

Chapter 1: Preparing Your First jQuery Mobile Project

Welcome

Welcome to our first mobile web site. It's going to be the best site you've ever seen. Once we get some content. And a business plan. But the hard part is done!

localhost

About Megacorp

This text talks about Megacorp and how interesting it is. Most likely though you want to [return](#) to the home page.

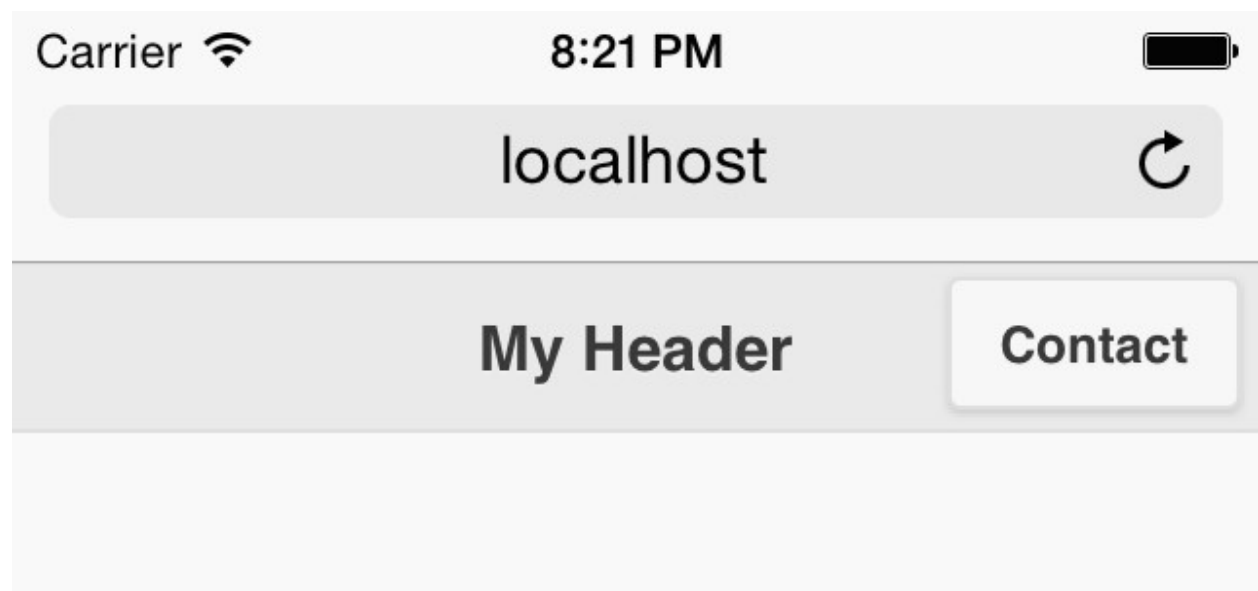

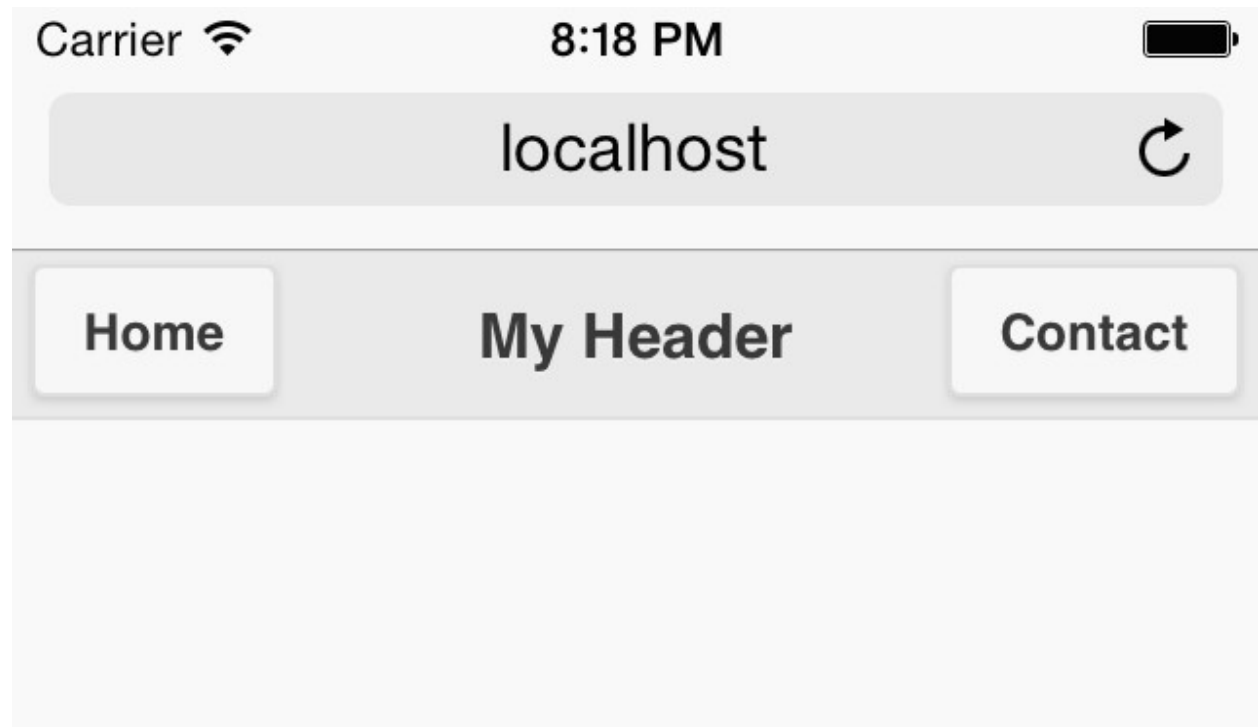

Copyright Megacorp © 2015

The screenshot shows the Chrome DevTools Network tab. The top navigation bar includes 'Elements', 'Network', 'Sources', 'Timeline', 'Profiles', 'Resources', 'Audits', and 'Console'. Below this, there are icons for a red dot, a refresh icon, a filter icon, and a list icon. The 'Network' tab is active, showing a table of network requests. The table has columns for Name, Method, Status, Domain, Type, Initiator, Size, Time, and Timeline. A single request is visible: 'products.html' with Method 'GET', Status '200', Domain 'localhost', Type 'text/...', Initiator 'jquery-2...', Size '1.0 ...', and Time '3 ms'. The 'Timeline' column shows a yellow bar representing the request duration.

Name	Method	Status	Domain	Type	Initiator	Size	Time	Timeline
products.html	GET	200	localhost	text/...	jquery-2...	1.0 ...	3 ms

Chapter 7: Creating Grids, Panels, and Other Widgets

Grid Test

This is my left hand content. There won't be a lot of it.

This is my right hand content. I'm going to fill it with some dummy text.

Bacon ipsum dolor sit amet andouille capicola spare ribs, short loin venison sausage prosciutto turducken turkey flank frankfurter pork belly short ribs. Venison frankfurter filet mignon, jowl meatball hamburger pastrami pork chop drumstick. Fatback pancetta boudin, ribeye shoulder capicola cow leberkäse bresaola spare ribs prosciutto venison ball tip jowl

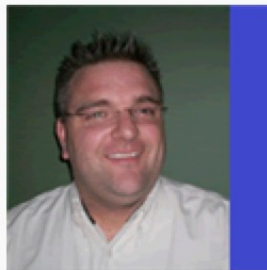

Grid Test

This is Raymond Camden. Here is some text about him. It may wrap or it may not but jQuery Mobile will make it look good. Unlike Ray!

This is Scott Stroz. Scott Stroz is a guy who plays golf and is really good at FPS video games.

Orientation Tests

Tilt this sideways!

Orientation changed to landscape

The image shows a screenshot of an iPhone simulator interface on the left and its corresponding Web Inspector on the right. The simulator displays a page titled "Page Event Tests" with four buttons: "Go to Page 2", "Go to Page 3", "Go to Page 4", and "Go to Page Failed". The Web Inspector shows a list of events in the console, including "pagecontainerbeforechange", "pagebeforecreate", "pagecreate", "pagecontainerbeforeshow", "pagecontainershow", "pagecontainerchange", "pagecontainerbeforehide", "pagecontainerbeforeshow", "pagecontainerhide", "pagecontainershow", "pagecontainerchange", "pagecontainerbeforehide", "pagecontainerbeforeshow", "pagecontainerhide", "pagecontainershow", and "pagecontainerchange". A yellow error message is visible at the top of the console: "Unexpected CSS token: : jquery.mobile-1.4.5.min.css:3:180462".

- [PhoneGap CLI](#)

Desktop App

CLI

Step 1: Install PhoneGap

The PhoneGap Desktop application provides a drag and drop interface for creating PhoneGap applications. It's an alternative to using the [PhoneGap CLI](#) built for those who prefer a visual user interface over a command line interface approach.

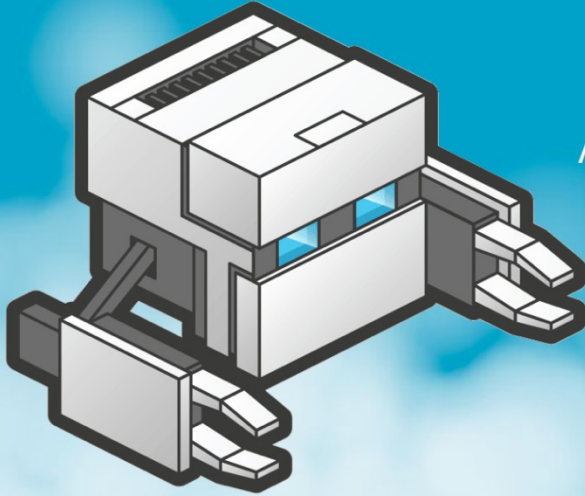

NOTE: The getting started steps vary based on the initial PhoneGap tool you install here in step 1. For the rest of the steps be sure to choose either the **Desktop** or **CLI** tab at the top accordingly.

Select your operating system to continue:

- [Mac OS X](#)
- [Windows](#)

Mac OS X Installation

1. Download the latest [Mac OS X Installer](#).
2. Double-click the downloaded file to run the installer. You will initially be prompted with a license agreement to accept:

Adobe® PhoneGap™ Build

Package mobile apps in the cloud.

[Get started!](#)

Take the pain out of developing mobile apps.

Simply upload your **HTML5**, **CSS**, and **JavaScript** assets to the **Adobe® PhoneGap™ Build** cloud service and we do the work of compiling for you.

Welcome to Adobe® PhoneGap™ Build!

Let's get you started building an app.
