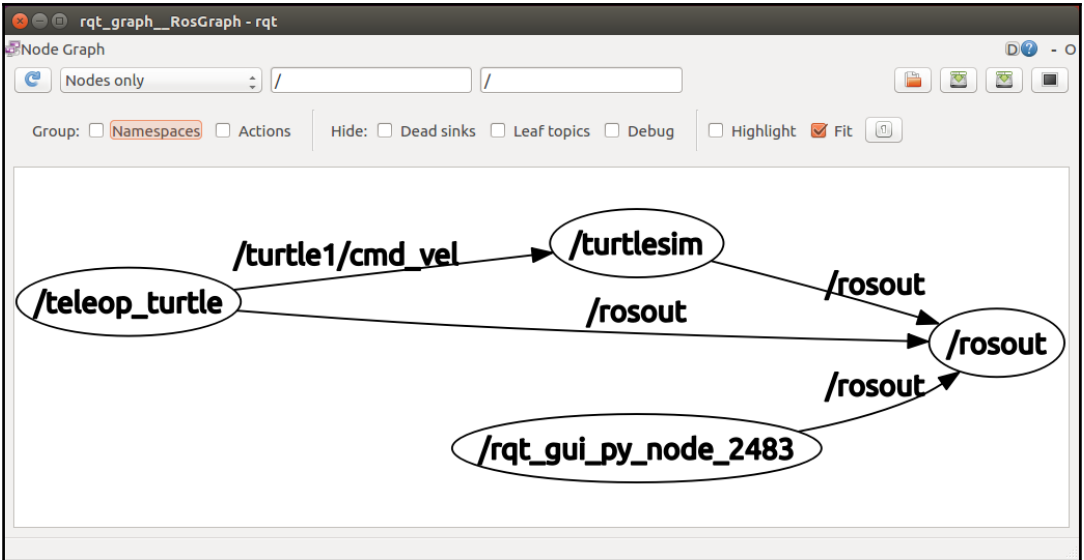

(e)

Install

robot@robot-pc: ~  
  
robot@robot-pc:~$ echo $ROS_PACKAGE_PATH  
/home/robot/catkin_ws/src:/home/robot/roscpp_ws/src  
:/opt/ros/kinetic/share:/opt/ros/kinetic/stacks  
robot@robot-pc:~$
```

Required Skills:

- BS or MS in Computer Science, Robotics, or a related field.
- 3+ year of software engineering experience.
- Experience with C++ and/or Python in a Linux Environment.
- Experience with Software Development on/with Robotic Platforms.
- Experience with Robot Operating System (ROS).
- Love of robots is a must as you will be surrounded by them.

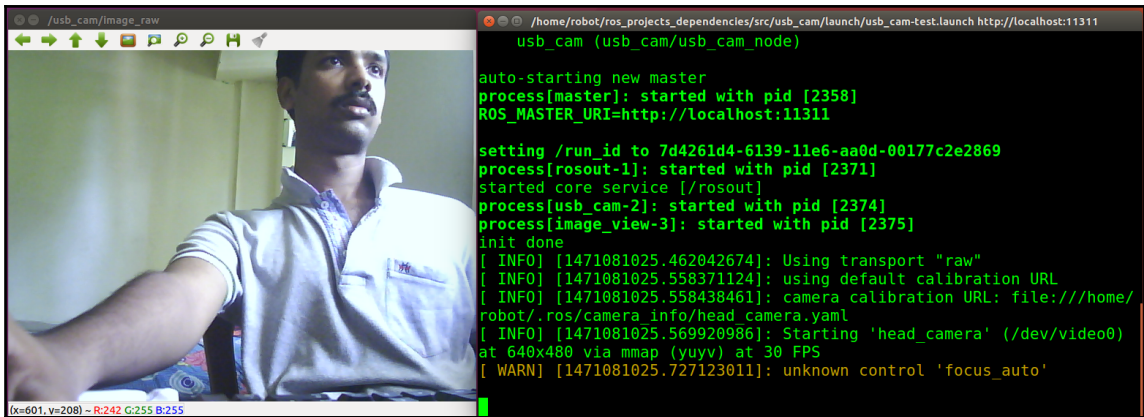

Nice To Haves:

- Experience with MoveIt, SBPL and/or OMPL.
- Experience with OpenCV or PCL.

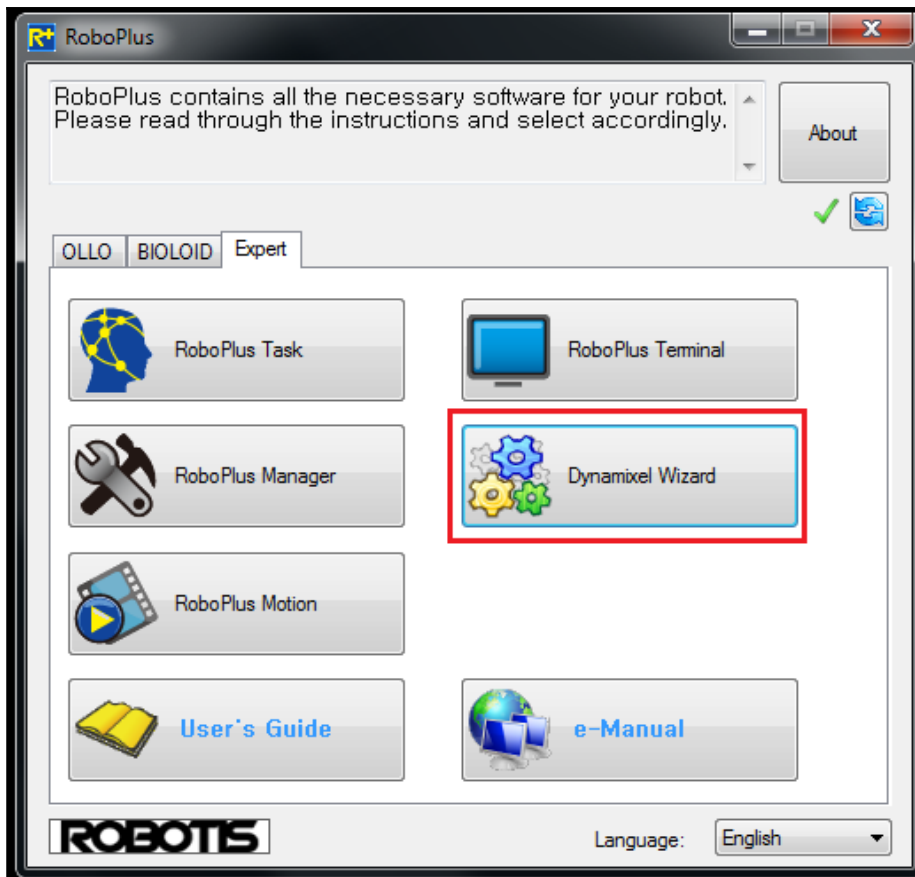

Chapter 2: Face Detection and Tracking Using ROS, OpenCV and Dynamixel Servos

- Weight : 54.6g (AX-12A)
- Dimension : 32mm * 50mm * 40mm
- Resolution : 0.29°
- Gear Reduction Ratio : 254 : 1
- Stall Torque : 1.5N.m (at 12.0V, 1.5A)
- No load speed : 59rpm (at 12V)
- Running Degree : 0° ~ 300°, Endless Turn
- Running Temperature : -5°C ~ +70°C
- Voltage : 9 ~ 12V (Recommended Voltage 11.1V)
- Command Signal : Digital Packet
- Protocol Type : Half duplex Asynchronous Serial Communication (8bit,1stop,No Parity)
- Link (Physical) : TTL Level Multi Drop (daisy chain type Connector)
- ID : 254 ID (0~253)
- Communication Speed : 7343bps ~ 1 Mbps
- Feedback : Position, Temperature, Load, Input Voltage, etc.
- Material : Engineering Plastic

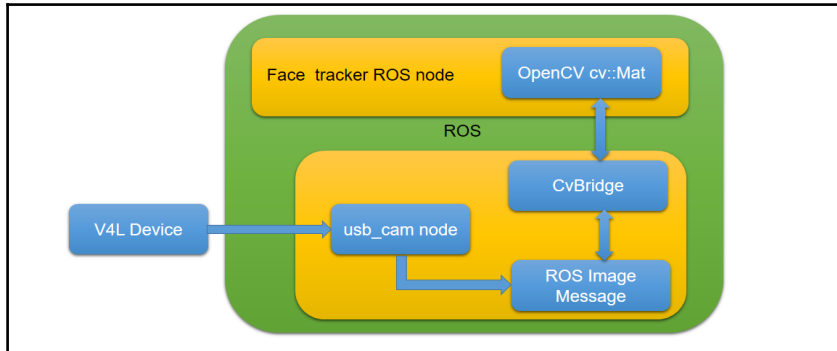

12 Volt Adapter

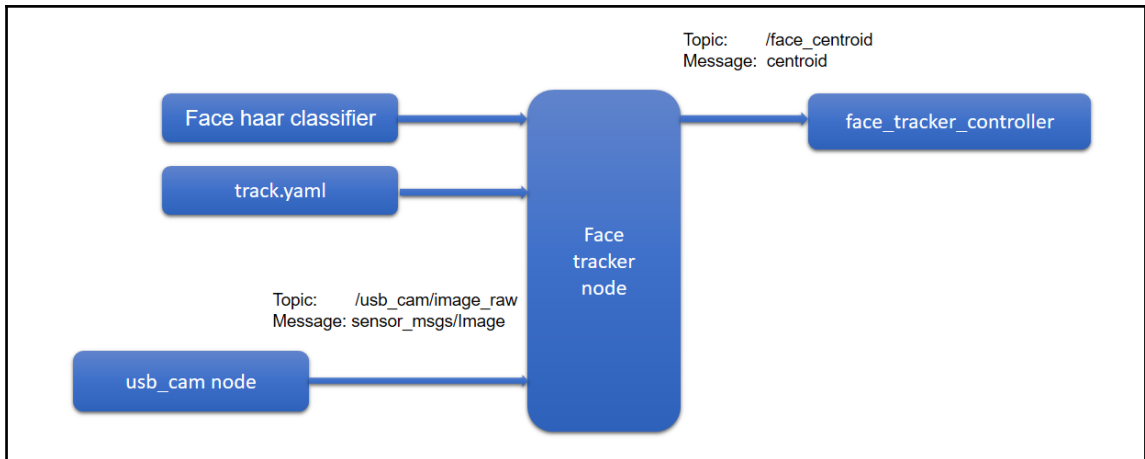

Addr	Description	Value
0	Model Number	12
2	Version of Firmware	24
3	ID	1
4	Baud Rate	1
5	Return Delay Time	250
6	CW Angle Limit (Joint / Wheel Mode)	0
8	CCW Angle Limit (Joint / Wheel Mode)	1023
11	The Highest Limit Temperature	70
12	The Lowest Limit Voltage	60
13	The Highest Limit Voltage	140
14	Max Torque	1023

Hello World (example publisher)

 rosserial_mbed_hello_world_publisher

rosserial_mbed Hello World

Last commit 19 Apr 2016 by  Gary Servin

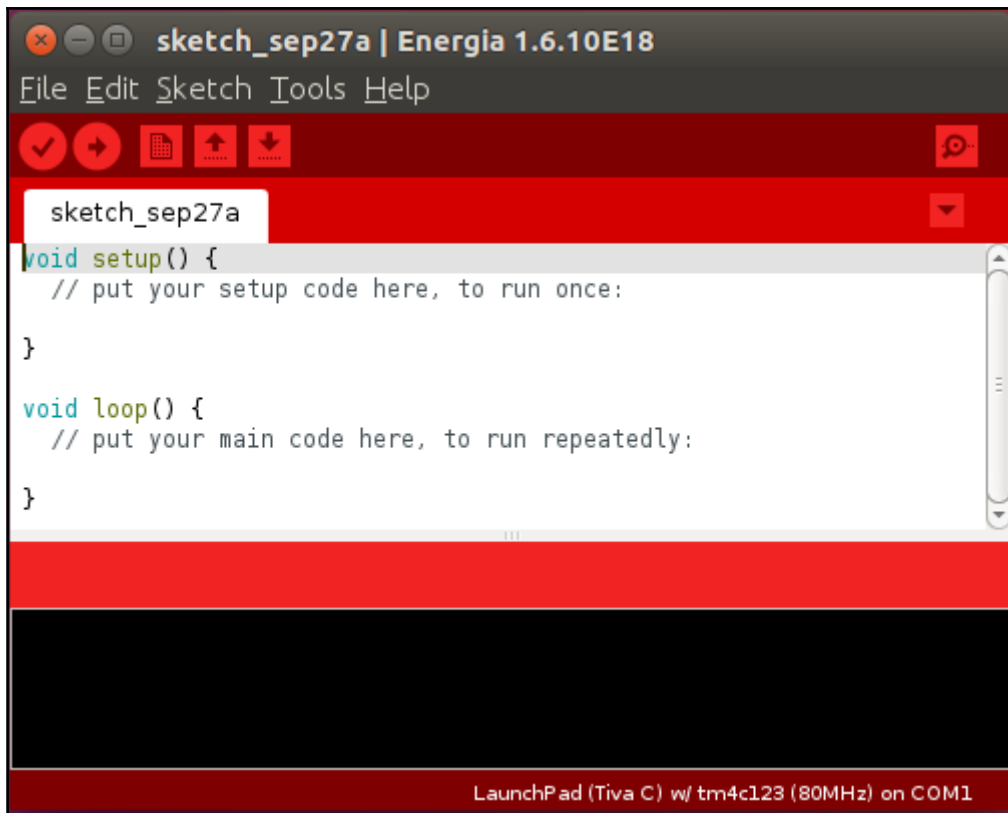

Import program

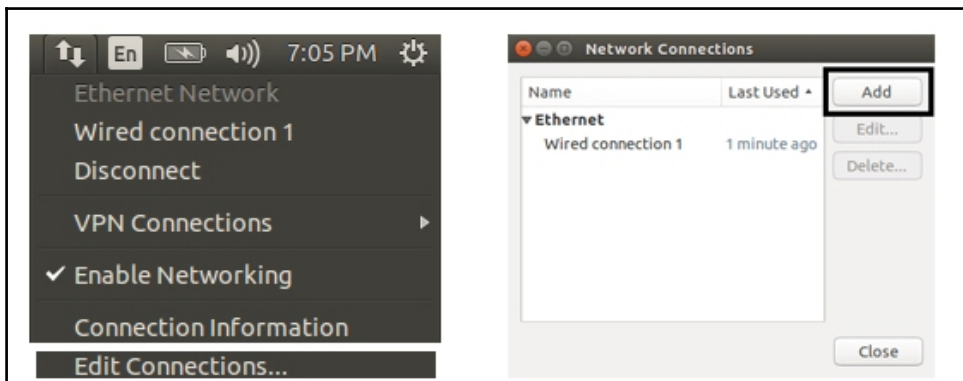

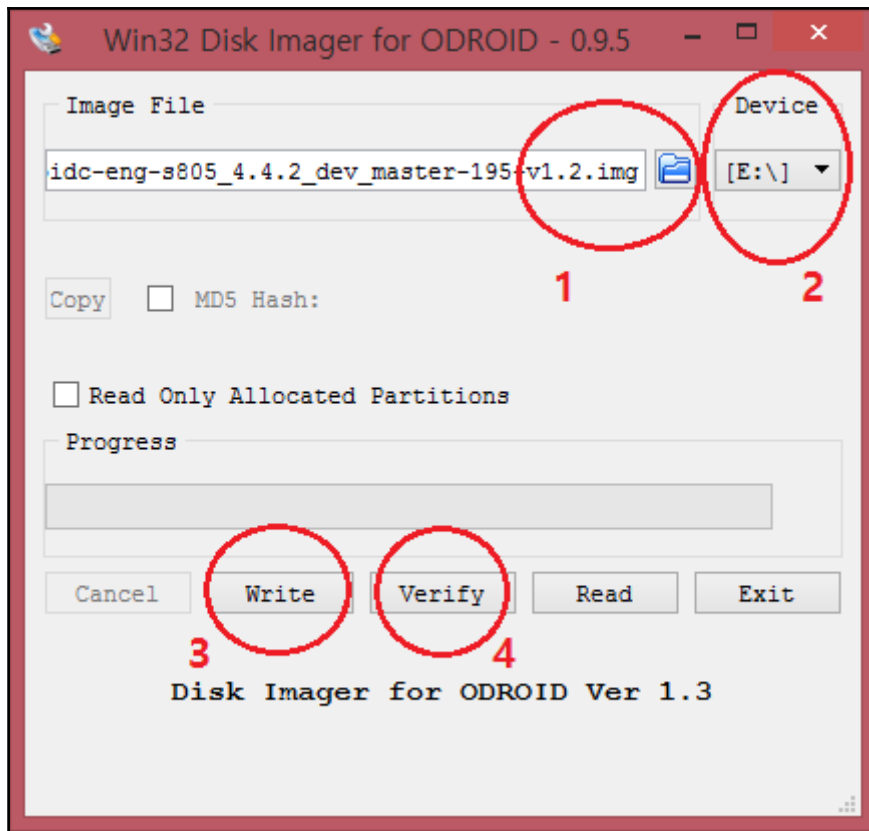

The screenshot shows the mbed IDE interface. The top menu bar includes 'New', 'Import', 'Save', 'Compile', 'Commit', 'Revision', and 'Help'. The 'Compile' menu is highlighted with a red box. The 'Program Workspace' on the left shows a tree view with 'rosserial_mbed_hello_world_publisher' selected, containing 'main.cpp' and 'mbed'. The main editor displays the code for 'main.cpp' with line numbers 1 through 24. The code includes comments and headers for rosserial and mbed, and defines a Publisher class and a main function. The 'Compile output for program: rosserial_mbed_hello_world_publisher' window at the bottom shows a 'Success!' message. The status bar at the bottom indicates 'Ready' and 'INS'.

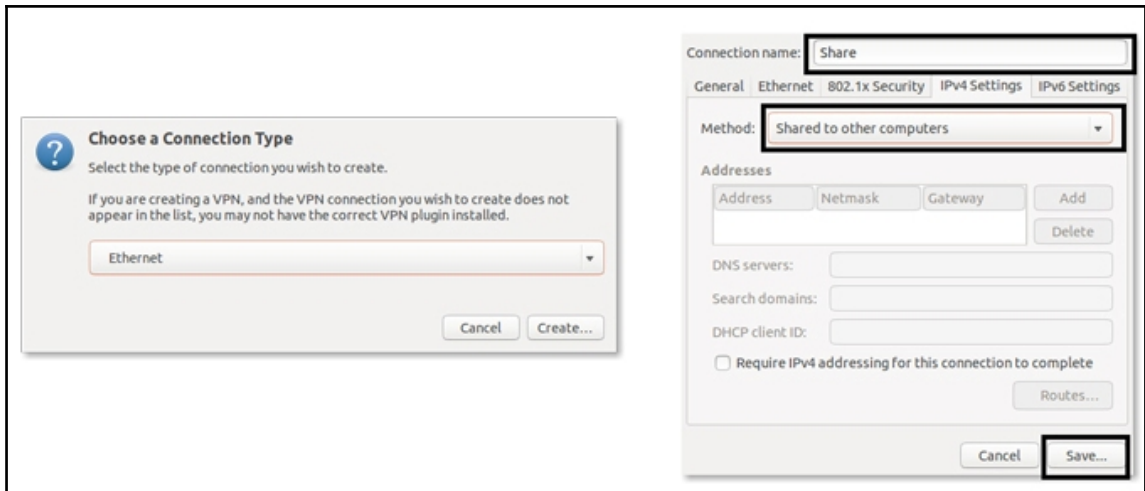

```
1 /*
2  * rosserial Publisher Example
3  * Prints "hello world!"
4  */
5
6 #include "mbed.h"
7 #include <ros.h>
8 #include <std_msgs/String.h>
9
10 ros::NodeHandle nh;
11
12 std_msgs::String str_msg;

ros (Robot Operating System)
  roscpp - Initialize the ros system
  roscpp - Shut down the ros system

  rosmesh - Create a ros message
  rospublisher - Create a ros publisher
  rossubscriber - Create a ros subscriber
  rossvcclient - Create a ros service client
  rossvcserver - Create a ros service server
  rosactionclient - Create a ros action client
  rostopic - View available ros message types

  rosaction - Get information about actions in the ros network
  rosmg - Get information about messages and message types
  rosnode - Get information about nodes in the ros network
  rosservice - Get information about services in the ros network
  rostopic - Get information about topics in the ros network

  rosbag - Open and parse a rosbag log file
  rosparam - Get and set values on the parameter server
  rostrate - Execute loop at fixed frequency using ros time
  rostf - Receive, send, and apply ros transformations

  rosduration - Create a ros duration object
  rostime - Access ros time functionality
```

Chapter 12: Controlling Your Robots over the Web

Web-browser keyboard teleoperation

Teleop topic:

Base frame:

Run the following commands in the terminal then refresh this page. Check the JavaScript console for the output.

1. `roslaunch turtlebot_gazebo turtlebot_world.launch`
2. `rosparam set use_gui true`
3. `roslaunch tf2_web_republisher tf2_web_republisher`
4. `roslaunch rosbridge_server rosbridge_websocket.launch`
5. Use your arrow keys on your keyboard to move the robot (must have this browser window focused).

Web-browser keyboard teleoperation

Teleop topic:

topic:

Base frame:

odom

Run the following commands in the terminal then refresh this page. Check the JavaScript console for the output.

1. `roslaunch turtlebot_gazebo turtlebot_world.launch`
2. `rosparam set use_gui true`
3. `roslaunch tf2_web_republisher tf2_web_republisher`
4. `roslaunch rosbridge_server rosbridge_websocket.launch`
5. Use your arrow keys on your keyboard to move the robot (must have this browser window focused).
