

Chapter 1: Configuring a Spring Development Environment

Java SE Development Kit 8 Update 91 (64-bit) - Custom Setup

Select optional features to install from the list below. You can change your choice of features after installation by using the Add/Remove Programs utility in the Control Panel

- Development Tools
- Source Code
- Public JRE

Feature Description

Java SE Development Kit 8 Update 91 (64-bit), including the JavaFX SDK, a private JRE, and the Java Mission Control tools suite. This will require 180MB on your hard drive.

Install to:
C:\Program Files\Java\jdk1.8.0_91\ Change...

Chapter 9: Give REST to Your Application with Ajax

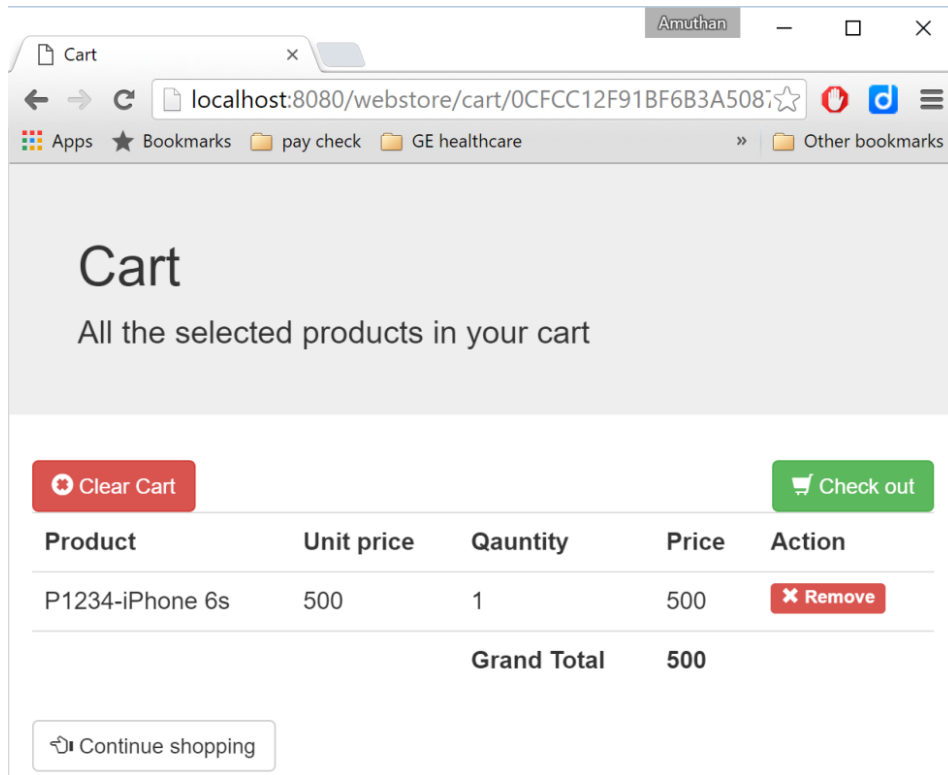

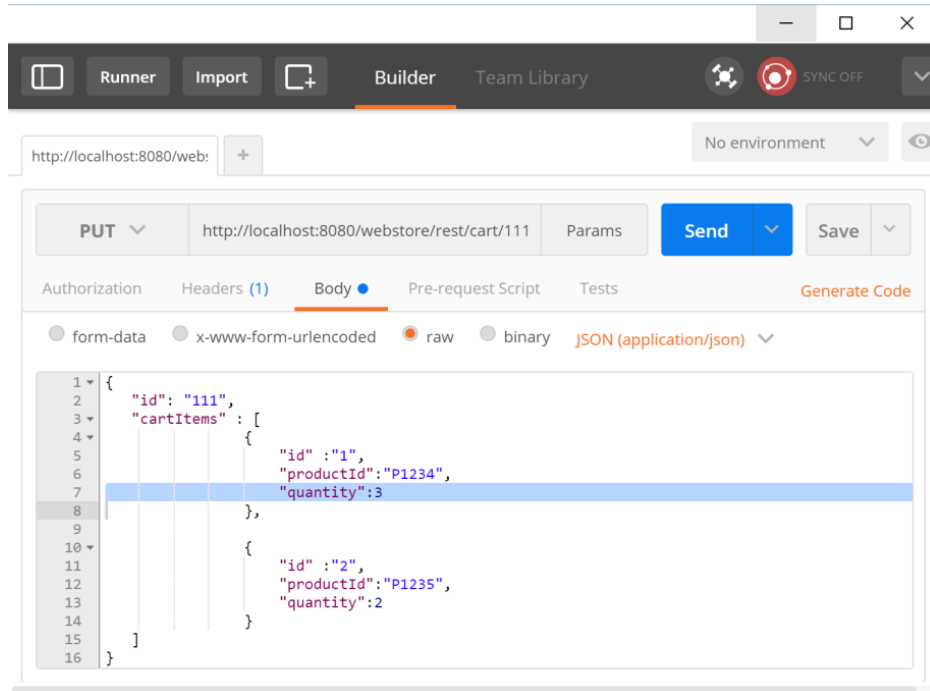

The screenshot shows the Postman website interface. At the top, there's a navigation bar with 'OVERVIEW', 'REVIEWS', 'SUPPORT', and 'RELATED' tabs. Below this, a large banner reads 'Collaborate with Cloud'. The main content area displays a 'Team Library' of API collections, including 'One time mailers', 'OpenBucket', 'Phlips Hue Bulbs', 'Ringdom Status - Postman Labs', 'Postman API Bin', 'Postman Cloud Analytics', and 'Postman Echo (shameless)'. Each collection has a brief description and a 'View Doc' button. On the right side, there's a sidebar with a 'Runs Offline' indicator, a 'Compatible with your device' message, and promotional text: 'Supercharge your API workflow with Postman! Build, test, and document your APIs faster. More than a million developers already do...'. Below this, there's a 'Website' link and a 'Report Abuse' button. At the bottom right, 'Additional Information' is provided: 'Version: 4.2.2', 'Updated: May 31, 2016', and 'Size: 5.95MiB'.

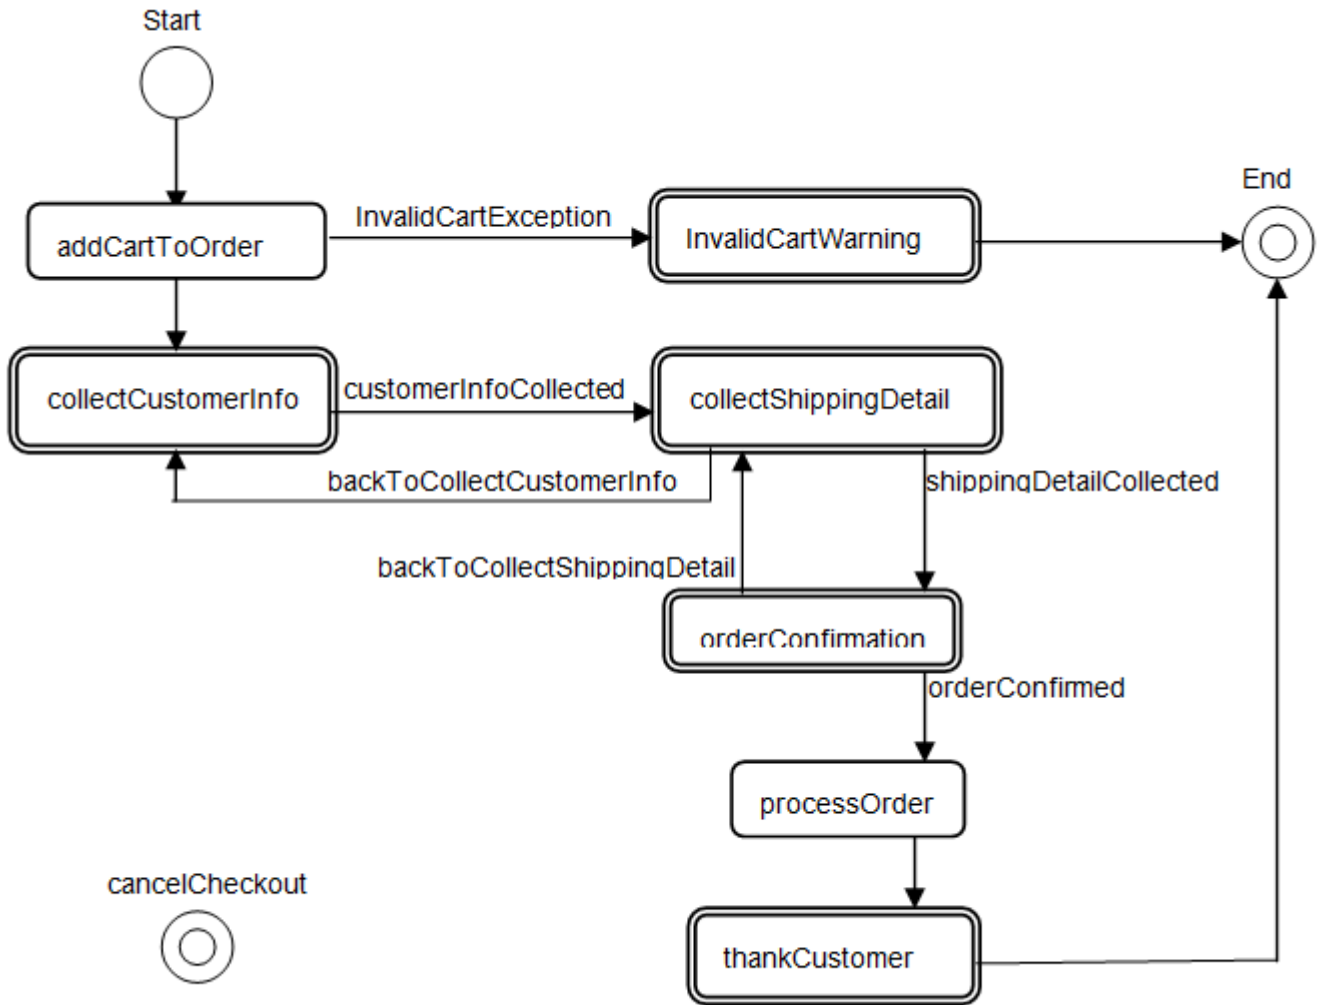

The screenshot shows the Postman Runner interface. At the top, there's a navigation bar with 'Runner', 'Import', 'Builder', and 'Team Library' tabs. Below this, there's a search bar containing 'http://localhost:8080/web/'. The main area is divided into several sections: 'POST' method, the URL 'http://localhost:8080/webstore/rest/cart', and 'Params'. Below this, there are tabs for 'Authorization', 'Headers (1)', 'Body', 'Pre-request Script', and 'Tests'. The 'Body' tab is selected, and the content is displayed in a JSON format:

```
{
  "id": "111",
  "cartItems": [
    {
      "id": "1",
      "productId": "P1234",
      "quantity": 1
    },
    {
      "id": "2",
      "productId": "P1235",
      "quantity": 2
    }
  ]
}
```

 At the bottom, there's a status bar showing 'Status: 201 Created' and 'Time: 228 ms'.
